

Concept Development & Evaluation

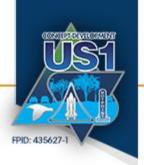

Project Update

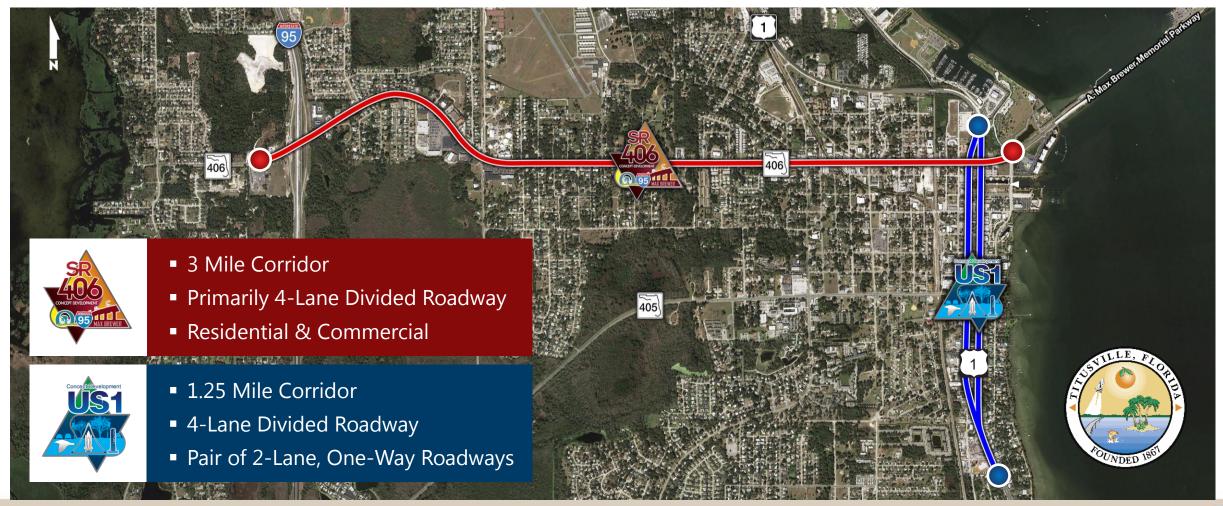

October 2018

Regional Context

Project Background

Studies Requested by City of Titusville

Purpose: Provide **improved multimodal mobility**, with consistent roadway design that will **enhance safety and connectivity** while supporting economic and community development goals.

Project Background

Corridor Planning Studies

- Studies began in January 2015
- Public Meeting in February 2016 presented the potential alternatives
- Studies completed in September 2016 producing the original alternatives to be advanced into the next phase

Project Background

Concept Development and Evaluation Studies

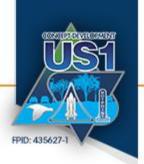

- Began in June 2017
- Refining original alternatives from planning studies into proposed alternatives

Original Planning Studies Alternatives

S.R. 406

- Median Improvements throughout the S.R. 406 corridor
- Addition of bike lanes throughout the S.R. 406 corridor
- Lane Modification along S.R. 406, from Dixie Avenue to Indian River Avenue
- Roundabout at Singleton Avenue & S.R. 406

U.S. 1

- Roundabout at U.S. 1 & S.R. 406
- Roundabout at U.S. 1 & Grace Street (did not move forward during the current study)

Proposed Alternative Not Moving Forward:

U.S. 1 & Grace Street Roundabout

During the Concept Development and Evaluation Studies this roundabout was removed from the Proposed Alternatives.

Will **NOT** move forward due to:

- Low side-street volume
- Low benefit-cost ratio
- Potential of significant business relocation costs

Future Conditions: No Build

Roadway Operations & Safety Needs

Roadway Capacity

 Corridor expected to operate at an acceptable level in 2040 without any changes

Safety Needs

- Reduction in number of median openings
- Reduction in number of intersection crashes

Median Improvements and Addition of Bike Lanes

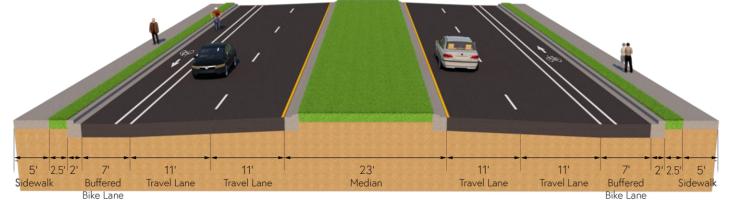

Removal of on street parking

Reduction of travel lane width

- Addition of buffered bicycle lanes
- Widen raised median
- **Reduce** the number of openings
- **Maintain** existing sidewalks, curb, and right of way

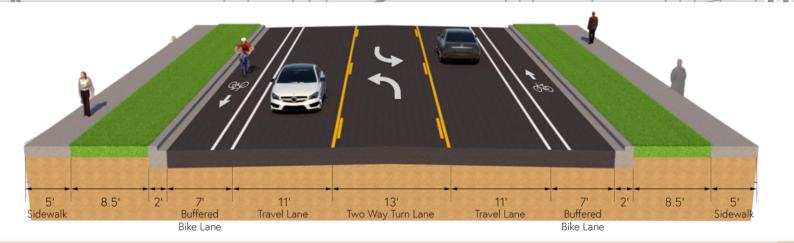

SINGLETON-AVE DIXIE AVE HOPKINSS AVE REC

Proposed Changes

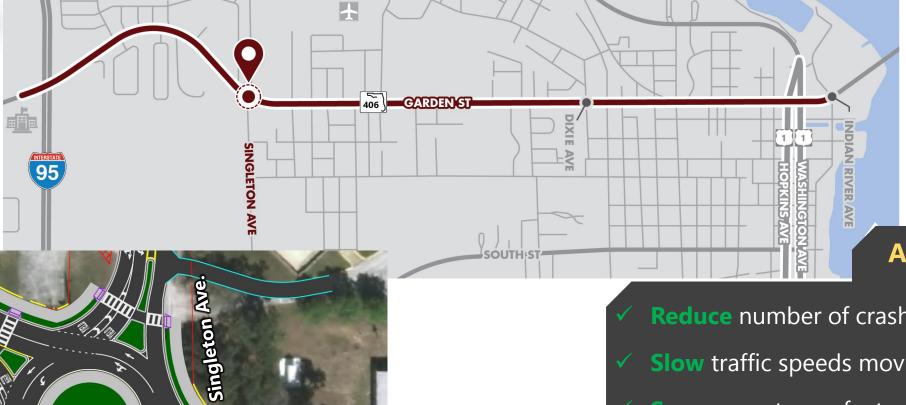

- Reduce typical section from 5lanes to 3-lanes: 2 travel lanes and 1 center turn lane
- Reduction of travel lane width
- Addition of buffered bicycle lanes
- Reduction of overall roadway width

Roundabout: S.R. 406 at Singleton Avenue

Anticipated to:

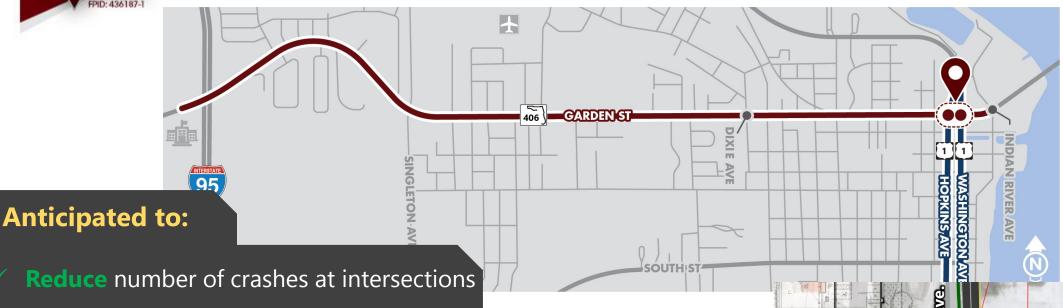

- **Reduce** number of crashes at intersection
- Slow traffic speeds moving into downtown
- Serve as gateway feature into downtown
- **Improve** traffic operations
- Provide an estimated savings over the life of the project of:
 - \$6.2 million in crash cost reduction
 - \$1.1 million in delay reduction savings

Roundabout: S.R. 406 at U.S. 1

Both intersections (Hopkins Avenue and Washington Avenue)

- Reduce number of crashes at intersections
- **Slow** traffic speeds moving into downtown
- **Serve** as gateway feature into downtown
- **Improve** traffic operations
- Provide an estimated savings over the life of the project of:
 - \$8.7 million in crash cost reduction
 - \$2.1 million in delay reduction savings

Roundabout: S.R. 406 at U.S. 1

Removes closely spaced signalized intersections

Final Recommendations

Summary

- Median Improvements throughout the S.R. 406 corridor
- Addition of bike lanes throughout the S.R. 406 corridor
- Lane Modification along S.R. 406 from Dixie Avenue to Indian River Avenue
- Roundabout at Singleton Avenue and S.R. 406
- Roundabout at S.R. 406 and U.S. 1

Stakeholder & Local Outreach

Project Visioning Team (PVT)

 PVT meetings held on November 8, 2017 & June 27, 2018

Public Meeting

- Present study findings, recommendations, and receive feedback
- Held on September 20, 2018

Next Steps

Development Phase
December 2018

Present findings to
Titusville City Council
And Space Coast TPO
October 2018

Public Comment and Response Period September 2018

Concept Development Phase

Design Phase

Right of Way Phase

Construction Phase

Planning Phase
