

Resurfacing State Road (SR) A1A from South of Sherry Lee Lane/36th Street to North of Sunflower Street and SR A1A Southbound One Way Pair to Atlantic Avenue

Project Financial No: 430667-1-52-02

Project Details

The Florida Department of Transportation is repairing nearly seven miles of State Road (SR) A1A in Cocoa Beach.

Awarded to Masci General Contractors Inc., the \$5.4 million project includes the milling and resurfacing of northbound SR A1A (North Atlantic Avenue) from south of Sherry Lee Lane/36th Street (just north of Patrick Air Force Base housing) to north of Sunflower Street, and southbound Orlando Avenue from north of Sunflower Street to north of South 21st Street.

Seventeen “bulb-out” features are planned for the downtown Cocoa Beach area. In addition to providing a traffic calming effect, these enhanced curb features near parking areas may be utilized in the future for landscaping.

Throughout the project, new sidewalk construction will fill in gaps between existing sidewalks to create sidewalk continuity, with the exception of the right of way between Seventh Street and Sixth Street on the east side of Orlando Avenue. Improvements also include drainage enhancements, minor traffic signal upgrades, and crosswalks and side street curbs constructed to comply with the Americans with Disabilities Act (ADA).

Property owners along the project where sidewalks are to be constructed are advised to cap or relocate irrigation heads within the right of way prior to construction. The contractor will coordinate with affected property owners in advance of construction work.

Project Timeline

The roadway improvement project is expected to start in mid-September and last about a year. Concrete work will precede paving. Paving is expected to start in early 2017.

Lane Closure Restrictions

Expect daytime and nighttime lane closures. Access to businesses will be maintained during business hours.

FAST FACTS

Total Cost: **\$5,357,590**

Estimated Completion: **Early fall 2017**
