I-4 NORTH VOLUSIA COUNTY PD&E STUDY

S.R. 400 (I-4) FROM S.R. 472 TO I-95

Volusia County | ETDM # 14592 | FPID # 456269-1

Department Designee:

Kellie Smith

Technical Review Committee:

Catalina Chacon, P.E.; Mark Trebitz, P.E.; Steven Buck, P.E.

Advisors:

Ed Kestory, P.E.; Isaac Naziru, P.E.; Casey Lyon, M.S.

Project Manager:

Joseph Fontanelli

Advertisement Date: September 2nd, 2025

Marketing Meetings: Appointments available on CAP for late July and August 2025

Selection: 3 shortlisted, 1 selected

Oral Presentation: Scheduled for October 21st, 2025 and includes a 30 minute presentation (with a 30 slide maximum) and 15 min Q&A

Funding: The project is currently funded for \$1 million but is anticipated to have a total project budget of \$5 million.

Major work groups include: 2.0

Minor work groups include: 3.2, 3.3, 4.1.1, 4.1.2, 4.2.1, 4.2.2, 5.4, 6.1, 6.2, 6.3.1, 6.3.3, 7.1, 7.2, 7.3, 8.1, 8.2, 8.3, 8.4, 9.1, 9.2, 9.4.1, 9.5, 13.4, 13.5, 15.0

I-4 NORTH VOLUSIA COUNTY PD&E STUDY

S.R. 400 (I-4) FROM S.R. 472 TO I-95

PROJECT INFORMATION

Volusia County | ETDM # 14592 | FPID # 456269-1

PURPOSE:

THE PURPOSE OF THE PROJECT IS TO ADDRESS FUTURE TRAVEL DEMAND AND IMPROVE SAFETY ALONG I-4 FROM S.R. 472 TO I-95

PROJECT MANAGER: Joseph Fontanelli

PROJECT LOCATION: Volusia County

LIMITS: Begin: S.R. 472 **End:** I-95

LENGTH: 19 Miles

The project will widen I-4 from S.R. 472 to I-95 to accommodate future travel demand.

Widening options include the addition of either general-use lanes or managed lanes, improvements to the interchanges (at S.R. 44, Orange Camp Road, and U.S. 92), and drainage improvements.

The consultant team will propose a phased approach to the PD&E study. Using the available resources and funding, they will define the activities and deliverables for Phase 1. The primary objectives of Phase 1 are to identify and mitigate key project risks, facilitate the Department's decision-making process, and enhance regional public engagement to build consensus on the project. Design option will be include in the contract.

Documents will be uploaded to the CAP website as they become available.

EXISTING CONDITIONS

CORRIDOR

- Currently I-4 is a six-lane limited access Strategic Intermodal System (SIS) facility classified as an Urban Principal Arterial Interstate that runs southwest to northeast with posted speeds of 70 MPH.
- I-4 is designated by the Florida Department of Emergency Management as an evacuation route. It is also classified by FDOT as a National Highway Freight Network Corridor, with truck percentages ranging from 13% to 17%.

TRAFFIC

- 2024 Annual Average Daily Traffic (AADT) for I-4 within the project limits range between 63,500 vehicles per day (vpd) and 93,500 vpd.
- Currently, all segments of I-4 within the limits of this project meet the target Level of Service (LOS) of C for rural roadways and LOS D for urban roadways (*Florida Traffic Online*).

SAFETY

- Within the study area 1,518 vehicle crashes occurred in the period from 2018-2022. These crashes resulted in 16 fatalities and 88 serious injuries.
- I-4 through the project limits experiences crash rates (0.57 - Rural, 1.36 - Urban) greater than the corresponding statewide averages (0.41 - Rural, 0.85 - Urban) for similar facilities (*Signal Four Analytics*).

RIGHT OF WAY

- The existing right of way is generally 300 feet in width.
