Gulf Atlantic Highway (State Road (S.R.) 44) between Main Street (U.S. 301) and Legion Avenue

JOIN US FOR A PUBLIC HEARING ON WEDNESDAY, MARCH 27, 2019

Wildwood Community Center – Jefferson Room, 6500 Powell Rd., Wildwood, FL 34785

The Florida Department of Transportation (FDOT) is proposing to improve safety and traffic operations on Gulf Atlantic Highway (S.R. 44) between Main Street (U.S. 301) and Legion Avenue. These improvements are recommended based on a safety study conducted in October 2018. The proposed improvement consists of two phases of construction, interim works and long-term improvements.

PROPOSED INTERIM IMPROVEMENT

The interim improvement consists of the installation of “Quick-Curb” with delineator posts east of the Main Street intersection as shown below. This work is anticipated to take place in late 2019/early 2020.

PROPOSED LONG-TERM IMPROVEMENT

The proposed long-term improvements involve the construction of an additional westbound left turn lane at the Main Street intersection and construction of a concrete median from Main Street to west of Legion Avenue, with a bi-directional opening at the Wildwood Townhomes area as shown below. This type of median opening allows left turns from Gulf Atlantic Highway into the driveways, but will only allow right turns out of those driveways. Construction of the long-term improvements is expected to begin in early 2022 as part of a resurfacing project.

A court reporter will be present to record proceedings, and assist with comments, as part of the project record. Written comments can be submitted at the hearing, sent by mail to Dave Mixon, at the address shown to the right, no later than Monday, April 8, 2019. All written and oral comments will become part of the project’s public record.
