PROJECT DESCRIPTION

The Florida Department of Transportation is making intersection improvements on U.S. 1 at East Strawbridge Avenue (U.S. 192), East Hibiscus Boulevard and Ballard Drive/Babcock Street.

These Melbourne intersections will see upgrades from the current traffic signal system of poles and cables, to a larger single-pole system with an extended arm, referred to as a mast arm system. Other project improvements include the addition of a westbound, right-hand turn lane at the intersection of U.S. 1 and East Strawbridge Avenue. Americans with Disabilities Act-compliant sidewalk curb-ramp upgrades, signing, and pavement marking modifications are also included in the improvements.
