

# Pedestrian Improvements

13th Street (U.S. 192) from Florida Avenue to Michigan Avenue

## Osceola County

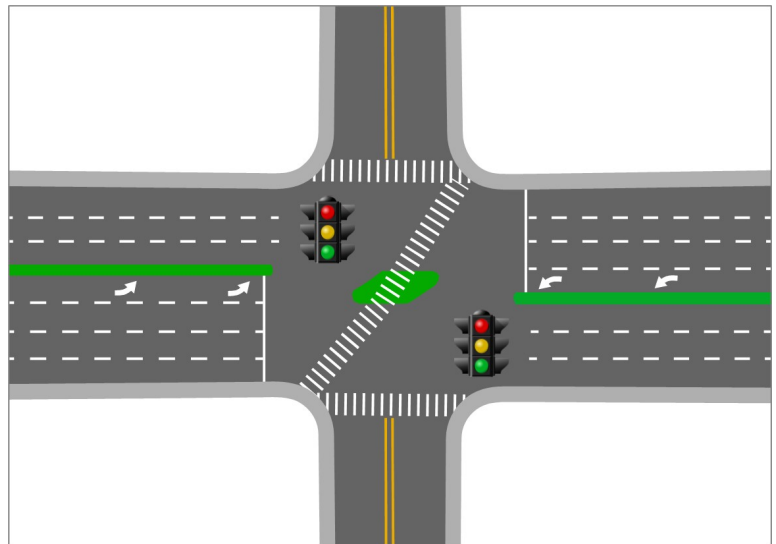

Financial Project Identification (FPID) No.: 445709-1

### Project Description

The Florida Department of Transportation (FDOT) proposes to enhance safety and operations at three intersections on 13th Street (U.S. 192) in St. Cloud. The project emerged from a pedestrian safety study completed in August 2019. The study provided recommendations for improvements to the 13th Street intersections at Florida Avenue, Indiana Avenue and Michigan Avenue.

Improvements planned for this project include adding pedestrian activated signals and reconstructing the existing directional median at Florida Avenue and Indiana Avenue. The new signal will stay green for traffic traveling along 13th street until activated by a pedestrian wanting to cross. Once activated, the light will turn yellow and then red to stop vehicles. Turning movements for vehicles at the intersections will stay the same.

Operational and safety improvement proposed at Michigan Avenue include reconstructing and upgrading the existing traffic signal. New pedestrian signals and crosswalks will be installed at all intersections and lighting will be upgraded to enhance pedestrian safety. The project also includes reconstructing pedestrian curb ramps in accordance with current Americans with Disabilities Act (ADA) standards.

### Project Status and Estimated Costs\*

Design:	Ongoing - completion fall 2022	\$ 610,000
Right of Way:	Within existing	—
Construction:	Funded - early 2023	\$ 1.9 Million

\* subject to change
