

JOHN YOUNG PARKWAY AND PLEASANT HILL ROAD INTERSECTION

INTERIM IMPROVEMENT STUDY

FPID: 418403-6

Project Purpose and Need:

These improvements are being evaluated as part of an effort to provide congestion relief in-advance of the current project in design for the widening project on John Young Parkway from Pleasant Hill Road to Portage Street (FPID 418403-3) in Osceola County. The proposed interim improvements include construction of a new roadway within the southeast quadrant of the existing John Young Parkway and Pleasant Hill Road intersection. This new roadway will help relieve congestion and connect the existing John Young Parkway/Oaks Boulevard signal to a new signal located at the existing Fern Drive and Pleasant Hill Road intersection.

Interim Project Status and Estimated Costs:

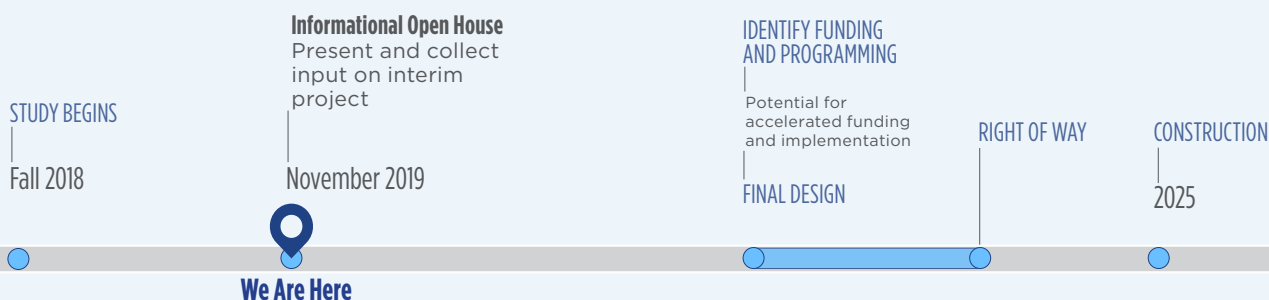

Design: FDOT In-House, Ongoing
Right of Way: \$19 million (Not programmed)
Construction: \$6.4 million (Funded for 2025)

Total Estimated Cost: \$25.4 million
