

North Orange Avenue (S.R. 527) Improvements from Magnolia Avenue to North of Rollins Street

Orange County

Financial Project Identification (FPID) No.: 445220-1

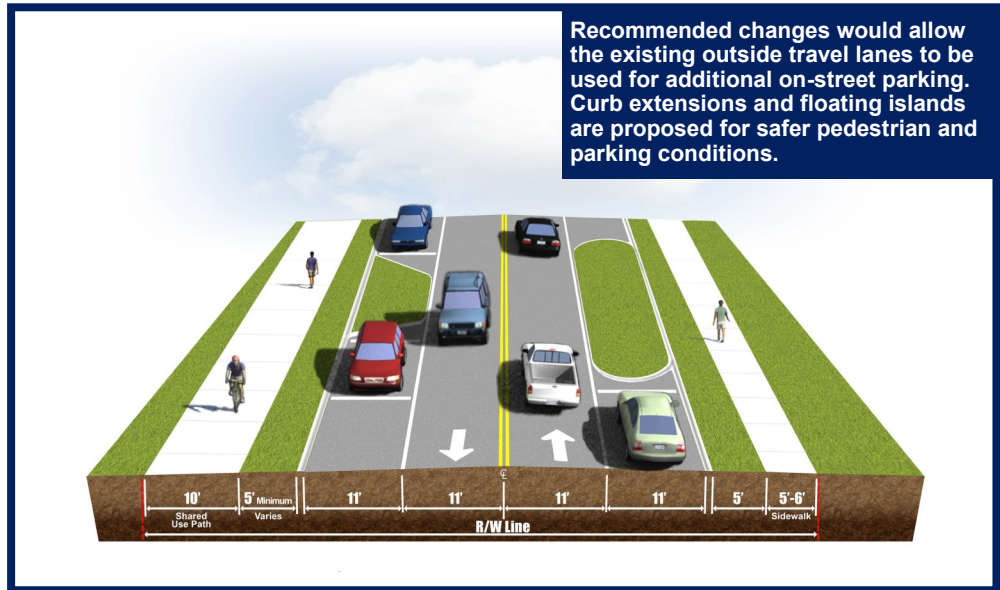

Project Description

The Florida Department of Transportation (FDOT) is planning safety and operational improvements along North Orange Avenue (State Road (S.R.) 527) from Magnolia Avenue to north of Rollins Street in the City of Orlando.

The project proposes to convert the existing outside travel lanes into on-street parking from Magnolia Avenue to north of Ivanhoe Boulevard. This improvement will provide safer parking while maintaining acceptable traffic flow.

The project also recommends pedestrian crossing enhancements such as raised crosswalks and raised intersections at carefully chosen locations along the corridor. Other proposed safety improvements include the addition of curb extensions and floating islands to shorten pedestrian crossing distances and to define existing on-street parking. These changes intend to enhance safety for both motorists and pedestrians by reducing travel speeds along the corridor.

Additionally, this segment of North Orange Avenue will be repaved to extend the life of the existing roadway. Drainage modifications, traffic signal improvements, new signage and pavement markings, and sidewalk curb ramp reconstruction to comply with Americans with Disabilities Act (ADA) requirements are also planned. To further enhance pedestrian safety, lighting upgrades are also proposed at the existing signalized crosswalks.

Project Status and Estimated Costs*

Design:	Ongoing - completion fall 2023	\$ 1 Million
Right of Way:	Within existing	--
Construction:	Funded - early 2024	\$ 2.9 Million

*subject to change
