

RESURFACING AND SAFETY IMPROVEMENTS

U.S. 1 from South of Beville Road (S.R. 400) to North of Fairview Avenue

Volusia County

**Financial Project
Identification
(FPID) No.:**
450782-1

PROJECT DESCRIPTION

The Florida Department of Transportation (FDOT) is making safety and operational improvements on U.S. 1 (Ridgewood Avenue) from Beville Road (State Road (S.R.) 400) to north of Fairview Avenue in Daytona Beach. This project is being implemented to increase pedestrian safety and driver awareness within this corridor.

In addition to resurfacing the roadway to extend its lifespan, other improvements include the installation of four new midblock pedestrian crossings equipped with Pedestrian Hybrid Beacons (PHBs) at the following locations:

- North of Osceola Avenue
- Between South Street and Cedar Street
- South of Shady Place
- North of Live Oak Avenue

Raised intersections with high-visibility crosswalks and crosswalk corner islands will be installed at the intersections of Orange Avenue and Magnolia Avenue. Raised intersections help reduce vehicle speeds, while high-visibility crosswalks safety by making it easier for motorists to see pedestrians. Crosswalk corners help prevent motorists from crossing into the sidewalk when making turns.

Additionally, the median opening at Shady Place will be modified, removing the bi-directional turn lane and providing a protected left-turn lane for southbound traffic. This upgrade is expected to reduce the likelihood and severity of crashes.

The project also includes drainage improvements at select locations to help improve stormwater management and roadway performance.

CONTRACTOR

Masci General Contractors, Inc.

PROJECT COST

\$9.3 million

PROJECT START

October 2026

ESTIMATED COMPLETION

Fall 2027

WHAT TO EXPECT

During construction, motorists should expect intermittent overnight lane closures between 7 p.m. and 7 a.m. for drainage installation, signalization, and raised intersection operations, and daytime lane closures between 7 a.m. and 10 p.m. for paving operations and all other work.

Motorists should anticipate areas of uneven pavement within the project limits, a common condition during construction when the contractor applies multiple asphalt layers in phases. Many of these roadway conditions are short-term and will gradually improve as the project progresses.

Electronic message boards and other signage will direct traffic through the work zone. Motorists are urged to use caution, obey all posted signage, and be prepared for potential delays while traveling through the project corridor. The level of work activity and noise will vary during different construction phases. Please note that the construction schedule may change due to inclement weather or other unforeseen circumstances. For the most current project details and lane closure information, please visit FDOT's Central Florida website at www.cflroads.com.
