

U.S. 17-92 Project Development and Environment (PD&E) Study

From Ivy Mist Lane to Avenue A

Osceola County

Financial Project Identification (FPID) No.:

437200-1

Project Description

The Florida Department of Transportation (FDOT) is conducting a Project Development and Environment (PD&E) study for U.S. 17-92, evaluating alternatives to widen the existing two-lane roadway to four lanes and the evaluation of accommodating four lanes across Reedy Creek. The study's limits begin at Ivy Mist Lane and ends at Avenue A in Osceola County, just west of Poinciana Boulevard. The project is approximately 3.8 miles long and extends through Poinciana and Intercession City. The purpose of this project is to address current and future travel demand, improve safety and provide system linkage for this regionally significant arterial roadway.

A project location map shown to the right depicts the study limits.

This PD&E study is the second phase of FDOT's five step project life cycle. The first phase, the corridor planning study, was completed in February 2018. During the corridor planning study, FDOT analyzed existing and future safety, traffic and other community needs in coordination with local and regional agency partners and stakeholders. The findings and recommendations from the corridor planning study will be evaluated and refined during this PD&E study with continued coordination with local partners, stakeholders and the public in accordance with National Environmental Policy Act (NEPA).

Project Status and Estimated Costs*

Planning Study:	Completed: February 2018	\$ 184,034
PD&E Study:	Ongoing: Completion Spring 2023	\$ 1.7 Million
Design:	Funded: Fiscal Year 2026	\$ 6.95 Million
Right of Way:	Unfunded	—
Construction:	Unfunded	—

*subject to change
