EXECUTIVE SUMMARY

Geotechnical and Environmental Consultants, Inc. (GEC) has been retained by Parsons Transportation Group, Inc. (Parsons) on behalf of the Florida Department of Transportation (FDOT) to provide a Level I Contamination Screening Evaluation Report (CSER) for the SR 401 Bridge Replacement PD&E Study. This CSER was performed as part of Financial Project ID No. 444787-1-22-01.

The purpose of this evaluation was to assess the risk of encountering petroleum or hazardous substance contamination of soil, groundwater, surface water, or sediment that could adversely affect this project. The CSER activities included a review of public regulatory files and historical data sources, and a site reconnaissance of the project study area.

As a result of this evaluation, we have assigned Contamination Risk Ratings (CRR) to six sites. The site locations are shown on **Figure 4** and the contamination status of each site is summarized in **Table 1**.

Using the FDOT CRRs presented in **Appendix C**, we have identified **6 Low Risk** sites, as summarized below.

Low Risk Sites (6)

Site No.	Site Name	Site Address	Risk Potential
1	Cape Marina Services	800 Scallop Drive	Low
2	Ocean Club at Port Canaveral	930 Mullet Road	Low
3	New Port Marina	960 Mullet Road	Low
4	Unknown Release	990 Mullet Road	Low
5	Canaveral Port Authority – Cruise Terminal 8 Garage	9155 Charles M Rowland Drive	Low
6	Canaveral Landfill	Mullet Drive	Low

Based on the findings of this CSER, Level II Impact to Construction Assessments (ICAs) are not recommended for this project.

1.0 INTRODUCTION

1.1 Contract Information

Geotechnical and Environmental Consultants, Inc. (GEC) has been retained by Parsons Transportation Group, Inc. (Parsons) on behalf of the Florida Department of Transportation (FDOT) to provide a Level I Contamination Screening Evaluation Report (CSER) for the SR 401 Bridge Replacement PD&E Study. This CSER was performed as part of Financial Project ID No. 444787-1-22-01.

1.2 Purpose

The purpose of this evaluation is the early identification of potential contamination sites that could impact this project...

The presence of contaminated environmental media (soil, groundwater, surface water, and sediment) can have a significant negative impact on the cost and schedule to complete a bridge replacement and roadway improvement project. The purpose of this evaluation was the early identification of potential contamination sites that could impact this project and to provide valuable input for the design, right-of-way acquisition, and construction phases.

2.0 PROJECT DESCRIPTION

The following sections describe the current study area conditions, the project construction plans and elements of the project that could be impacted by soil or groundwater contamination. The definitions for common terms used in this report can be found in **Appendix B**.

The project involves the evaluation of the three existing bascule bridges for replacement with either a mid-level movable bascule bridge, a mid-level movable lift bridge, or a high-level fixed bridge over the canal.

2.1 Site Description

The SR 401 project...begins...100 feet south of...SR 528... and continues... 3,550 feet north...

The SR 401 project is a 3,550-foot segment of SR 401 that begins approximately 100 feet south of the SR 528 overpass bridges over SR 401 and continues approximately 3,550 feet north to the Charles M. Rowland Drive (Cruise Terminal Exit) gore area, which includes 315-foot long barge canal bridges. In addition to SR 401, the project also includes eastbound and northbound ramps from SR 528

gore area to SR 401. The project alignment is shown on an excerpt of the United States Geological Survey (USGS) Courtenay Map (**Figure 1**) in the Appendix.

2.2 Current Land Use

The current land uses within the study area are shown on the St Johns River Water Management District (SJRWMD) Map on **Figure 2** and are summarized as follows:

- Reservoirs
- Bays and Estuaries
- Mangrove Swamp
- Enclosed saltwater ponds within a salt marsh
- Saltwater marshes
- Roads and highways
- Port facilities
- Surface water collection basins

2.3 Project Description

The following project elements are proposed:

- Bridge replacement
- Roadway construction
- Drainage improvements, including pipes and other drainage structures requiring soil excavation
- Excavation dewatering

2.4 Potential Contamination Impacts

The project elements that could be impacted by soil and/or groundwater contamination include the following:

- Bridge construction
- Soil excavation for roadway construction
- Soil excavation for drainage improvements
- Excavation dewatering

3.0 CONTAMINATION SCREENING METHODOLOGY

GEC conducted this evaluation in general accordance with Chapter 20 of the FDOT PD&E Manual dated July 1, 2020. The study area is defined by the following distances from the right-of-way:

- All sites within 500 feet
- Non-landfill solid waste sites within 1,000 feet
- Solid waste landfills, CERCLA, or National Priorities List (NPL) sites within ½ mile

GEC reviewed relevant information from the FDEP, USEPA, and local agencies in Brevard County to identify known or potential contamination sites within the study area. Historical aerial photographs and other published historical sources were reviewed as part of this CSER. GEC performed a site reconnaissance of the properties within the study area and attempted to interview individuals with knowledge of the study area's environmental status.

Based on the results of the contamination screening activities, GEC assigned Contamination Risk Ratings (CRRs) to sites. The contamination risk rating system was developed by FDOT and incorporates four levels of risk: **No, Low, Medium and High**. For a description of the four risk levels please refer to **Appendix C**.

4.0 GEOLOGIC AND GEOGRAPHIC CONDITIONS

4.1 Central Florida Geology

Due to its prevalent geology, referred to as karst, Central Florida is prone to the formation of sinkholes, or large, circular depressions created by local subsidence of the ground surface. The nature and relationship of the three sedimentary layers typical of Central Florida geology cause sinkholes. The deepest, or basement, layer is a massive cavernous limestone formation known as the Floridan aquifer.

The Floridan aquifer limestone is overlain by a silty or clayey sand, clay, phosphate, and limestone aquitard (or flow-retarding layer) ranging in thickness from nearly absent to greater than 100 feet and locally referred to as the Hawthorn Group (Hawthorn). The Hawthorn is in turn overlain by a 40-foot to 70-foot thick surficial layer of sand, bearing the water table aquifer. The likelihood of sinkhole occurrence at a given site within the region is determined by the relationship among these three layers, specifically by the water (and soil)-transmitting capacity of the Hawthorn at that location.

The water table aquifer is comprised of Recent and Pleistocene sands and is separated from the Eocene limestone of the Floridan aquifer by the Miocene sands, clays and limestone of the Hawthorn. Since the thickness and consistency of the Hawthorn is variable across Central Florida, the likelihood of groundwater flow from the upper to the lower aquifer (known as aquifer recharge) will also vary by geographical location.

In areas where the Hawthorn is absent, water table groundwater (and associated sands) can flow downward to cavities within the limestone aquifer, like sand through an hourglass, recharging

the Floridan aquifer, and sometimes causing the formation of surface sinkholes. This process of subsurface erosion associated with recharging the Floridan aquifer is known as raveling. Thus, in Central Florida, areas of effective groundwater recharge to the Floridan aquifer have a higher potential for the formation of surface sinkholes.

Based on the U.S. Geological Survey Map entitled “Recharge and Discharge Areas of the Floridan Aquifer in the St. Johns River Water Management District and Vicinity, Florida,” 1984, the study area lies in an area of generally no recharge. Therefore, we can conclude, based solely on this data that the relative risk of sinkhole formation is low compared to the overall risk across Central Florida.

4.2 USGS Quadrangle Map

The study area has been transposed onto the United States Geological Survey (USGS) Courtenay, Florida Quadrangle Map, as shown on **Figure 1**. The USGS Quadrangle maps indicate that the natural topography of the study ranges between +0 and +5 feet above the National Geodetic Vertical Datum (NGVD). The study area includes, and slopes gently towards, Port Canaveral and the Banana River.

No landfills, borrow pits, quarries, or other conditions are depicted that would represent potential contamination concerns on, or in the immediate vicinity of, the study area.

4.3 NRCS Soil Survey Review

The National Resources Conservation Service (NRCS) Soil Survey for Brevard County, Florida was reviewed for information regarding near-surface soil conditions within the project limits, as shown on **Figure 3**. The following soil types were identified within the study area:

Brevard County

Unit No.	Soil Name	Unit No.	Soil Name
9	Canaveral-Ancote complex, gently undulating	10	Canaveral-Urban land complex
52	Quartzipsamments, smoothed	58	Turnbull & Riomar soils, tidal
99	Water	100	Waters of the Atlantic Ocean

Quartzipsamments, smoothed (Soil Type No. 52) are nearly level to steep sands that have been reworked and shaped by earthmoving equipment. These soils are commonly found near urban areas, highways and in ponds and sloughs that have been filled to the surrounding ground level.

No landfills, borrow pits, quarries, or other conditions are depicted that would represent potential contamination concerns on, or in the immediate vicinity of, the study area which were not already identified by other sources.

Information contained in the NRCS Soil Survey is very general and may be outdated. It may not therefore be reflective of actual soil and groundwater conditions, particularly if recent development in the site vicinity has modified soil conditions or surface/subsurface drainage.

5.0 HISTORICAL DATA REVIEW

5.1 Historical Aerial Photographs

Historical aerial photographs of the study area were reviewed to evaluate past land use and to identify features that may indicate hazardous material or petroleum contamination. Available historical aerial photographs of the study area were provided by EDR or viewed on Google Earth. Aerial photographs for the following years were reviewed: 1943, 1951, 1958, 1969, 1979, 1980, 1986, 1993, 1994, 1999, 2007, 2010, 2013, 2017, and 2021.

1943 – The study area is shown as being part of the Banana River.

1951 and 1958 – Fill activities have started and are extending from the east along the future SR 528 alignment.

1969 – The SR 401 and SR 528 interchange is under construction. The SR 401 bridge is visible.

1979 and 1980 – The SR 528 and SR 401 interchange is visible. Port Canaveral is visible. The turn basin extends up to SR 401 on the north side of the SR 401 bridge. Boat docks are visible at the marinas to the southeast of the SR 401 bridge.

1986–1994 – The filling and construction of the port features north and east of the bridge is visible.

1999 – Many of the port features north and east of the bridge have been constructed, including parking areas and cruise ship docks.

2007 – Additional filling and construction was completed to the northeast of the SR 401 bridge. A flyover ramp is visible adjacent to the north end of the SR 401 study area.

2010-2021 – The port is shown in its current configuration between 2010 and 2021.

Table 2 summarizes our aerial photograph review of the potential contamination sites identified within the study area. The historical aerial photographs are provided in **Appendix A**.

5.2 City Directories

City Directories are historical listings of businesses and residences in a given area, similar to a standard telephone book. The site occupant and addresses listed for previous years can identify past land uses. GEC contracted with Environmental Data Resources (EDR) to provide a city directory review for the study area. EDR researched city directories from 1955 through 2017 at approximately 5-year intervals.

The city directory review confirmed the marina and boat repair land uses and timeframes at **Site Nos. 1** (1995-2017) and **2. Site No. 4** (1985-2017). **Site No. 4** is listed as Disney Cruise lines in 2014 and 2017. The EDR City Directory Report is included in **Appendix D**.

5.3 Fire Insurance Maps

Fire insurance maps are used by insurance companies in assessing fire risk. These maps contain details about building construction, business type, building contents, fuel storage tanks, and other factors affecting fire risk.

Fire insurance maps were not available for the study area. The fire insurance map search confirmation is included in **Appendix D**.

5.4 Historical Quadrangle Maps

GEC reviewed historical quadrangle maps provided by EDR. The maps for 1949, 1951, 1970, 1976, 2012, 2015, and 2018 were reviewed.

Our historical quadrangle map review revealed the following observations:

- The 1949 and 1951 maps show the study area as being part of the Banana River.
- The 1970 and 1976 maps show the constructed port. SR 410 and SR 528 are visible. The west turning basin extends all the way to SR 401.
- The 2012-2018 maps show additional land and development on the east side of SR 401, north of the bridge.

No obvious contamination concerns are visible on the historical quadrangle maps. The EDR historical quadrangle map report is included in **Appendix D**.

5.5 Historical Contamination Screening Evaluation Report

GEC previously prepared two historical Contamination Screening Evaluation Reports which include portions of the current study area, as discussed here:

- GEC prepared a CSER for SR 528 from SR 520 to Terminal B Interchange in April 2005 (FIN No. 407402). A total of 33 sites were identified in the report, which spanned approximately 23 miles from the intersection of SR 528 and SR 520 at the west to Terminal B at Port Canaveral to the east. These sites were assigned Contamination Risk Rankings (CRRs). Of these, three are included in the Study Area defined in this report. The three sites were assigned a Low Risk rating. No Level II Impact to Construction Assessments (ICAs) were conducted relative to these sites.
- GEC prepared a CSER Update for SR 528 from East of SR 3 (Courtenay Parkway) to Port Canaveral Interchange in April 2017 (FIN No. 407402-4). The report included an approximate 5.11-mile portion of SR 528, where 33 sites were identified. Three of these sites are included in the Study Area defined in this report. The three sites were assigned a Low Risk rating. No Level II ICAs were recommended for these three sites.

The text and figures from these two reports are in **Appendix E**.

6.0 PUBLIC RECORD REVIEW

GEC conducted a review of the public record for the study area including information obtained from the USEPA and the FDEP. As a part of our review, GEC subcontracted with EDR for a regulatory database search. The EDR Corridor Report is included in **Appendix F**.

6.1 Florida Department of Environmental Protection (FDEP) Databases

The FDEP has compiled several databases that are useful in identifying potential sources of hazardous material or petroleum product contamination. The FDEP databases reviewed for this study and their common abbreviations are provided in **Appendix G**.

6.2 United States Environmental Protection Agency (USEPA) Databases

The federal government has compiled several databases that are useful in identifying potential sources of hazardous material or petroleum product contamination. The federal databases reviewed for this study and their common abbreviations are provided in **Appendix H**.

6.3 FDEP OCULUS Document Management System, Map Direct Website, and Nexus Portal

The FDEP uses the OCULUS Document Management System, Map Direct Website, and Nexus Portal to provide public record information for petroleum or hazardous material releases to the environment, generators of hazardous waste, and solid waste facilities. Information contained in this data management system includes the status of active and abandoned storage tanks, tank inspection reports, tank closure reports, environmental assessment reports, remedial action reports, hazardous waste generator compliance details, and solid waste facility compliance details.

GEC reviewed the OCULUS Document Management System, Map Direct Website, and Nexus Portal within the search distances provided in Section 3.0. The results of our review have been incorporated in our Potential Contamination Site Descriptions in **Table 1**. The FDEP OCULUS, Map Direct and Nexus Portal Information can be found in **Appendix I**.

6.4 EDB Delineated Areas

The Florida Legislature had the FDEP implement the Groundwater Contamination Areas Program in 1988 under Chapter 62-524, FAC. The purpose of the program was to protect public health and groundwater resources by regulating potable water well construction and testing standards for areas of known groundwater contamination. During the period 1962 to 1980, the Florida Department of Agriculture and Consumer Services (FDACS) conducted widespread applications of ethylene dibromide (EDB), an agricultural pesticide, to control nematodes in citrus groves. In 1983, the FDEP began testing groundwater in potable wells throughout Florida due to the discovery of EDB in wells in other states. The delineated areas of EDB groundwater contamination are shown on the FDEP Map Direct website. The potable wells, agricultural or residential, with confirmed impacts were shown on this website with a 1,000-foot buffer zone in an attempt to project future migration of contaminants. However, this does not mean that there is not EDB contamination outside of that 1,000-foot zone.

After reviewing these EDB-delineated areas on the FDEP Map Direct website, no EDB-delineated areas exist within the study area.

6.5 Agricultural Land Use

The study area was created by filling in a portion of the Banana River. No agricultural land use was identified within the study area.

6.6 Railroad Corridors

No railroad corridors were identified within the study area.

6.7 Cattle Dip Vats

Cattle dip vats were a response to cattle tick fever in the 1890s. The USDA initiated the cattle dip vat program in 1906 and approximately 3,200 cattle dip vats had been constructed by 1940.

Cattle dip vats were used until the 1960s and many vats have not been located or documented.

Cattle dip vats were used to apply pesticides to cattle and other livestock, kill ticks, and thereby eliminate tick-borne diseases. The vats were typically constructed of concrete. They consisted of four sections; the entrance slide, dipping vat, exit stairs and drip pad. Cattle were funneled into a chute leading to the entrance slide, slid down into the pesticide-filled vat, swam or walked across the

vat and walked up the exit stairs to the drip pad. The vats were roughly four feet wide, seven feet deep, and 40 feet long as shown on the associated diagram.

Due to the relatively small size of the vat and the narrow profile, it is difficult to identify a cattle dip vat from aerial photographs or in a wooded area. Cattle dip vats are typically identified when the landowner reveals the location, when they are located near historical cattle pens and chutes, and by happening upon them. To add to the difficulty in identifying historical cattle dip vats, many landowners removed the vats when the program was closed. They either dug up the vat or broke up the concrete and covered it with soil.

No cattle dip vats were identified within the study area through public record and database review, historical aerial photograph review, or site reconnaissance. Based on available

information, we found no evidence that cattle dip vats within the study area contribute to contamination risk for this project.

7.0 INTERVIEWS

GEC interviewed Ms. Maryann Civil, P.G., of the Brevard County Natural Resources Management Department on December 20, 2021 regarding the Canaveral Landfill location shown on the Map Direct website. The landfill is shown on the northwest quadrant of the SR 401 and SR 528 interchange. Ms. Civil was not aware of a landfill at that location and referred GEC to Mr. Bob Musser with the Canaveral Port Authority.

GEC spoke with Mr. Bob Musser, Canaveral Port Authority Director of Environmental Plans & Programs on December 20, 2021. Mr. Musser was not aware of a landfill having been located on the northwest quadrant of the SR 401 and SR 528 interchange. He indicated that to his knowledge, that location has been a mangrove wetland for roughly the past 30 years. He also indicated that he was not aware of any contamination impacts that would affect the bridge construction.

No additional interviews were performed in the preparation of this assessment. The interview documentation is included in **Appendix J**.

8.0 SITE RECONNAISSANCE

GEC representatives performed a reconnaissance of the study area on December 21, 2021. The purpose of the reconnaissance was to document current conditions and evaluate whether current land uses could result in hazardous material or petroleum product contamination of environmental media.

The properties within the project study area were visually inspected for evidence of contamination such as stressed vegetation, underground tank vent and fill pipes, dumping, accumulated areas of debris, evidence of buried materials, and ground staining.

Details of the site reconnaissance are incorporated in the Potential Contamination Site Descriptions in **Table 1**. Photographs obtained of each potential contamination site during our site reconnaissance are also included in **Table 1**.

9.0 CONCLUSIONS AND RECOMMENDATIONS

This CSER has identified six sites that, in GEC's opinion, have some risk of contamination impacts to this project. The site locations are shown on **Figure 4**. **Table 1** summarizes the findings for each **Low** rated site.

9.1 Potential Contamination Sites

Using the FDOT CRRs presented in **Appendix C**, we have identified **6 Low Risk** sites, as summarized below.

Low Risk Sites (6)

Site No.	Site Name	Site Address	Risk Potential
1	Cape Marina Services	800 Scallop Drive	Low
2	Ocean Club at Port Canaveral	930 Mullet Road	Low
3	New Port Marina	960 Mullet Road	Low
4	Unknown Release	990 Mullet Road	Low
5	Canaveral Port Authority – Cruise Terminal 8 Garage	9155 Charles M Rowland Drive	Low
6	Canaveral Landfill	Mullet Drive	Low

9.2 Level II Impact to Construction Assessments (ICA) Recommendations

Based on the findings of this CSER, Level II Impact to Construction Assessments (ICAs) are not recommended for this project.

9.3 CSER Update

This CSER should be updated if construction will occur more than **one year** from the date of this report to determine if additional assessment is warranted due to significant changes in site conditions or project design.

10.0 LIMITATIONS

The findings, opinions, conclusions and recommendations presented herein are based in part on reasonably ascertainable information contained in the public record. GEC does not warrant or guarantee the accuracy or completeness of this information. Some of this public record information may be dated and not representative of conditions at the time of this report was prepared (December 2021), or in the future. Additional limitations are as follows:

- Not discussed in this report are properties that have been historically undeveloped land, are associated with residential use and do not appear to pose a contamination risk, or are professional/commercial establishments that are not associated with hazardous materials or petroleum products.
- This study also does not include surveys of wetlands, endangered species, asbestos containing materials, lead-based paints, or other potential hazardous building materials.

11.0 USE OF THIS REPORT

GEC has prepared this report for the exclusive use of our client, Parsons, and FDOT, and for application to our client's project. GEC will not be held responsible for any other party's interpretation or use of this report's data or recommendations without our written authorization.

GEC performed the services described in this report in a manner consistent with that level of care and skill ordinarily exercised by members of our profession currently practicing in Central Florida. No other representation is made or implied in this document.

The conclusions and recommendations should be disregarded if the final project design differs from the project description in this report. If such changes are contemplated, GEC should be retained to review the new plans to assess the applicability of this report in light of proposed changes.

TABLES

Table 1
Potential Contamination Site Summary

GEC Project No. 4808E

Site No:		1	Risk Potential:		LOW
Site Name		Cape Marina Services			
Site Address		800 Scallop Drive			
Site Location		Northeast corner of the SR 528 and SR 401 interchange			
Distance/Direction		>450 feet north and northeast of the SR 528 westbound to SR 401 northbound offramp			
Facility ID Nos:		FLR000005850, 8500921			
Database Listings/Sources:		AST, NPDES, RCRA SQG			
Historical Land Use		Marina			
Current Land Use		Marina, Fueling Dock and Boat Repair			
Contaminants		Petroleum Products and Hazardous Materials			
TANKS	U/A	Capacity (gal)	Content	Installed	Removed
1	A	10,000	Unleaded Gas	3/2005	In Use
1	A	20,000	Vehicular Diesel	3/2005	In Use
1	A	20,000	Unleaded Gas	6/1976	2004/2005
Discharge Date		N/A	Cleanup Date:	N/A	
		Soil	Groundwater		
Documented/ Known Impacts:		NO		NO	

PUBLIC RECORDS: The public records document a 10,000-gallon aboveground gasoline tank that was present from 1976 through about 2005 when it was replaced with aboveground 10,000-gallon gasoline and 20,000-gallon diesel tanks. The 1976 tank was about 900 feet from the SR 401 northbound onramp and the newer tanks are about 1,250 feet from the onramp. No spills, discharges or contamination impacts are documented relative to these tanks.

The only hazardous waste information was relative to a citizen complaint regarding improperly disposed sand blasting media. No contamination is documented relative to the site’s hazardous waste status.

INTERVIEW INFORMATION: N/A

SITE OBSERVATIONS: The site is currently occupied by Cape Marina (north of Scallop Drive) and the Cape Marina boat yard (south of Scallop Drive).

CONCLUSIONS: This site is a boat yard and marina that fuels boats and generates some hazardous material from boat painting and repairs. No contamination impacts are documented for this location.

Based on the lack of documented contamination impacts, and the distance from the proposed SR 401 improvements, this site has been assigned a Contamination Risk Rating (CRR) of **Low**.

Looking east towards Cape Marina Services. Site is on both sides of photograph/road.

Contaminants		Petroleum Products				
TANKS	U/A	Capacity (gal)	Content		Installed	Removed
1	U	16,000	Vehicular Diesel		12/2007	In Use
1	U	10,000	Unleaded Gas		12/2007	In Use
Discharge Date		N/A		Cleanup Date:	N/A	
		Soil		Groundwater		
Documented/ Known Impacts:		NO		NO		

PUBLIC RECORDS: The diesel and unleaded gas underground tanks were installed in 2007 and were inspected under the New Port Marina address at 760 Mullet Road, **Site No. 3**. The latest June 2021 inspection indicated that the gasoline fill sump was damaged by a truck parking on it and needed repair. No contamination impacts were reported relative to the damaged sump.

INTERVIEW INFORMATION: N/A

SITE OBSERVATIONS: The site is occupied by the Ocean Club at Port Canaveral marina.

CONCLUSIONS: This site is a marina that fuels boats. No contamination impacts are documented for this location.

Based on the lack of documented contamination impacts, and the distance from the proposed SR 401 improvements, this site has been assigned a CRR of **Low**.

Looking north at Ocean Club Port Canaveral.

Table 1
Potential Contamination Site Summary

GEC Project No. 4808E

Site No:		3	Risk Potential:		LOW	
Site Name		New Port Marina				
Site Address		960 Mullet Road				
Site Location		Northeast corner of the SR 528 and SR 401 interchange				
Distance/Direction		180 feet north of the SR 528 westbound to SR 401 northbound offramp				
Facility ID Nos:		8501220				
Database Listings/Sources:		AST				
Historical Land Use		Marina				
Current Land Use		Marina				
Contaminants		Petroleum Products				
TANKS	U/A	Capacity (gal)	Content		Installed	Removed
1	A	21,000	Vehicular Diesel		7/1982	2008
1	A	8,500	Leaded Gas		7/1983	2008
Discharge Date		N/A	Cleanup Date:		N/A	
		Soil		Groundwater		
Documented/ Known Impacts:		NO		NO		

PUBLIC RECORDS: Two aboveground fuel tanks and associated piping were removed from this site in 2008. Site inspection records document the installation of the two underground fuel tanks at the adjacent Ocean Club at Port Canaveral facility, **Site No. 2**. No spills, discharges or contamination impacts are documented relative to the aboveground tank removal or the underground tank installation.

INTERVIEW INFORMATION: N/A

SITE OBSERVATIONS: The site is occupied by the Scorpion Marine/Port Canaveral Marine facility that includes sales, repair, and sea wall services.

CONCLUSIONS: This is a boat sales and repair marina. No contamination impacts are documented for this location.

Based on the lack of documented contamination impacts, and the distance from the proposed SR 401 improvements, this site has been assigned a CRR of **Low**.

Looking southeast towards the former New Port Marina.

Site No:		4	Risk Potential:		LOW	
Site Name		Unknown Release				
Site Address		990 Mullet Road				
Site Location		Northeast corner of the SR 528 and SR 401 interchange				
Distance/Direction		180 feet east of the SR 528 westbound to SR 401 northbound offramp				
Facility ID Nos:		N/A				
Database Listings/Sources:		2005 CSER				
Historical Land Use		Marina, Boat Repair				
Current Land Use		Marina, Boat Repair				
Contaminants		Petroleum Products				
TANKS	U/A	Capacity (gal)	Content		Installed	Removed
N/A	N/A	N/A	N/A		N/A	N/A
Discharge Date		N/A		Cleanup Date:	N/A	
		Soil			Groundwater	
Documented/ Known Impacts:		NO			NO	

PUBLIC RECORDS: This listing was found in the CSER for the 2005 SR 528 PD&E Study. This location was listed as having a spill or release. There are no available public records and our conversation with Mr. Bob Musser, Canaveral Port Authority Director of Environmental Plans & Programs, did not reveal any known contamination impacts in the vicinity of the SR 401 bridge.

INTERVIEW INFORMATION: N/A

SITE OBSERVATIONS: This address contains a boat yard. The large building visible on the 2021 aerial photograph was removed prior to December 21, 2021.

CONCLUSIONS: This is a boat yard. No contamination impacts are documented for this location.

Based on the lack of documented contamination impacts, and the distance from the proposed SR 401 improvements, this site has been assigned a CRR of **Low**.

Looking southeast towards the former building location at 990 Mullet Road.

Table 1
Potential Contamination Site Summary

GEC Project No. 4808E

Site No:		5		Risk Potential:		LOW	
Site Name		Canaveral Port Authority – Cruise Term 8 Garage					
Site Address		9155 Charles M Rowland Drive					
Site Location		North of SR 401 Bridge on east side of SR 401					
Distance/Direction		350 feet east of SR 401, 1,250 feet north of SR 401 Bridge					
Facility ID Nos:		9813210					
Database Listings/Sources:		AST					
Historical Land Use		Parking Lot					
Current Land Use		Parking Garage					
Contaminants		Petroleum Products					
TANKS	U/A	Capacity (gal)	Content		Installed	Removed	
1	A	1,800	Emergency Generator Diesel		2/1/2006	In-Use	
Discharge Date		N/A		Cleanup Date:	N/A		
		Soil		Groundwater			
Documented/ Known Impacts:		NO		NO			

PUBLIC RECORDS: This tank is an emergency generator belly tank. The latest January 2021 tank inspection did not find any releases or contamination impacts.

INTERVIEW INFORMATION: N/A

SITE OBSERVATIONS: The site is currently a parking garage.

CONCLUSIONS: This is an emergency fuel tank for a parking garage generator. No contamination impacts are documented for this location.

Based on the lack of documented contamination impacts, and the distance from the proposed SR 401 improvements, this site has been assigned a CRR of **Low**.

Looking east at the parking garage.

Table 1
Potential Contamination Site Summary

GEC Project No. 4808E

Site No:		6	Risk Potential:	LOW	
Site Name		Canaveral Landfill			
Site Address		Mullet Drive			
Site Location		Northwest corner of the SR 528 and SR 401 interchange			
Distance/Direction		180 feet west of the SR 401 southbound to 528 westbound on ramp			
Facility ID Nos:		8840376			
Database Listings/Sources:		Landfill, Tanks			
Historical Land Use		Banana River			
Current Land Use		Salt Marsh			
Contaminants		Petroleum Products and Hazardous Materials			
TANKS	U/A	Capacity (gal)	Content	Installed	Removed
4	A	150	Lube Oil	Unk.	Unk.
1	A	150	Other Non-Regulated	Unk.	Unk.
Discharge Date		N/A	Cleanup Date:	N/A	
		Soil		Groundwater	
Documented/ Known Impacts:		NO		NO	

PUBLIC RECORDS: The FDEP Map Direct website shows this location as a tank facility that is listed as the Canaveral landfill. The tank site contains a listing of several 150-gallon aboveground oil and lube tanks. The landfill has no available files and no contamination impacts are documented at this location. The 2005 and 2017 CSER reports did not identify this facility as being located at this location.

The area in the NW quadrant identified as Site 6 in the CSER appears, based on the historical aerial photographs, to have been created by "landfilling" of spoil material from the creation of the Canaveral Barge Canal and the Canaveral Lock back in the 1960's. The lubricant tanks listed by FDEP on this site were most likely associated with the heavy equipment used to fill, contour, and develop the Canaveral Port features in the NW quadrant. This would better describe the location than that of a typical refuse landfill one associates with the Landfill descriptor.

INTERVIEW INFORMATION: Ms. Maryann Civil of the Brevard County Department of Natural Resources and Mr. Bob Musser, Canaveral Port Authority Director of Environmental Plans & Programs, were not aware of a landfill at this location. Mr. Musser indicated that he believes this location has been a salt marsh for at least 30 years.

SITE OBSERVATIONS: This is an undeveloped parcel containing a salt marsh.

CONCLUSIONS: This location is a salt marsh. A mitigating factor is that the former location of the tanks is outside the Bridge Right-of-Way and is downslope of the project area. Migration of any spills or releases from the tanks would have been toward the northwest and the interior of Site 6, away from the Project. Based on the lack of documented contamination impacts, the distance from the proposed SR 401 improvements, and the migration path of any historical discharges being to the west, away from the Bridge Right-of-Way, this site has been assigned a CRR of **Low**.

Looking southwest at the salt marsh area on the northwest corner of the SR 528 and SR 401 interchange.

Table 2
Aerial Photograph Review Summary
SR 401 Bridge Replacement PD&E Study
FPID No. 444787-1-22-01
GEC Project No. 4808E
Page 1 of 1

Site No.	Site Name	Site Address	Year First Observed in Aerial Photographs	Comments
1	Cape Marina Services	800 Scallop Drive	1979	The Scallop Plant area is first developed in 1979.
2	Ocean Club at Port Canaveral	930 Mullet Road	2010	This marina was first visible in 2010.
3	New Port Marina	960 Mullet Road	1980	The first marina is visible in 1980 with the current buildings visible in 1993.
4	Unknown Release	990 Mullet Road	1993	The building is first visible in 1993.
5	Cruise Terminal B Garage	9155 Charles M. Rowland Drive	2010	A sea wall outline is visible in 1986 and subsequently filled and developed. A large parking area is visible 1999-2021. This parking garage was constructed prior to 2010.
6	Canaveral Landfill	Mullet Drive	1969	This area of salt marsh is visible from 1969-2021. No obvious land uses, driveway access, buildings, or "landfill activity" are visible at this location.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

APPENDIX B

Definitions of Common Report Terms

Aboveground Storage Tank (AST) - A storage tank that is situated on the ground surface and may or may not be installed on a concrete pad with secondary spill containment.

Active Remediation (AR) - Implementation of an approved Remedial Action Plan.

Contamination - The presence of any material or chemical contained within the soil, surface water, sediment, or groundwater on or adjacent to the project corridor, that may require assessment, remediation, or special handling, or that has a potential for liability.

Contamination Risk Rating (CRR) - Site risk rating system defined in Chapter 20 of the FDOT PD&E Manual.

Engineering Control (EC) - A modification to a site to reduce or eliminate the potential for migration of, and exposure to, contaminants of concern. Examples of ECs include slurry walls, sheet pile walls, and engineered liners to prevent exposure.

Hazardous Material - Any solid, liquid, or gas that has the potential to harm people, other living organisms, property, or the environment, either by itself or through interaction with other factors. Hazardous material may be radioactive, flammable, explosive, toxic, corrosive, biohazardous, an oxidizer, an asphyxiant, a pathogen, an allergen, or may have other characteristics that render it hazardous in specific circumstances. These materials may threaten workers through occupational exposure and the general public in their homes, communities, and general environment. Exposure to these materials can occur near the site of generation, along the path of its transportation, or near their ultimate disposal sites. Hazardous materials are often subject to laws and regulations on the use and handling of such materials and may differ depending on the activity or status of the material.

Institutional Controls (IC) - A restriction on use of, or access to, a site to eliminate or minimize exposure to contaminants of concern. Examples of ICs include deed restrictions, use restrictions, or restrictive zoning.

Natural Attenuation Monitoring (NAM) - A means of conducting site rehabilitation in which natural degradation of media contaminants are monitored for extended periods of time provided that human health, public safety, and the environment are protected.

No Further Action with Conditions (CNFA) - No further assessment or remediation is required at a site provided that certain conditions are met as approved by the lead regulatory agency. Conditional No Further Actions can be granted to sites that employ ICs and/or ECs as part of the site rehabilitation strategy.

No Further Action without Conditions (NFA) - No further assessment or remediation is required at a site. No contaminants are present at the site above default or approved alternative clean-up standards.

Petroleum Products - Liquid crude oil derivatives that are derived by distillation, cracking, hydro forming and/or other petroleum refinery processes falling under the description of either "Gasoline Analytical Group," "Kerosene Analytical Group" or "Used Oil" as defined in Florida Administrative Code (FAC) 62-770.200(24), (29) and (64), respectively. These materials include, but are not limited to: leaded and unleaded gasoline, gasohol, aviation and jet fuels, diesel fuel, kerosene, new or used motor oil, hydraulic fluid, and gear oil.

Potential Hazardous Material or Petroleum Contamination Site - A potential hazardous material or petroleum contamination site is a parcel of land upon which hazardous materials or petroleum products are produced, stored, accumulated, used, or disposed of. These sites typically include existing or former gasoline stations, dry cleaners, auto repair facilities, and other businesses where hazardous substances or petroleum product are present. The presence of hazardous substances and/or petroleum products does not mean that contamination is present, but merely indicates that the potential for contamination exists if the materials are not handled or disposed of properly.

Remedial Action Plan (RAP) - A plan that details a means by which contamination may be cleaned up.

Site Assessment Report (SAR) - Summarizes all tasks that were implemented pursuant to the Contamination Assessment.

Site Rehabilitation Complete Report (SRCR) - A report that describes that cleanup goals have been met.

Site Rehabilitation Completion Order (SRCO) - An order issued by the lead regulatory agency that approves the SRCR. No further assessment or remediation activities need to be conducted at the site once an SRCO has been issued unless a new release is discovered.

Source Removal (SR) - The removal of free petroleum product or excessively contaminated soil.

Underground Storage Tank (UST) - A storage tank that has been installed below the ground surface that may or may not contain secondary containment or leak detection systems. The FDEP has compiled several database lists that are useful in identifying potential sources of hazardous material or petroleum product contamination.

APPENDIX C

Contamination Risk Rating Descriptions

The contamination potential risk rating system was developed by FOOT and is included in Part 2, Chapter 20 of the PD&E Manual, dated July 1, 2020. The rating system incorporates four levels of risk:

1. **No** - A review of available information on the property and a review of the conceptual or design plans indicates there is no potential contamination impact to the project. It is possible that contaminants have been handled on the property. However, findings from the Level I evaluation indicate that contamination impacts are not expected.
2. **Low** - A review of available information indicates that past or current activities on the property have an ongoing contamination issue; the site has a hazardous waste generator identification (ID) number, or the site stores, handles, or manufactures hazardous materials. However, based on the review of conceptual or design plans and/or findings from the Level I evaluation, it is not likely that there would be any contamination impacts to the project.
3. **Medium** - After a review of conceptual or design plans and findings from a Level I evaluation, a potential contamination impact to the project has been identified. If there is insufficient information (such as regulatory records or site historical documents) to make a determination as to the potential for contamination impact, and there is reasonable suspicion that contamination may exist, the property should be rated at least as a "Medium". Properties used historically as gasoline stations and which have not been evaluated or assessed by regulatory agencies, sites with abandoned in place underground petroleum storage tanks or currently operating gasoline stations should receive this rating.
4. **High** - After a review of all available information and conceptual or design plans, there is appropriate analytical data that shows contamination will substantially impact construction activities, have implications to ROW acquisition or have other potential transfer of contamination related liability to the FDOT.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

RESEARCH SUMMARY

Contact: Lisa Messing

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by Geotechnical & Env. Cons., Inc were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDR's Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Search Results:**Coordinates:**

P.O.#	4808E	Latitude:	28.4055 28° 24' 20" North
Project:	SR 401	Longitude:	-80.6321 -80° 37' 56" West
		UTM Zone:	Zone 17 North
		UTM X Meters:	536036.68
		UTM Y Meters:	3142178.05
		Elevation:	13.87' above sea level

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527-21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

EXECUTIVE SUMMARY

TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL..... National Priority List
Proposed NPL..... Proposed National Priority List Sites
NPL LIENS..... Federal Superfund Liens

Lists of Federal Delisted NPL sites

Delisted NPL..... National Priority List Deletions

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY..... Federal Facility Site Information listing
SEMS..... Superfund Enterprise Management System

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal RCRA generators

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 09/13/2021 has revealed that there are 5 RCRA-SQG sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 09/13/2021 has revealed that there are 4 RCRA-VSQG sites within approximately 0.25 miles of the target property.

Lists of state and tribal landfills and solid waste disposal facilities

FL SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Department of Environmental Protection's Facility Directory (Solid Waste Facilities).

A review of the FL SWF/LF list, as provided by EDR, has revealed that there is 1 FL SWF/LF site within approximately 0.5 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

Lists of state and tribal leaking storage tanks

FL LUST: The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the Department of Environmental Protection's PCTO1--Petroleum Contamination Detail Report.

A review of the FL LUST list, as provided by EDR, and dated 07/23/2021 has revealed that there are 3 FL LUST sites within approximately 0.5 miles of the target property.

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting

EXECUTIVE SUMMARY

the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 09/13/2021 has revealed that there are 3 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
DISNEY CRUISE LINE T EPA ID:: FLR000043976	9150 CHRISTOPHER COL	N 0 - 1/8 (0.098 mi.)	C17	59

FL DWM CONTAM: A listing of active or known sites. The listing includes sites that need cleanup but are not actively being working on because the agency currently does not have funding (primarily petroleum and drycleaning).

A review of the FL DWM CONTAM list, as provided by EDR, and dated 09/01/2021 has revealed that there is 1 FL DWM CONTAM site within approximately 0.5 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
CANAVERAL PORT AUTHO Program Site Id: ERIC_12366	CRUIES TERMINAL NO 1	NNE 1/8 - 1/4 (0.167 mi.)	23	83

FL HW GEN: Small Quantity Hazardous Waste Generators are regulated under the federal Resource Conservation and Recovery Act (RCRA) and applicable state regulations as generators of hazardous wastes in quantities greater than 100 Kg but less than 1,000 Kg in any one calendar month. Large Quantity Generators of Hazardous Waste are tracked in this coverage based on their notification to the Department of Environmental Protection as to their handler status, or based on inspections conducted at their facilities. These facilities are regulated under the federal Resource Conservation and Recovery Act (RCRA) and applicable state regulations as generators of hazardous wastes in quantities equal to or greater than 1,000 Kg in any one calendar month.

A review of the FL HW GEN list, as provided by EDR, and dated 08/06/2021 has revealed that there are 5 FL HW GEN sites within approximately 0.25 miles of the target property.

F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F003

Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F005

Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: P001

Waste Description: 2H-1-BENZOPYRAN-2-ONE, 4-HYDROXY-3-(3-OXO-1-PHENYLBUTYL)-, & SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3% (OR) WARFARIN, & SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3%

Waste Code: P042

Waste Description: 1,2-BENZENEDIOL, 4-[1-HYDROXY-2-(METHYLAMINO)ETHYL]-, (R)- (OR) EPINEPHRINE

Hazardous Waste Summary:

Waste Code: D001
Waste Description: IGNITABLE WASTE

Waste Code: D006
Waste Description: CADMIUM

Waste Code: D008
Waste Description: LEAD

Waste Code: D009
Waste Description: MERCURY

Waste Code: D011
Waste Description: SILVER

Waste Code: F002
Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F003
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED

Waste Code: D024
Waste Description: M-CRESOL

Waste Code: D035
Waste Description: METHYL ETHYL KETONE

Waste Code: D039
Waste Description: TETRACHLOROETHYLENE

Waste Code: F002
Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F003
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F005
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: P001
Waste Description: 2H-1-BENZOPYRAN-2-ONE, 4-HYDROXY-3-(3-OXO-1-PHENYLBUTYL)-, & SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3% (OR) WARFARIN, & SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3%

Waste Code: P042
Waste Description: 1,2-BENZENEDIOL, 4-[1-HYDROXY-2-(METHYLAMINO)ETHYL]-, (R)- (OR) EPINEPHRINE

Waste Code: P081
Waste Description: 1,2,3-PROPANETRIOL, TRINITRATE (R) (OR) NITROGLYCERINE (R)

Click Here:

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Florida Environmental System Today Application (FIESTA) Data Maintenance (FDM) system maintains entity, environmental interest and affiliation data for the State of Florida.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Florida Environmental System Today Application (FIESTA) Data Maintenance (FDM) system maintains entity, environmental interest and affiliation data for the State of Florida.

Environmental Interest/Information System:

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Florida Environmental System Today Application (FIESTA) Data Maintenance (FDM) system maintains entity, environmental interest and affiliation data for the State of Florida.

Hazardous Waste Summary:

Waste Code:	D001
Waste Description:	IGNITABLE WASTE

Waste Code:	F003
Waste Description:	THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code:	F005
Waste Description:	THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. Florida Environmental System Today Application (FIESTA) Data Maintenance (FDM) system maintains entity, environmental interest and affiliation data for the State of Florida.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 10/20/2021	Source: EPA
Date Data Arrived at EDR: 11/05/2021	Telephone: N/A

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 10/20/2021	Source: EPA
Date Data Arrived at EDR: 11/05/2021	Telephone: N/A
Date Made Active in Reports: 11/29/2021	Last EDR Contact: 12/01/2021
Number of Days to Update: 24	Next Scheduled EDR Contact: 01/10/2022
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 10/20/2021

Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Data Release Frequency: Quarterly

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 10/20/2021	Source: EPA
Date Data Arrived at EDR: 11/05/2021	Telephone: 800-424-9346

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 09/13/2021	Source: Environmental Protection Agency
Date Data Arrived at EDR: 09/15/2021	Telephone: (404) 562-8651

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 09/13/2021	Source: Environmental Protection Agency
Date Data Arrived at EDR: 09/15/2021	Telephone: (404) 562-8651

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 09/13/2021	Source: Environmental Protection Agency
Date Data Arrived at EDR: 09/15/2021	Telephone: (404) 562-8651
Date Made Active in Reports: 10/12/2021	Last EDR Contact: 09/15/2021
Number of Days to Update: 27	Next Scheduled EDR Contact: 01/03/2022

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

State and tribal institutional control / engineering control registries

ENG CONTROLS: Institutional Controls Registry

The registry is a database of all contaminated sites in the state of Florida which are subject to engineering controls. Engineering Controls encompass a variety of engineered remedies to contain and/or reduce contamination, and/or physical barriers intended to limit access to property. ECs include fences, signs, guards, landfill caps, provision of potable water, slurry walls, sheet pile (vertical caps), pumping and treatment of groundwater, monitoring wells, and vapor extraction systems.

Lists of state and tribal brownfield sites

BSRA: Brownfield Site Rehabilitation Agreements Listing

The BSRA provides DEP and the public assurance that site rehabilitation will be conducted in accordance with Florida Statutes and DEP's Contaminated Site Cleanup Criteria rule. In addition, the BSRA provides limited liability protection for the voluntary responsible party. The BSRA contains various commitments by the voluntary responsible party, including milestones for completion of site rehabilitation tasks and submittal of technical reports and plans. It also contains a commitment by DEP to review technical reports according to an agreed upon schedule. Only those brownfield sites with an executed BSRA are eligible to apply for a voluntary cleanup tax credit incentive pursuant to Section 376.30781, Florida Statutes.

BROWNFIELDS AREAS: Brownfields Areas Database

A "brownfield area" means a contiguous area of one or more brownfield sites, some of which may not be contaminated, that has been designated as such by a local government resolution. Such areas may include all or portions of community redevelopment areas, enterprise zones, empowerment zones, other such designated economically deprived communities and areas, and Environmental Protection Agency (EPA) designated brownfield pilot projects. This layer provides a polygon representation of the boundaries of these designated Brownfield Areas in Florida.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Data Release Frequency: Varies

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

FL Cattle Dip. Vats: Cattle Dipping Vats

From the 1910's through the 1950's, these vats were filled with an arsenic solution for the control and eradication of the cattle fever tick. Other pesticides, such as DDT, were also widely used. By State law, all cattle, horses, mules, goats, and other susceptible animals were required to be dipped every 14 days. Under certain circumstances, the arsenic and other pesticides remaining at the site may present an environmental or public health hazard.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Version Date:	2018

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General WSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
12009C0345G	FEMA FIRM Flood data
<u>Additional Panels in search area:</u>	<u>FEMA Source Type</u>

12009C0363G	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
COURTENAY	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era: Cenozoic
System: Quaternary
Series: Holocene
Code: Qh (decoded above as Era, System & Series)

GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: PALM BEACH

Soil Surface Texture: sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: LOW

Depth to Bedrock Min: > 60 inches

Depth to Bedrock Max: > 60 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	4 inches	sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand.	Max: 20.00 Min: 20.00	Max: 8.40 Min: 7.40
2	4 inches	80 inches	sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand.	Max: 20.00 Min: 20.00	Max: 8.40 Min: 7.40

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: fine sand
muck

Surficial Soil Types: fine sand
muck

Shallow Soil Types: No Other Soil Types

Deeper Soil Types: fine sand
coarse sand
muck

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

APPENDIX G

FDEP Database List

The FDEP databases used for this study and their common abbreviations are listed below.

- Florida's State Funded Action Sites (SHWS),
- Florida Sites List – (FL Sites),
- State Brownfield Sites Listing (Brownfields),
- Cattle Dip Vats (CDV),
- Ethylene Di-Bromide Database (EDB),
- Dry Cleaners (DRYCLEANERS),
- Priority Cleaners (PRIORITY CLEANERS),
- Dry Cleaning Solvent Program Cleanup Sites (SCRD DRYCLEANERS),
- State & Federal Institutional Controls Registry (ENG CONTROLS),
- State & Federal Institutional Controls Registry (INST CONTROLS),
- Voluntary Cleanup Priority Listing (INDIAN VCP),
- Voluntary Cleanup Sites (VCP),
- Historical Dry Cleaners (EDR HIST CLEANERS),
- Leaking Aboveground Storage Tank Listing (LAST),
- Leaking Underground Storage Tank Listing (LUST),
- Leaking Underground Storage Tanks on Indian Land (INDIAN LUST),
- Underground Storage Tanks on Indian Land (INDIAN UST),
- National Pollution Discharge Elimination System Facilities (NPDES),
- Oil and Hazardous Materials Incidents (SPILLS, SPILLS 80, SPILLS 90),
- Solid Waste Facilities (SWF),
- Underground Storage Tanks (UST),
- Aboveground Storage Tanks (AST),
- Underground Injection Control Wells (UIC),
- Voluntary Cleanup Sites (VCS), and
- NPL and State Funded Waste Cleanup Sites (NPL).

Information regarding the date the databases were last updated are included within the EDR Corridor Report provided in **Appendix F**. Descriptions of the above-listed Florida databases and information sources are also provided in the EDR report.

APPENDIX H

Federal Database List

Federal databases have been compiled for identifying potential sources of hazardous materials contamination. The databases used for this evaluation include:

- Aerometric Information Retrieval System I Air Facility Subsystem (AIRS),
- Clandestine Drug Laboratory Locations (CDL),
- National Clandestine Laboratory Register (HIST CDL),
- Comprehensive Environmental Response, Compensation & Liability Information System (CERCLIS),
- Delisted National Priorities List (DELISTED NPL),
- Comprehensive Environmental Response, Compensation & Liability Information System No Further Remedial Action Planned (CERC-NFRAP),
- Comprehensive Environmental Response, Compensation & Liability Information System Lien Information (LIENS 2),
- Superfund (CERCLA) Consent Decrees (CONSENT),
- Corrective Action Report (CORRACTS),
- Incident and Accident Data (DOT OPS),
- Engineering Controls Site List (US ENG Controls),
- Sites with Institutional Controls (US INST Controls),
- Land Use Control Information System (LUCIS),
- Federal Facility Site Information Listing (Federal Facility),
- Emergency Response Notification System Facility Registry System (ERNS),
- Hazardous Materials Incident Reporting System (HMIRS),
- Open Dump Inventory (ODI),
- Recycling Centers (SWRCY),
- Government Archives LUST (RGA LUST),
- DWM Contaminated Sites (DWM CONTAM),
- Resource Conservation & Recovery Act- Large Quantity Generators (RCRA - LQG),
- Resource Conservation & Recovery Act- Small Quantity Generators (RCRA - SQG),
- Resource Conservation & Recovery Act- Generator Conditionally Exempt Small Quantity Generator Facilities (RCRA-CESQG),
- Resource Conservation & Recovery Act- Non- Generator Facilities (RCRA Non Gen),
- Resource Conservation & Recovery Act- Treatment, Storage & Disposal Facilities (RCRA-TSDF),
- Toxic Substance Control Act Inventory (TSCA),
- Open Dump Inventory On Tribal Lands (INDIAN ODI),
- Indian Reservations (INDIAN RESERV),
- Department Of Defense Sites (DOD),
- Formerly Used Defense Sites (FUDS),
- National Priorities List (NPL),
- Proposed National Priorities List (Proposed NPL),

- National Priorities List Liens (NPL Liens),
- Delisted National Priorities List (Delisted NPL),
- Resource Conservation & Recovery Act-Corrective Action Facilities (CORRACTS), and
- Record of Decision System (ROD).

Information regarding the date the databases were last updated are included within the EDR Corridor Report provided in **Appendix F**. Descriptions of the above-listed federal databases and information sources are also provided in the EDR report.

Areas of Concern:

Type: Area of Concern
Rule: 62-762.601(1)(d), 62-762.601(1)(g), 62-762.602(1)(d), 62-762.602(1)(g)
Violation Text: Release detection not tested or visually inspected once a month or problems found during the visual inspections not recorded.
Explanation: No records of checking the tank monitor.
Corrective Action: Electronic release detection devices shall be inspected for proper operation at least once every calendar month, but not exceeding 35 days. A record or summary of the alarm history, sensor status, and testing results related to suspected releases shall be printed from any electronic release detection device. If the release detection system is not capable of printing records, a manual log shall be maintained of the alarm history, sensor status, and testing results.

Type: Area of Concern
Rule: 62-762.601(7), 62-762.602(7)
Violation Text: Annual operability testing of release detection systems not completed.
Explanation: Testing the overfill sensors, interstitial sensors, line leak detectors was completed after the FDEP compliance inspection. Do not wait until the FDEP compliance inspection to

schedule your required annual tests. They must be completed once a year and recorded.

Corrective Action: Annual operability testing of release detection systems. All release detection devices shall be tested annually at intervals not exceeding 12 months to ensure proper operation. The test must either simulate an actual alarm condition or shall be conducted according to manufacturer's specifications, and shall include, at a minimum, a determination of whether the device operates as designed. Remote testing of the system can be performed by the manufacturer if the remote test is included in the third-party certification by a Nationally Recognized Testing Laboratory.

Inspection Comments

10/28/2021

Facility consists of two vertical double-walled steel ASTs. Tank 1R1 is 10,000 gallon capacity and contains gasoline (equipped with a Morrison Brothers clock gauge). Tank 2R1 is 20,000 capacity and holds diesel fuel (equipped with a metal tape-measure float gauge). Both tanks have above ground steel piping transitioning to double-walled fiberglass underground to nearby dispensers at the docks. There is a visual monitoring port for each product double-wall piping near the tanks. Inline leak detectors are installed just upstream of the view ports. I inspected the tanks, vents, overfill and spill containment, interstitial monitor points, sensors, leak detectors, dispensers liners, hose reels and hoses. The tank exteriors have been recently touched up. The piping interstitials and dispenser liners were clean and dry. There is a spill - SPCC plan on site. The facility provided the appropriate records for this inspection. Your dispenser sumps need a breach of integrity test by January 31, 2022 (every three years). The current registration placard was posted in the marina office.

A reminder for your routine compliance storage tank inspection (~ every two years): Post current storage tank registration placard "in plain view". Monitor the tank system sensors monthly and record your observations (check the tank monitor, control panel once a month and log that it is not in alarm). Conduct monthly visual inspections (look at tank exterior for rusting, look in fill bucket, dispenser sumps and check product hoses, etc.) and also record. You are required to annually test your interstitial sump (aka basin rupture), high-level sensors and line leak detectors to prove their functionality. Log your results. You are also required to hydrostatically test (breach of integrity) your dispenser sumps once every three years. Log your results. You are required to maintain financial responsibility on the storage tank, namely: "For a storage tank system with a capacity greater than 550 gallons and less than or equal to 10,000 gallons, the demonstration of financial responsibility for corrective action and third-party liability shall be a minimum of \$500,000 per incident and \$1 million annual aggregate." These records (as noted above) need to be made available to this office during your routine compliance storage tank inspection.

JERRY SEAMAN
OWNER
CAPE MARINA
800 SCALLOP DR.
CAPE CANAVERAL, FL 32920-4510

Dear MR. SEAMAN:

The Brevard County Office of Natural Resources Management is currently contracting with the Florida Department of Environmental Protection to inspect all regulated petroleum and hazardous materials storage facilities and systems within Brevard County for compliance with Chapter 62-762, Florida Administrative Code, the stationary tank rule. In addition, the Office is performing Discharge Prevention and Response inspections at terminal facilities under the authority of section 376.07, Florida Statutes. We will be inspecting your facility, CAPE MARINA, located at 800 SCALLOP DR., CAPE CANAVERAL, during the week of 10/2/2005 to determine its compliance with the laws governing stationary tanks.

In order that we may conduct the inspection in a timely manner, please have the attached items available at your facility, in addition to all relevant documents for the terminal facility inspection. Our representative will present appropriate identification at the time of inspection. **Please call to set up a specific time for the inspection** and advise your employees of our intended visit to prevent any potential confusion or problems. If you have any questions concerning this inspection please contact the undersigned at (321) 633-2017.

Respectfully,
The Brevard County Natural Resources Management Office

Complaint

Dear Mr. Seaman:

On April 24, 1995 your facility was visited by myself and Debbie Valin in response to a complaint that our office received pertaining to improper disposal of material generated during the sand blasting operation. A waste determination is required on the waste generated from the sandblasting operation in order to insure proper disposal. This can be accomplished through generator knowledge or through testing. The waste generated must also be contained to prevent any releases to the environment.

As a courtesy, we toured the facility with Mike Legge, Operations Manager, and pointed out other areas of concern that should be addressed by the facility, in order to be in compliance with hazardous waste regulations, prior to future inspections. Enclosed are copies of the "Small Quantity Generators" handbook along with a "Summary of Hazardous Waste Regulations" which should answer most of the questions you may have.

If you have any additional questions please contact me, Chris Aoussat, Hazardous Waste Section at (407) 894-7555 ext. 2281 or Debbie Valin in our Melbourne office at (407) 984-4800.

Sincerely,

Chris Aoussat
Engineer
Hazardous Waste Section

Violations:

Type:	Violation
Significance:	Minor
Rule:	62-761.500(6)(b)
Violation Text:	Piping sumps not installed to allow for release detection.
Explanation:	Ethanol free gasoline STP sump needs to be rebuilt.
Corrective Action:	Contract with a licensed storage tank contractor and have the STP sump repaired. A

new fiberglass sump will probably have to be installed. Hydrostatically test sump tightness.

Type:	Violation
Significance:	Minor
Rule:	62-761.600(1)(f), 62-761.600(1)(f)1.
Violation Text:	Release detection not installed, operated, and maintained per manufacturer's instructions and standards.
Explanation:	During the last compliance testing (20May21), Valley Tank Testing showed that the two interstitial and the two STP sump sensors were not functional. The test of the Omntec failed. The diesel tank overfill prevention device also failed.
Corrective Action:	Have all four of these sensors replaced. Retest sensors. Monthly visually inspect STP sumps and both tank's interstices.
	Repair / replaced diesel tank overfill prevention device.

On site at about 9:00 AM.

Inspection Comments

06/09/2021

Looked in the following tank spaces: 2 STP sumps, 2 ATG - INT vaults, 2 vapor recovery vaults and the 2 single wall fill buckets (all tank top). All OK, except for the gasoline STP (submersible turbine pump) sump. A fully loaded ice truck happened to park on top of the sump lid, and fell right through it. The sump lid has been replaced, but the STP sump itself remains to be rebuilt. The Release Detection for that tank-top pump depends on that liquid tight sump. Also looked in all 3 dock piping sumps (2 elbow and 1 straight away) and 4 under dispenser liners- All OK. No product or petroleum contaminated water found.

NOTE: the product piping to the western transition sump (patio) and the two dispensers (Scorpion) has been secured and no longer being used. The product lines valves are closed and electricity has been turned off to that portion of the tank system.

Checked OmnTec tank monitor - all sensors are normal. The Omntec currently monitors seven sensors: the 2 tank interstitial, 2 STP sump, the western patio transition sump and 2 shore side under dispenser pans. Another OmnTec monitor is located in the shed at the end of the floating dock and it monitors the four under dispenser flat sensors out there.

The current placard is displayed "in plain view". All paperwork was in order. Operator certificates (AB&C) were also provided.

A copy of this inspection report will be emailed to the facility point of contact as soon as possible.

04/23/2008

Piping inspection - found 50 psi on all primary piping, and about 3 psi on all secondary piping. This piping inspection concerned the dock piping. Pressure is on the piping from the STPs to the shear valves. Informed that FE Petro STPs have an anti-siphon valve integral to the pump. I told Mike that I need a written statement from FE Petro to that effect.

08/21/2007

Tanks now backfilled to tank top, vacuum is still on both interstices.

08/17/2007

Tanks installed. Interstitial vacuum maintained throughout. Tanks secured to deadmen with factory rigging, strapping, etc. Excavation is being backfilled with clean pea gravel. Again, more photographs taken.

08/15/2007

Tank excavation has been dug. The excavation is terraced (stepped) down in lieu of sheet piling. Photos taken, well point system is in place and is providing adequate dewatering. Photos taken. All tank and tank system work is by Petroleum Marine Consultants LLC of West Palm Beach/Fort Myers (PCC056756).

08/02/2007

2 Elutron fiberglass clad steel tanks had been delivered to site. One was a 16k gallon UST and the other is a 10K gallon UST. Both had been shipped with 24 inches of Hg vacuum on them. Several photographs taken, showing tanks details, tank data and the interstitial gauges (still holding vacuum after delivery).

Inspection Comments

01/08/2008

Piping inspection - found 50 psi on all primary piping, and about 3 psi on all secondary piping. The plumbing was ball valved shut in the transition sump, but additional gauges were installed between the sump and the 2 under dispenser liners. Positive pressure has been on the system since Saturday 1.5.08. Likewise water was introduced into all 6 sumps Saturday and their levels marked with blue spray paint. No noticable drop in water level - pass hydrostatic test on three stp sumps, two under dispenser liners and one thransition sump. Spoke with installer about valving - since the dock dispensers will be lower than the bottom of the USTs. Gave Mike the appropriate FDEP memo, NFPI page and 62-761 passage. Will await their decision.

Good Afternoon Kathleen – sorry About the delay in getting back to you...

I am very familiar with New Port Marina – but it no longer exists however. I conducted the closure report in March of 2008. They had two ASTs that were removed from site, along with its piping and dispensers. I have attached my closure report. The facility "Ocean Club at Port Canaveral" now occupies the property. They are not related to the previous operators (New Port) in any way. Two giant "high-stack" sheds are all that is left of the old New Port Marina. I also attached my installation report f90r the 2 USTs at Ocean Club.

Hi There!

I was wondering if you could find some information out about facility ID #8501220. This facility has not made a payment since 2002. Customer "New Port Marina"-owner states that this facility was sold back in 2002. We currently still have New Port Marina listed as the owner and have sent them to Collections for payment. (we have never been informed of a new owner). Can one of you pay this site a visit and let us know who the new owners are, if there are any so we can get the old owner out of collections?

Inspection Comments

01/08/2021

Facility is a 1800 gallon double walled steel Phoenix AST containing diesel fuel. Tank is a basin "belly" tank feeding an above mounted emergency generator. A copy of the current registration placard was provided. All paperwork is up to date and in order (annual tests and visual inspection records). Visually inspected all portions of the tank and associated equipment - all in are good condition. Checked all fills, vents and piping - all OK. Annual operability test refers to a functioning test of the interstitial sensor. Pressed lamp test button, panel did light up: OK.

A copy of this inspection report will be emailed to the Port Authority as soon as it is closed.

This facility is exempt from the annual overfill prevention / high-product level annual testing requirement. The tank is filled via hose and nozzle and is NOT a "tight fill". During the transfer operation, the product level is continually monitored.

Good Morning Richard –

I have no information on the former landfill location – have you checked with Bob Musser with Canaveral Port Authority? As the Director of Environmental Programs, he may have some information. Let me know if need his contact information.

Maryann

Hi Maryann, Doug,

We are currently doing a contamination report for the SR 401 Bridge Replacement PD&E Study.

The FDEP Map Direct web site shows a tank at the "Canaveral Landfill" on the NW quadrant of the SR 401 and SR 528 interchange. I thought the landfill was on the south side of the George King Blvd and SR 528 interchange as shown on the attached figure.

Can you help clarify this? And is there any contamination associated with the landfill?

Thanks!

Merry Christmas!
