

U.S. 1 at Matanzas Woods Parkway

Flagler County

Financial Project Identification (FPID) No.: 437595-1

Project Description

The Florida Department of Transportation (FDOT) is constructing a roundabout at the intersection of U.S. 1 and Matanzas Woods Parkway in Palm Coast. The roundabout will maintain two lanes of traffic in each direction on U.S. 1, and will provide two lanes from Matanzas Woods Parkway onto U.S. 1 from both sides of the intersection. There will be one lane onto Matanzas Woods Parkway exiting the roundabout.

Other improvements include drainage, highway lighting, landscaping, sidewalks and crosswalks for pedestrians and bicyclists moving through the intersection.

What to Expect

Construction will require traffic on U.S. 1 to be reduced to one lane in each direction through the intersection, as well as detours. During Phase I, Matanzas Woods Parkway will be closed at U.S. 1 throughout construction of the outside lanes of the roundabout. This phase is expected to take about four to five months.

In Phase 2, as the inside lanes of the roundabout are built, Matanzas Woods Parkway will be open to right-in, right-out traffic on the east side of U.S. 1. In that phase, traffic will be able to turn from northbound U.S. 1 onto Matanzas Woods Parkway, and from Matanzas Woods Parkway to northbound U.S. 1. Other movements will be detoured. This phase is expected to last about four months.

Electronic message boards and other signage will be used to alert motorists of closures and detours.

Fast Facts

Contractor:
P&S Paving Inc.

Project Cost:
\$2.6 million

Project Start:
August 2019

Estimated Completion:
Summer 2020
