South 14th Street (S.R. 25/U.S. 27) at South Street/West Dixie Avenue (S.R. 44) Safety and Roadway Improvements

Lake County | FPID No: 992200-5

PROJECT DESCRIPTION

The Florida Department of Transportation (FDOT) is constructing median modifications at the South 14th Street (S.R. 25/U.S. 27) and South Street/West Dixie Avenue (S.R. 44) intersection in Leesburg, Lake County.

The median modifications on South Street include installing a heavy-duty channeling system, also known as a continuous curb bollard system (as seen in the inset on reverse) from west of Flamingo Drive to Flamingo Drive, adding a raised concrete directional median at Flamingo Drive/Hood Avenue, and constructing a raised concrete traffic separator from Flamingo Drive/Hood Avenue to the intersection at South 14th Street. Another raised concrete traffic separator will be constructed on South 14th Street from south of Bryant Street to the intersection at South Street/West Dixie Avenue. These median modifications will limit left turning movements to and from side streets and driveways along each corridor. These improvements will enhance safety by implementing improved access control, enhancing traffic flow and reducing the possibility of conflict points, or locations where a crash can occur.

WHAT TO EXPECT DURING CONSTRUCTION

Motorists should anticipate construction activities to occur during the day and at night. Some lane closures may be necessary to allow crews to perform construction activities safely. Access to properties will be maintained.

Please note that the construction schedule may change due to weather or other unforeseen circumstances

For the latest updates and lane closure information, visit FDOT's Central Florida Roads website: www.cflroads.com/project/992200-5.

Project Details*

Construction Cost:

\$457,000

Project Start:

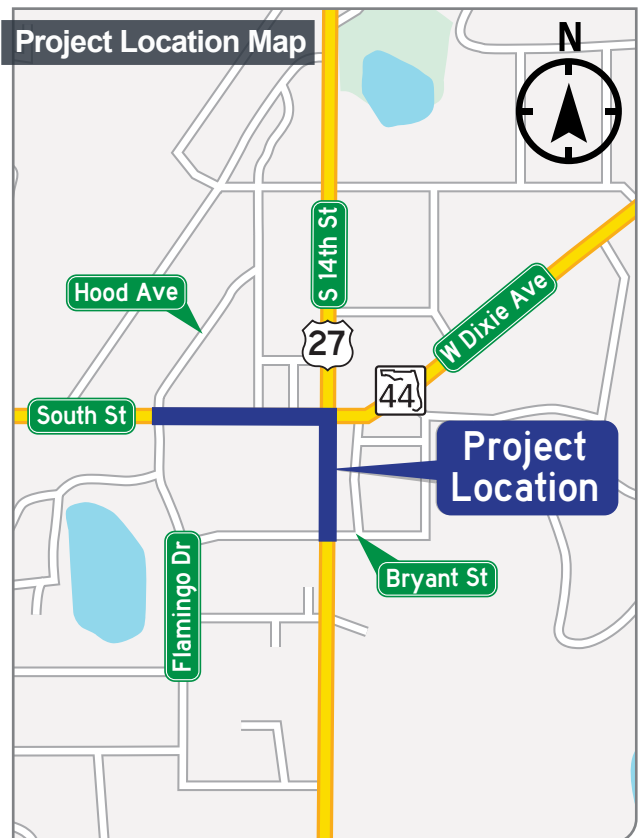

Fall 2025

Estimated Completion:

Early 2026

**subject to change*
