

# State Road 401 Resurfacing

From State Road 528 to  
Cape Canaveral Space Force Station

Brevard County

Financial Project Identification (FPID) No.: 448787-1

## Project Description

The Florida Department of Transportation (FDOT) is designing roadway and safety improvements along State Road (S.R.) 401 from S.R. 528 to Cape Canaveral Space Force Station.

The project plans to resurface about 2 miles of S.R. 401 to extend the life of the existing roadway, including the exit and entrance ramps at the S.R. 528 interchange.

To enhance safety for drivers, the design recommends placing audible and vibratory edge lines along the S.R. 528 westbound exit ramp. These lane markings help alert drivers when the vehicle travels outside of the travel lane.

To indicate and warn drivers that the paved median on S.R. 401 is not to be used as a lane, additional pavement markings will be added. Guardrail will be upgraded, and the existing northbound and southbound movable bridge signals will be replaced and upgraded.

## Project Status and Estimated Costs\*

Design:	Ongoing: completion Fall 2024	\$ 845,000
Right of Way:	Within Existing	-
Construction:	2025	\$ 6.4 Million
