This Collision Summary has been compiled from Signal Four Analytics data and plotted as coded at the locations specified. Additional analysis, review or evaluation of long form crash summaries has not been conducted for each crash. Crashes were plotted using raw data for purposes of context and magnitude during scoping. Long form crash reports were only reviewed for bike, pedestrian and fatal crashes. Diagram and Summary are provided for informational purposes only.

*Sideswipe collisions include both opposite and same direction crashes.

Crash 2 was eliminated from the data set after determining it occurred outside the project limits (pedestrian).

Crashes 34 through 385 are within the project exception limits and not included in this summary.
