

U.S. 301 (S.R. 35) Resurfacing from C.R. 521 to S.R. 44

Sumter County

Financial Project Identification (FPID) No.: 445190-1

Project Description

The Florida Department of Transportation (FDOT) is proposing improvements on a nearly 2.9-mile segment of U.S. 301 (State Road (S.R.) 35) that plans to enhance safety and operations along the corridor.

The project plans to repave U.S. 301 from County Road (C.R.) 521 to S.R. 44 between the cities of Coleman and Wildwood to extend the life of the existing roadway.

Safety enhancements include adding asphalt to help prevent depressions or grooves in the road at several locations where the side road or driveway is unpaved. The project also plans to widen the asphalt shoulder through the interchange with Florida’s Turnpike to increase the separation between the travel lanes and existing barrier wall.

Other improvements include adding approximately 800 feet of new sidewalk on the west side of U.S. 301 between Spring Lake Road and S.R. 44 to fill gaps in existing sidewalk and improving safety for pedestrians and bicyclists. Necessary drainage adjustments are also planned.

Project Status and Estimated Costs*

| | | |
|---------------|--------------------------------|----------------|
| Design: | Ongoing: completion early 2022 | \$ 655,000 |
| Right of Way: | Within existing | - |
| Construction: | Funded: fall 2022 | \$ 2.3 Million |
