PROJECT DESCRIPTION

The Florida Department of Transportation (FDOT) is making safety improvements and resurfacing State Road (S.R.) A1A (South Atlantic Avenue and Dunlawton Avenue) from U.S. 1 (Ridgewood Avenue) in Port Orange, through Daytona Beach Shores, to Davis Street in Daytona Beach.

In addition, the department will install two new midblock pedestrian crossings with Rectangular Rapid Flashing Beacons (RRFBs) in Daytona Beach Shores: one at Sea Spray Street/Andrianopoulos Park and another near Browning Avenue. RRFBs are pedestrian-activated signals that display flashing yellow lights to alert drivers that a pedestrian is ready to cross. The project also includes upgrading the seven existing midblock crossings by adding in-road lighting and turtle-safe overhead lighting at the following locations: north of Broad Avenue, north of Edwin Peck Park, Publix at Daytona Beach Shores, north of Bellemead Drive, south of Oceans West Boulevard, north of Florida Shores Boulevard, and north of Poinsettia Road.

Additional activities include, updating existing curb ramps to meet current Americans with Disabilities Act (ADA) standards and installing new signage and pavement markings.

WHAT TO EXPECT

During construction, motorists should expect intermittent daytime and nighttime lane closures, every day of the week. No construction activities will take place on the S.R. A1A/Dunlawton Avenue Bridge as part of these projects. Pedestrians should expect detours at some crosswalk and sidewalk locations. Access to all properties, including beach ramps, boat ramps, and bus stops, will be maintained.

Drivers are encouraged to follow posted signage, avoid distractions, and use caution while traveling through the construction zone. Please note that the construction schedule is subject to change due to inclement weather or other unforeseen circumstances. For the most current project details and lane-closure information, please visit FDOT's Central Florida website at www.cflroads.com.

CONTRACTOR

C.W. Roberts Contracting, Inc.

PROJECT COST

\$6.6 million

PROJECT START

February 2026

ESTIMATED COMPLETION

Summer 2026
