

ADVANCED TRANSPORTATION MANAGEMENT SYSTEM

Financial Project
Identification No.:
441211-1

U.S. 17-92, S.R. 436, S.R. 434, Lake Mary Boulevard & Various Intersections

Seminole County

PROJECT DESCRIPTION

The Florida Department of Transportation (FDOT) is updating and expanding its existing advanced transportation management system (ATMS) in Seminole County. This project involves the removal and replacement of 20 arterial dynamic message signs (ADMS), including existing sign structures and foundations. Work will also include the addition of 12 traffic cameras at various intersections in Seminole County. This system will provide motorists with information about road conditions, construction and traffic accidents in real time through dynamic message signs. This technology helps keep motorists informed about major arterial roads so they can effectively plan their routes ahead of time.

WHAT TO EXPECT

This project will require lane closures and occasional detours during nighttime hours, along with potential daytime work as necessary resulting in turn lane closures. For updates and a detailed list of where cameras and signs will be installed, visit the FDOT's Central Florida website, www.cflroads.com.

CONTRACTOR

Traffic Management Solutions, Inc.

PROJECT COST

\$4.3 million

PROJECT START

Summer 2020

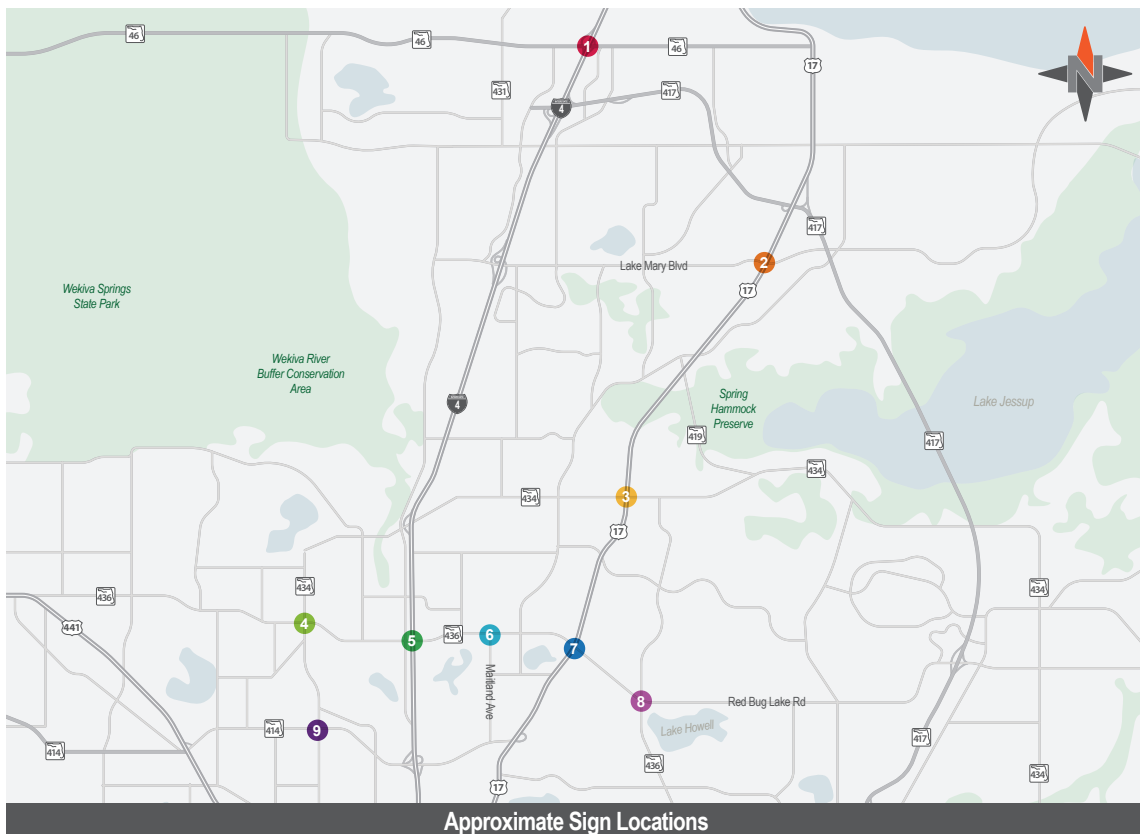

ESTIMATED COMPLETION

Spring 2021
