

BRIDGE REPLACEMENT

U.S. 1 (S.R. 5) over Pellicer Creek

Flagler County

Financial Project
Identification
(FPID) No.:
447118-1

PROJECT DESCRIPTION

The Florida Department of Transportation (FDOT) is replacing the northbound and southbound U.S. 1 bridges over Pellicer Creek at the Flagler County/St. Johns County line. The purpose of the project is to provide modern bridges that ensure continued safety and efficient travel along U.S. 1 in this area. The new bridges will maintain similar clearance over Pellicer Creek, and their openings will be wider than the existing ones.

Additional improvements include reconstructed bridge approaches, minor drainage enhancements, and improved bicycle accommodations featuring 5-foot paved outside shoulders along the roadway and 10-foot outside shoulders on the bridges.

WHAT TO EXPECT

The bridges will be constructed in phases so that at least one travel lane in each direction of U.S. 1 remains open at all times. During construction, the northbound bridge will be closed, and traffic in both directions will be shifted onto the southbound bridge. Once the new northbound bridge is complete, all traffic will be shifted to it while the existing southbound bridge is closed for replacement. Due to the limited width of the existing bridge, the outside shoulders will be temporarily reduced to 1 foot during traffic shift operations. Two access points on the north side of the bridge will temporarily have restricted movement at the existing full-median opening. The southbound access point serving Pellicer Creek Campground will remain accessible, including accommodations for trailers.

The existing posted speed limit of 65 mph will be reduced to 45 mph throughout construction. Pellicer Creek will be monitored for boat traffic during active work periods. Above-water construction activities will temporarily cease until boat traffic has cleared the work area.

For the most current project details and lane closure information, please visit FDOT's Central Florida website at www.cflroads.com.

CONTRACTOR

C.W.R Contracting, Inc.

PROJECT COST

\$12.6 million

PROJECT START

May 2026

ESTIMATED COMPLETION

Fall 2027
