

Clyde Morris Boulevard (S.R. 483) Improvements from Beville Road (S.R. 400) to north of Dunn Avenue Volusia County

Financial Project Identification (FPID) No.: 448773-1

Project Description

The Florida Department of Transportation (FDOT) is proposing improvements along Clyde Morris Boulevard (State Road (S.R.) 483) from Beville Road (S.R. 400) to north of Dunn Avenue in Daytona Beach. The goal of the project is to create a complete street that safely accommodates pedestrians, bicyclists, and drivers.

This project includes safety enhancements for all modes of transportation. A raised median with landscaping throughout the project limits will improve safety for drivers and encourage slower driving speeds.

Pedestrians and bicyclists will benefit from work to create continuous sidewalks on both sides of the roadway that will vary from 6 to 12 feet wide as right of way allows. To enhance connectivity across the roadway, a pedestrian tunnel is planned that would run under Clyde Morris Boulevard, just north of the Embry-Riddle Aeronautical University entrance. Existing crosswalks will also be improved.

Another improvement for bicyclists is a proposed new on-street bicycle lane from north of Aerospace Boulevard to Buccaneer Way. Additional safety improvements include enhanced lighting, roadway paving, and upgraded curb ramps to comply with the Americans with Disabilities Act (ADA) standards.

**Clyde Morris Boulevard
north of Aeronautical Boulevard**

**Clyde Morris Boulevard
looking south to Beville Road**

Project Status and Estimated Costs*

Design:	Ongoing - completion spring 2023	\$	3.3 Million
Right of Way:	Within existing		—
Construction:	Unfunded	\$	19 Million

*subject to change
