

# I-75 at NW 49th Street Interchange

Marion County

Financial Project Identification (FPID) Number: 435209-1

## Project Description

The Florida Department of Transportation (FDOT) plans to construct a new Diverging Diamond Interchange (DDI) in the area of Interstate 75 (I-75) and NW 49th Street near Ocala. This interchange will improve interstate and regional mobility within Marion County, accommodate future traffic growth and provide relief to existing surrounding interchanges.

The DDI design was chosen because it has proven to enhance efficiency and increase safety by eliminating left turns across oncoming traffic. Unlike a conventional interchange, the lanes in a DDI cross over to the left side of the roadway. The design limits the number of traffic signal phases and allows drivers to make a left turn without crossing in front of oncoming traffic. The lanes then change back to the right side of the road. (\*Please see graphic on other side of handout).

The DDI for this project will have two lanes in each direction and will connect to NW 49th Street in the northwest corner. Marion County is building a connection from the DDI to NW 35th Street in the southeast corner. Marion County will also be purchasing the right of way for that portion. The interchange will include shared use paths/on-street bicycle lanes, sidewalks and crosswalks.

These findings are a result of a Project Development and Environment (PD&E) Study for this location that was completed in March 2021. To advance construction more quickly, the project will use a Design-Build approach, which means the selected contractor will be able to begin construction while design is finalized.
