

Silver Star Road (S.R. 416) at Hansrob Road Median Modifications

Orange County

Financial Project Identification (FPID) No.: 992100-1

Project Description

The purpose of this project is to increase safety, improve traffic flow, and reduce number of areas where vehicles cross paths by installing a median using vertical posts on Silver Star Road (State Road (S.R.) 416) from John Young Parkway (S.R. 423) to east of Hansrob Road. This project is an interim solution until the future construction of a concrete median. The intersection at Hansrob Road will continue to allow right turns in all directions, as well as westbound (WB) left turns into the WaWa driveway.

Northbound (NB) and southbound (SB) left turns and through movements, as well as eastbound (EB) left turns, will be prohibited at this intersection. Motorists looking to complete those movements at the intersection can utilize Hansrob Road, Regent Avenue, and Silver Meteor Drive. By limiting these turning movements, motorists will be able to travel through the Hansrob Road and John Young Parkway intersections far more efficiently, with conflicts significantly reduced.

The permanent solution, a concrete median, will be installed with a future repaving project, FPID No. 448801-1, on Silver Star Road from Princeton Street (S.R. 438) to U.S. 441 (S.R. 500).

Project Status and Estimated Costs*

Design:	Ongoing: Completion late 2021	\$ 1,000
Right of Way:	Within Existing	—
Construction:	Funded: Early 2022	\$ 30,000

*subject to change
