## CERTIFICATION

PSI, an Intertek company, has completed a CSER of the study corridor, SR 524 commencing at Friday Road in the southwest section and terminating at Industry Road in the northeast section in Cocoa, Brevard County, Florida ("the study corridor"). The CSER was completed at the request of Consor Engineers LLC f/k/a Infrastructure Engineers, LLC ("Consor") ("the client") in accordance with the scope of work outlined in PSI's Amendment 1 to Agreement No. CA155, which was authorized by the client on June 18, 2024.

The purpose of this CSER was to evaluate the risk of encountering petroleum or hazardous substance impacted facilities along the study corridor. This study was conducted in general accordance with the methodology described in Chapter 20 of the FDOT PD&E Manual - 2023 Version and ASTM E 1527-21, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process.

### ***Environmental Professional Certification***

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in 312.10 of this part. I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Environmental Professional:

Jeff Townsend, LEP, REPA  
Environmental Professional

## 1.0 EXECUTIVE SUMMARY

PSI, an Intertek company, has completed a CSER of the study corridor, SR 524 commencing at Friday Road in the southwest section and terminating at Industry Road in the northeast section in Cocoa, Brevard County, Florida ("the subject property"). PSI performed the assessment to comply with the contract between Consor Engineers LLC (the client) and PSI.

### 1.1 FINDINGS

A summary of findings is provided below. The report should be read in its entirety to obtain a more complete understanding of the information provided and to aid in any decisions made or actions taken based on this information.

#### 1.1.1 SITE DESCRIPTION AND CURRENT USE

The project corridor is located in Sections 13, 22, 23, 24, 26, 27, Township 24 South, Range 35 East, and in Section 18, Township 24 South, Range 36 East, as referenced on the "Lake Poinsett, FL." and "Sharpes, FL." USGS topographic (Topo) maps. The study corridor is generally located northeast of Friday Road and southwest of Industry Road in Cocoa, Brevard County, Florida. The majority of the study corridor consists of undeveloped land with residential and commercial land uses present.

The study corridor totals approximately 17,000 linear feet. For the purposes of this report, the area assessed included approximately 500 feet southeast and northwest from the ROW line of the corridor for petroleum, dry cleaners, and non-petroleum sites; 1,000 feet from the ROW line for non-landfill solid waste sites; and 1/2 mile from the ROW line for CERCLA, NPL Superfund sites, or Landfill sites.

The following figures depicting the study corridor are included in Appendix A:

- Figure 1: Site Vicinity Aerial Photograph Map,
- Figure 2: USGS Topo Map,
- Figure 3: Risk Map
- Figure 4: Land Use Map, and
- Figure 5: Soils Map.

### 1.2 CONCLUSIONS

Based on PSI's review of the ERIS Radius Map Report, site reconnaissance, aerial photograph review, city directory review, interviews, and file review conducted on the FDEP's on-line database, a total of 15 sites with potential for hazardous material or petroleum impact to the soil and/or groundwater were identified. Of these sites, three facilities have been assigned a No Risk Site, five locations have been assigned a Low Risk, five sites have been assigned a Medium Risk, and two facilities have been assigned a High Risk. (Please refer to Section 7 of this report for risk rating definitions.) Below is a list of the sites identified, site numbers, and their FDOT hazardous ranking. The sites listed below are presented in order from southwest end to northeast end of the corridor. Please note, risk rankings were determined based on information provided to PSI

indicating that dewatering may be necessary for the proposed roadway expansion. For the purposes of identification, colors in the following table below correspond to those on Figure 3, Appendix A: white is No Risk, green is Low Risk, blue is Medium Risk, and red is High Risk.

Map ID No. (Site No.)	Name	Address	Risk	Potential COC
1	Days Inn (no closure documents to review for USTs reportedly removed in 1988)	5600 SR 524, Cocoa, FL	Low	Diesel Fuel and Unleaded Gasoline
2	Brevard Ohio Corp (currently Global Materials Company)	5580 SR 524, Cocoa, FL	No	Petroleum Products
3	Mobil Oil Corp SS #CN8 (currently Dakota-s Detail)	5555 SR 524, Cocoa, FL	High	Diesel Fuel and Unleaded Gasoline
4	Sunrise Food Mart #118, Sunshine Food Mart #27 (currently BP gasoline station)	5550 SR 524, Cocoa, FL	High	Diesel Fuel and Unleaded Gasoline
5	Atlantic Truck Lines 04-1I-3266	I-95 and SR 524, Cocoa, FL	No	Diesel Fuel
6	Flying J #1096	1101 Friday Road, Cocoa, FL	Medium	Diesel Fuel and Unleaded Gasoline
7	Sunshine Food Mart #45, Zippy Mart FL522 (currently Shell gasoline station)	4900 SR 524, Cocoa, FL	High	Diesel Fuel and Unleaded Gasoline
8	Chevron #47061 (currently vacant land)	4880 SR 524, Cocoa, FL	No	Waste Oil, Leaded Gasoline, and Unleaded Gasoline
9	Sunrise Food Mart #62, Tiger Mart (currently Amoco gasoline station)	4301 SR 524, Cocoa, FL	Medium	Diesel Fuel and Unleaded Gasoline

Map ID No. (Site No.)	Name	Address	Risk	Potential COC
10	7-Eleven Store #40328 (currently Sunoco Gasoline Station and 7-Eleven C-store)	3500 SR 524, Cocoa, FL	Medium	Diesel Fuel and Unleaded Gasoline
11	CVS Pharmacy #4280	2324 SR 524, Cocoa, FL	Low	RCRA Hazardous Waste
12	Pinch A Penny #199	2311 SR 524 Ste. #C-114, Cocoa, FL	Low	Pesticide-Sodium Hypochlorite Solution
13	Publix Super Market #760	2301 SR 524 #150, Cocoa, FL	Low	Diesel Fuel
14	Value Cleaners/The Home Depot (currently Great Wall Chinese and vacant spaces)	2300 SR 524, Cocoa, FL	Low	Solvents and Petroleum based dry-cleaner fluids
15	7-Eleven Store #37235 (and current Chevron gasoline station)	2201 SR 524, Cocoa, FL	Medium	Diesel Fuel and Unleaded Gasoline

### 1.3 RECOMMENDATIONS

Based on investigation of the property for evidence of potential contamination issues and other environmental issues, PSI offers the following recommendations.

- Further assessment may be required to determine the absence or presence and/or levels of soil and/or groundwater impact within the roadway expansion area at the following locations.
  - **Site No. 3: Mobil Oil Corp SS #CN8**
  - **Site No. 4: Sunrise Food Mart #118 (Sunshine Food Mart #27)**
  - **Site No. 6: Flying J #1096**
  - **Site No. 7: Sunshine Food Mart #45**
  - **Site No. 9: Sunrise Food Mart #62**
  - **Site No. 10: 7-Eleven Store #40328**
  - **Site No. 15: 7-Eleven Store #37235**

- Depending on the time frame in which construction activities commence, an updated Public Records review may be warranted prior to construction activities to determine current conditions. Sites having a High Risk of contamination potential should have a Public Records review update prior to construction activities.
- Should de-watering activities be anticipated along the study corridor, then additional assessment activities may be warranted at the above-mentioned sites to obtain information as to the current quality of groundwater prior to the de-watering activities.

## **2.0 INTRODUCTION**

### **2.1 PURPOSE AND SCOPE**

This CSER was performed to search for evidence of potential impact issues that may have an adverse environmental impact upon the study corridor. Based upon information provided to PSI, this CSER was conducted as part of a roadway project for Consor Engineers LLC. The study corridor commences at Friday Road in the southwest section and terminating at Industry Road in the northeast section in Cocoa, Brevard County, Florida. The assessment included records review, interviews, and reconnaissance to evaluate whether such conditions exist in connection with the property. The protocol utilized for this CSER was in general accordance with the requirements of Chapter 20 of the FDOT PD&E Manual - 2023 Version and ASTM E 1527-21, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process. This report includes documentation to support the analysis, opinions and conclusions as presented.

### **2.2 SPECIAL TERMS AND CONDITIONS**

#### **2.2.1 AUTHORIZATION**

Authorization to perform this assessment was given on June 18, 2024, by Melinda Fischl, PE, representing Consor Engineers LLC. The scope of work was conducted in accordance with PSI Proposal No. Amendment 1 to Agreement No. CA155 executed between Consor Engineers LLC and PSI and supplemental correspondence.

#### **2.2.2 PROPERTY ACCESS**

Instructions as to the location of the property, access, and an explanation of the property and facilities to be assessed were provided by Ms. Melinda Fischl, PE of Consor Engineers LLC.

### **2.3 METHODOLOGY AND RESOURCES**

#### **2.3.1 METHODOLOGY**

FDOT PD&E Manual guidelines (Chapter 20, 2023 revision) were followed to assess potential contamination.

#### **2.3.2 RECONNAISSANCE**

Prior to the site inspection, a review of the FDEP OCULUS Database was conducted to determine locations of contaminated sites. The ground reconnaissance consisted of observing the periphery of the property and viewing the site from accessible adjacent public thoroughfares. Interior portions of the property were systematically traversed to provide an overlapping field of view, wherever possible. Visual reconnaissance of adjoining properties was limited to areas and facilities that were readily observable from the subject

property or from public access areas. Site reconnaissance was conducted to determine sites with a potential to adversely impact the study corridor. Any observed potential hazardous or petroleum sources were noted and can be found in the Observations section (Section 8.0). Photographs were taken to document the features observed during the reconnaissance and environmental conditions of concern, where possible. A photographic log and copies of the photographs are included in Appendix B.

### 2.3.3 INTERVIEWS

Interviews were conducted with persons as noted in the following table. Records of Communication from interviews are included in Appendix C. Pertinent information reported by the interviewed parties is discussed in appropriate sections of the report.

Name	Title/Role	Affiliation	Date
Melinda Fischl, PE	Client/User	Conсор	Various
Judith Pennington	State Gov't Official	FDEP	Various
Christopher Ulrich	Local Gov't Official	BCNRMD	September 3, 2024
Cynthia M. Leckey	Local Gov't Official	FDOH-Brevard County	September 3, 2024
Tiffany Bonadio	Local Gov't Official	CFRD	September 25, 2024

Additional interviews were conducted with adjoining property owners and tenants. However, no useful historical information regarding the study corridor was provided.

### 2.3.4 ENVIRONMENTAL REGULATORY DATABASE INFORMATION

Information for the standard federal and state environmental record sources specified in ASTM Standard E 1527-21 was obtained through ERIS. The database information was reviewed to help identify evidence of potential contamination issues in connection with the study corridor. Additionally, where possible, PSI has researched the FDEP regulatory databases for facilities located within the study corridor to help identify the level of risk for each suspect site in connection with the study corridor. Copies of the research data and a description of the databases are included in Appendix D of this report.

### 2.3.5 HISTORICAL USE INFORMATION

A history of the previous uses of the property, and properties in the surrounding area to the extent that this information was revealed in the course of researching the study corridor, was developed consistent with practices specified in Chapter 20 of FDEP PD&E Manual – 2019 Version. From the standard historical sources specified in the ASTM Standard E 1527-21, PSI reviewed those sources listed below. Copies of representative historical source information are provided in applicable Appendices.

Source Type	Years Reviewed	Source
USGS "Lake Poinsett, FL." Topo Map	1953 (photorevised 1988, minor revision 1992)	USGS
USGS "Sharpes, FL." Topo Map	1953 (photorevised 1970, minor revision 1992)	USGS
Aerial Photographs	1943, 1951, 1958, 1969, 1972, 1979, 1983, 1986, 1993, 1994, 1999, 2002, 2004-2007, 2009, 2010, 2012-2014, 2016, 2017, 2019, 2020, 2022, 2023, 2024	FDOT, UF, and Google Earth
City Directories	1955, 1960, 1964, 1967, 1971, 1975, 1980, 1985, 1992, 1995, 2000, 2005, 2010, 2014	EDR
Sanborn Fire Insurance Maps	Not Reviewed, Unmapped Property	EDR

### 2.3.6 OTHER RESOURCES & ENVIRONMENTAL PROFESSIONAL QUALIFICATIONS

Other resources and information accessed for purposes of this CSER are discussed in appropriate sections of the report. Published references used in the completion of this CSER not previously listed are cited at the location they are referenced in the report. Credentials and qualifications of the environmental professionals responsible for preparation of this report are included in Appendix D.

## 2.4 LIMITATION AND EXCEPTIONS OF ASSESSMENT

Along with all of the limitations set forth in various sections of the Chapter 20 CSER protocol, the accuracy and completeness of this report is necessarily limited by the following:

- Access Limitations - The interior of the private residence in the north section of the study corridor was not accessed. Please note, however, PSI observed the exterior of the private residence in the study corridor.
- Physical Obstructions to Observations - While a thorough ground inspection was conducted where possible, the presence of wet areas of heavy ground vegetation prevented a complete visual inspection.
- Outstanding Information Requests - PSI contacted FDOH-Brevard County for information regarding the study corridor and surrounding vicinity. To date, no response has been received.
- Other - The scale of the aerial photographs reviewed and the presence of dense tree canopies prevented a close inspection of properties along the study corridor.

## 2.5 SIGNIFICANT ASSUMPTIONS

During the preparation of this report, PSI made the following assumptions in the development of the findings and conclusions of this CSER:

- Groundwater Flow Direction - The direction of regional groundwater flow was estimated through observations made during on-site reconnaissance, review of the USGS "Lake Poinsett, FL" and "Sharpes, FL" Topo maps, and reviewed regulatory information.
- Regulatory Agency Information - PSI assumes that all information provided by ERIS regarding regulatory status of facilities within the AMSD is complete, accurate, and correct.
- Other Regulatory Information - PSI considers all other information obtained from regulatory agencies to be complete, accurate, and current.
- Interviews - PSI assumes that all information provided through interviews is complete, accurate, and unbiased

### 3.0 PROJECT DESCRIPTION

The project corridor is located in Sections 13, 22, 23, 24, 26, 27, Township 24 South, Range 35 East, and in Section 18, Township 24 South, Range 36 East, as referenced on the "Lake Poinsett, FL." and "Sharpes, FL." USGS topographic (Topo) maps. The study corridor is generally located northeast of Friday Road and southwest of Industry Road in Cocoa, Brevard County, Florida. The majority of the study corridor consists of undeveloped land with residential and commercial land uses present.

The study corridor totals approximately 17,000 linear feet. For the purposes of this report, the area assessed included approximately 500 feet southeast and northwest from the ROW line of the corridor for petroleum, drycleaners, and non-petroleum sites; 1,000 feet from the ROW line for non-landfill solid waste sites; and 1/2 mile from the ROW line for CERCLA, NPL Superfund sites, or Landfill sites.

The following figures depicting the study corridor are included in Appendix A:

- Figure 1: Site Vicinity Aerial Photograph Map,
- Figure 2: USGS Topo Map,
- Figure 3: Risk Map
- Figure 4: Land Use Map, and
- Figure 5: Soils Map.

## 4.0 LAND USES

### 4.1 CURRENT LAND USE

The study corridor is generally located in a commercial area of Brevard County, Florida.

The following land uses were identified within 500 feet the study corridor:

- Residential, low density - less than 2 dwelling units/acre (Land Use Code 110) was identified for the central-southwestern section.
- Residential, high density - 6 or more dwelling units/acre (Land Use Code 130) was identified for the southwestern and northeastern sections.
- Commercial and services (Land Use Code 140) were identified throughout the study corridor.
- Institutional (Land Use Code 170) was identified in the northeastern section.
- Horse farms (Land Use Code 251) were identified in the central section.
- Herbaceous dry prairie (Land Use Code 310) was identified throughout the study corridor.
- Shrub and brush land (Land Use Code 320) were identified in the southwestern and central sections.
- Mixed range land (Land Use Code 330) was identified in the southwestern section.
- Pine flatwoods (Land Use Code 411) were identified throughout the study corridor.
- Hardwood - coniferous mixed (Land Use Code 434) was identified in the southwestern section.
- Reservoirs - pits, retention ponds, dams (Land Use Code 530) were identified throughout the study corridor.
- Mixed wetland hardwoods (Land Use Code 617) were identified in the central section.
- Freshwater marshes (Land Use Code 641) were identified throughout the study corridor.
- Wet prairies (Land Use Code 643) were identified in the central section.
- Emergent Aquatic Vegetation (Land Use Code 644) was identified central section.
- Treeless hydric savanna (Land Use Code 646) was identified throughout the study corridor.
- Disturbed land (Land Use Code 740) was identified in the northeastern section.
- Spoil areas (Land Use Code 743) was identified in the southwestern section.
- Roads and highways (Land Use Code 814) were identified in the southwestern and northeastern sections.
- Electrical power transmission lines (Land Use Code 832) were identified in the central section.
- Surface water collection ponds (Land Use Code 837) were identified in the northeastern section.

A Land Use Map has been provided as Figure 4, Appendix A.

### 4.2 FUTURE LAND USE

The proposed future land in the immediate vicinity of the roadway expansion is anticipated to be similar to existing land use.

## 5.0 HYDROGEOLOGIC FEATURES

### 5.1 GEOLOGY/HYDROGEOLOGY

Based upon review of the Florida Geological Survey Report of Investigation No. 28 (Groundwater Resources of Brevard County, Florida), groundwater in Brevard County occurs under either nonartesian or artesian conditions. The water in the surficial sands of Pleistocene and Recent Age is under nonartesian conditions in all parts of the county except a few small areas where the sands are overlain by thick beds of peat or clay. The principal sources of water in Brevard County are deposits that form a part of the principal artesian aquifer of the Florida Peninsula and adjacent area. This aquifer in Brevard County is composed of beds of sand and shell in the lower part of the deposits of Pliocene and late Miocene Age, the permeable parts of the Hawthorn Formation, and limestone formations of middle and late Eocene Age.

### 5.2 USGS TOPO MAP REVIEW

The following USGS Topo maps were reviewed:

- "Lake Poinsett, FLA." 1953, 1970
- "Sharpes, FLA." 1949, 1951, 1970, 1980, 1988

According to the USGS Topo maps, the study corridor is generally flat and is located between 23-45 feet above the NGVD of 1929. The highest area of topographic elevation generally occurs in the northeast portion of the study corridor and decreases to 23 feet NGVD in the approximate southwest portion where it crosses Friday Road. A low-lying wet area was depicted along the southeastern side of the study corridor. The study corridor and immediate surrounding areas are depicted on the maps as wooded land, marsh or swamp, a pond to the southeast, and various structures along the study corridor. The USGS Topo maps are provided as Figure 2 in Appendix A.

### 5.3 USDA NRCS SOIL SURVEY REVIEW

According to USDA NRCS SSURGO database, 21 soil types are mapped within the study corridor as described below:

**Map Unit: 2** – *Anclote sand-0 to 1 percent slopes*, is generally classified as very deep, very poorly drained, rapidly permeable soils in depressions, poorly defined drainage ways, and flood plains in Southern Florida Flatwoods.

**Map Unit: 6** – *Basinger sand-depressional*, is generally classified as nearly level and very poorly drained. It is in shallow depressions and sloughs and along the edges of freshwater marshes and swamps. Undrained areas are ponded for six to nine months or more each year. The slopes are concave and range from 0 to 2 percent. Permeability is rapid throughout.

**Map Unit: 7** – *Basinger sand*, is generally classified as nearly level and very poorly drained. It is in shallow depressions and sloughs and along the edges of freshwater marshes and swamps. Permeability is rapid throughout.

**Map Unit: 17** - *Eaugallie sand*, is generally classified as very deep, very poorly and poorly drained, slowly permeable soils in flats, sloughs, and depressional areas. They formed in sandy and loamy marine sediments.

**Map Unit: 28** – *Immokalee sand-0 to 2 percent slopes*, is generally classified as nearly level and poorly drained. It is on broad flatwoods. The permeability is rapid in the surface and subsurface layers and in the substratum, and it is moderate in the subsoil.

**Map Unit: 30** – *Malabar sand-0 to 2 percent slopes*, is generally classified as very deep, very poorly and poorly drained, slowly permeable soils in sloughs, shallow depressions, and along flood plains. They formed in sandy and loamy marine sediments.

**Map Unit: 36** – *Myakka sand-0 to 2 percent slopes*, is generally classified as very deep, very poorly or poorly drained, moderately rapid or moderately permeable soils that occur primarily in mesic flatwoods of peninsular Florida. They formed in sandy marine deposits.

**Map Unit: 38** – *Myakka sand-depressional*, is generally classified as very deep, very poorly or poorly drained, moderately rapid or moderately permeable soils that occur primarily in mesic flatwoods of peninsular Florida. They formed in sandy marine deposits. Slopes range from 0 to 8 percent.

**Map Unit: 43** – *Paola fine sand-0 to 8 percent slopes*, is generally classified as very deep, excessively drained, very rapidly permeable soils that formed in sandy marine sediments. They are on hills, ridges, and flats on marine terraces.

**Map Unit: 45** – *Paola-Urban land complex-0 to 8 percent slopes*, is generally classified as very deep, excessively drained Paola soils and urban land.

**Map Unit: 49** – *Pomello sand-0 to 5 percent slopes*, is generally classified as very deep, moderately well to somewhat poorly drained soils that formed in sandy marine sediments. It is on ridges, hills, and knolls in the flatwoods on marine terraces. Permeability is moderately rapid throughout.

**Map Unit: 50** – *Pomello-Urban land complex*, is generally classified as very deep, moderately well drained Pomello soils that formed in sandy marine deposits and urban land. It is on low ridges and knolls on the flatwoods.

**Map Unit: 51** – *Pompano sand-0 to 2 percent slopes*, is generally classified as very deep, very poorly and poorly drained, rapidly permeable soils that formed in thick beds of sandy marine sediments. These soils are on flatwoods, in low broad flats, and to a lesser extent, depressions, drainageways, and flood plans on marine terraces.

**Map Unit: 54** – *St. Johns sand-0 to 2 percent slopes*, is generally classified as very deep, poorly to very poorly drained, moderately permeable soils on broad flats and depressional areas of the lower Coastal Plain. They are formed in sandy marine sediments.

**Map Unit: 55** – *St. Johns sand-depressional*, is generally classified as very deep, very poorly drained, moderately permeable soils on depressions on marine terraces. They are formed in sandy marine deposits.

**Map Unit: 56** – *St. Lucie fine sand-0 to 5 percent slopes*, is generally classified as very deep, excessively drained soils that formed in sandy marine deposits. It is on dunes, ridges, and knolls on marine terraces. The permeability is very rapid.

**Map Unit: 57** – *St. Lucie fine sand-5 to 12 percent slopes*, is generally classified as very deep, excessively drained soils that formed in sandy marine deposits. It is on dunes, ridges, and knolls on marine terraces. The permeability is very rapid.

**Map Unit: 64** – *Terra Ceia muck* is generally classified as very deep, very poorly drained soils that formed in more than 50 inches of well decomposed, hydrophytic, herbaceous plant remains. They are in fresh water marshes Southern Florida Flatwoods.

**Map Unit: 67** – *Tomoka muck, undrained*, is generally classified as deep, very poorly drained, moderately permeable soils that formed in decomposed dark reddish brown and black organic material over sand and loamy mineral material. They are on broad low flats, fresh water marshes and swamps. Slopes range from 0 to 2 percent.

**Map Unit: 70** – *Valkaria sand* is generally classified as deep, poorly drained, rapidly permeable soils that formed in thick beds of marine sands. Valkaria soils occur in broad, poorly defined, low gradient drainageways, depressions, and low nearly level areas. Slopes are 2 percent or less.

**Map Unit: 91** – *Anclote sand* is generally classified as very deep, very poorly drained, rapidly permeable soils in depressions, poorly defined drainage ways, and flood plains in Southern Florida Flatwoods. Slopes range from 0 to 2 percent.

A Soils Map has been provided as Figure 5, Appendix A.

## 5.4 UTILITIES

Utility systems identified within the study corridor are as follows:

- Electricity within the study corridor is provided by FPL.
- Sewage disposal and potable water within the study corridor are currently provided by the City of Cocoa.

Utilities noted in the study corridor include buried electric and fiber optic lines and aboveground electric lines located along roadways. Additionally, an underground gas pipeline crosses the study corridor at Westminster Drive and SR 524, near Junny Rios Martinez Park.

## 6.0 HISTORICAL INFORMATION REVIEW

### 6.1 AERIAL PHOTOGRAPH REVIEW

Aerial photographs were reviewed as part of this CSER. The quality and scale of the aerial photographs varied throughout the years reviewed. Review of the aerial photographs followed in a southwest to northeast direction, beginning at approximately 500 feet southwest of Friday Road and ending at approximately 500 feet east of Industry Road. Observations are detailed below.

In the 1943 and 1951 aerial photographs, the study corridor generally appeared as undeveloped land, various ponds, and low-lying areas. No structures were apparent.

In the 1969 aerial photograph, SR 524 was apparent. The property along SR 524 appeared as undeveloped land, various ponds, and low-lying areas. No structures were apparent.

In the 1972 and 1979 aerial photographs, SR 524 was apparent. The property along SR 524 appeared as mixed-use with wooded land and residential and commercial structures apparent. The majority of the commercial development was apparent in the vicinity of the intersection of SR 524 and Interstate 95. Two structures indicative of gasoline stations were apparent on the properties that are currently occupied by a Shell gasoline station and shop (Site No. 4) and a vacant lot that was formerly a Chevron gasoline station (Site No. 8). The majority of the residential development was apparent in the northeastern section of the study corridor. Various ponds and low-lying areas were apparent along the study corridor.

In the 1983 aerial photograph, the study corridor generally appeared unchanged. However, an additional structure indicative of a gasoline station was apparent on the property that is currently occupied by a Shell gasoline station and Sunshine Food Mart (Site No. 7).

In the 1986 aerial photograph, SR 524 was apparent. The property along SR 524 appeared as mixed use with wooded land and residential and commercial structures apparent. The majority of the commercial development was apparent in the vicinity of the intersection of SR 524 and Interstate 95. One of the three gasoline station structures appeared demolished (Site No. 8). The majority of the residential development was apparent in the northeastern section of the study corridor. Various ponds and low-lying areas were apparent along the study corridor.

In the 1993, 1994, 1999, 2002, 2004-2007, 2009, 2010, 2012-2014, and 2016 aerial photographs, SR 524 was apparent. The property along SR 524 appeared as mixed-use with wooded land, commercial structures, paved roads and highways, low-lying wet areas, and various residential structures. The majority of the commercial development was apparent in the vicinity of the intersection of SR 524 and Interstate 95. The majority of the residential development was apparent in the northeastern section of the study corridor. Various ponds and low-lying areas were apparent along the study corridor.

In the 2017 aerial photograph, the study corridor generally appeared unchanged, with the exception of the property at the eastern corner of the intersection of SR 524 and Interstate 95, which appeared to be under construction.

In the 2019 and 2020 aerial photographs, the study corridor generally appeared unchanged, with the exception of the property at the eastern corner of the intersection of SR 524 and Interstate 95 that appeared as a commercial truck stop fueling facility, property on the southeast side of the corridor between Interstate 95 and Cox Road that appeared as a drainage retention area followed by a distribution warehouse, and property on the southeast side of the corridor southwest of London Boulevard that appeared as a fire station.

In the 2022 aerial photograph, the study corridor generally appeared unchanged, with the exception of the property on the southeast side of the corridor between Westminster Drive and London Boulevard that appeared with construction activities.

In the 2023 and 2024 aerial photographs, the study corridor generally appeared unchanged, with the exception of the property on the southeast side of the corridor between Westminster Drive and London Boulevard that appeared with construction activities. The study corridor generally appeared with its current configuration.

Based on the historical aerial photograph review, PSI offers the following:

- No sites or noted land uses such as mixing/loading areas or structures were identified as potential environmental concerns in the reviewed historical sources.
- Based upon information provided to PSI by the FDEP, the study corridor is not located within an EDB delineation zone. An EDB delineated zone indicates that water samples have been collected and analyzed from a potable water supply well or production well within the zone, and EDB was detected above the MCL for State Primary and Secondary Drinking Water Standards.

## 6.2 CITY DIRECTORY REVIEW

PSI reviewed the EDR Digital Archive and R.L. Polk & Co city directories for the study corridor for the years 1955, 1960, 1964, 1967, 1971, 1975, 1980, 1985, 1992, 1995, 2000, 2005, 2010, and 2014. Fifteen facilities were identified to be of potential concern and are listed below. Detailed information for those sites with regulatory listings is provided in Section 7. Please note only facilities and years listed are provided below for the sites with regulatory database listings. Site numbers as referenced in Section 7 are listed in parentheses. These sites are discussed further in Section 7.

**5600 SR 524 (Site 1)** - No listings.

**5580 SR 524 (Site 2)** - No listings.

**5555 SR 524 (Site 3)** - No listings.

**5550 SR 524 (Site 4)** - No listings.

**I-95 and SR 524 (Site 5)** - No listings.

**1101 Friday Road (Site 6)** - No listings.

**4900 SR 524 (Site 7)** - This address was identified in the city directories from 1992 to 2014 as being occupied by the following:

- 1992: Crown Central Petroleum Corp
- 2000: Space Coast Petro Distributor
- 2005: A One Petro Inc., Space Coast Petro Distributor
- 2010: Space Coast Petro Distributor, United Hotel Group LLC
- 2014: Space Coast Petro Distributor

**4880 SR 524 (Site 8)** - No listings.

**4301 SR 524 (Site 9)** - This address was identified in the city directories from 2005 to 2014 as being occupied by the following:

- 2005: Millennium Oil Inc.
- 2010: Bizzarro Pizza Company, Millennium Oil Inc., OHM Space Coast Inc., Tiger Mart Exxon, Tony's Famous NY Pizza Inc., Uhaul Moving & Storage
- 2014: Millennium Oil Inc., Tiger Mart Exxon, Tony's Famous NY Pizza Inc.

**3500 SR 524 (Site 10)** - This address was identified in the 2005 city directory as being occupied by the following:

- 2005: Speedway Smoke for Less

**2324 SR 524 (Site 11)** - This address was identified in the city directories from 1995 to 2014 as being occupied by the following:

- 1995: Eckerd Corporation
- 2000: Eckerd Corporation
- 2005: CVS Pharmacy Inc.
- 2010: CVS Pharmacy Inc.
- 2014: CVS Pharmacy Inc., Eckerd Drugs

**2311 SR 524 (Site 12)** - This address was identified in the 2014 city directory as being occupied by the following:

- 2014: Anytime Fitness (former Pinch A Penny #199)

**2301 SR 524 (Site 13)** - This address was identified in the city directories from 2005 to 2014 as being occupied by the following:

- 2005: Broome Jim, China Park, PC & D Management Inc., Publix Super Markets Inc., Roe Valerie Woods Insurance, Visionary Optometry Inc.

- 2010: American Liquor, Beef O Bradys, Blockbuster Inc., China Park, Country Cookin Diner Inc., Expert Nails, General Nutrition Inc. PA, JP Morgan Chase & Co, PC & D Management Inc., Publix Super Markets Inc., Roe Valerie Woods Insurance, Tips & Toes 4 Nail Salon, Visionary Optometry Inc., Wing King Three Inc.
- 2014: American Liquor, Beef O Bradys, China Park, Country Cookin Diner Inc., Expert Nails, General Nutrition Corporation, JP Morgan Chase & Co, PC & D Management Inc., Publix Super Markets Inc., Wing King Three Inc.

**2300 SR 524 (Site 14)** - This address was identified in the city directories from 2000 to 2014 as being occupied by the following:

- 2000: Creative Hair Dressers Inc., Dollar Tree Stores Inc., Great Wall Chinese Restaurant, Health First Physicians Inc., Labor Employment Sec Fla Dept, M G A Inc., Sedona Healthcare Group Inc., Western Union, Winn-Dixie Stores Inc., Zingerella John
- 2005: Dollar Tree Stores Inc., Dr Fitness, Edward D Jones & Co LP, Great Wall Chinese Restaurant, Health First Inc., Sedona Healthcare Group Inc., SJ Holdings LLC, Tenacious Tan Inc., Winn-Dixie Stores Inc.
- 2010: Dr Fitness, Edward D Jones & Co LP, Florida State of, Great Wall Chinese Restaurant, MGA Inc., Nails by Tony, Ratner Companies LC, Raup Aimee, Sarah E Guttery DVM PA, Tenacious Tan Inc., Vijayvargiya Prerna MD
- 2014: Dr Fitness, Edward D Jones & Co LP, Great Wall Chinese Restaurant, Nails by Tony, Sarah E Guttery DVM PA

**2201 SR 524 (Site 15)** - This address was identified in the city directories from 2010 to 2014 as being occupied by the following:

- 2010: S & S Gas LLC
- 2014: Babylon Petroleum

### 6.3 SANBORN MAP REVIEW

Based on information provided by EDR, Sanborn maps are not available for the study corridor.

### 6.4 PRIOR REPORT REVIEW

PSI mailed or e-mail questions or performed interviews requesting this information. Provided reports are discussed below.

Report Title:	CSER
Prepared For:	Infrastructure Engineers, LLC
Prepared By:	PSI
Report Date:	March 23, 2020, Reissued April 11, 2022

Summary:	Based on PSI's review, a total of 15 sites with potential for hazardous material or petroleum impact to the soil and/or groundwater were identified. Of these sites, three facilities were assigned a No Risk Site, five locations were assigned a Low Risk, five sites were assigned a Medium Risk, and two facilities were assigned a High Risk. Please note, risk rankings were determined based on information provided to PSI indicating dewatering activities were possible for the proposed roadway expansion.
----------	---

## 7.0 REGULATORY RECORDS REVIEW AND POTENTIAL RANKING

### 7.1 ENVIRONMENTAL REGULATORY RECORDS REVIEW

Information for the standard Federal and state environmental record sources was obtained through ERIS. The database information was reviewed to help identify facilities to be a potential concern in connection with the area study corridor. In addition, PSI supplemented the Radius Map Report by obtaining state, county, and local available records through file review and interviews. Additionally, interviews were conducted with neighboring residents and tenants. A copy of the database and a description of the databases have been included in the Appendices.

### 7.2 PROJECT IMPACTS AND CONTAMINATION POTENTIAL RATING

The FDOT rating system for sites of potential environmental concern fall into four categories:

**No Risk Site** - After review of all available information, there is nothing to indicate that contamination would be a problem. This does not mean that hazardous waste or materials have not been handled on a site, but indicates that all available information (FDEP reports, monitoring wells, water and soil samples, etc.) indicates problems should not be expected. Examples of operations that may have receive this rating are:

- A gasoline station that has been closed and has a closure assessment or contamination assessment documenting that there is no contamination remaining.
- A wholesale or retail outlet that handles hazardous materials in sealed containers which are never opened while at this facility, such as aerosol cans for sale at a drug or home improvement retail store.

**Low Risk Site** - The former or current operation has a hazardous waste generator ID number, or deals with hazardous materials; however, based on available information, there is no reason to believe there would be any involvement with contamination.

**Medium Risk Site** - After review of all available information, indications are found (reports, Notice of Violations, consent orders, etc) that identify known soil and/or water contamination and that the issue does not need remediation, is being remediated (i.e. air stripper of the groundwater, etc.) or that continued monitoring is required. The complete details of remediation requirements are important to determine what impact the site could have on design or construction of the roadway improvements. This rating expresses the degree of concern for potential contamination problems. Known problems may not necessarily present a high cause for concern if the regulatory agencies are aware of the situation and corrective actions are either underway or complete. The actions may not have an adverse impact on the proposed project. This is the lowest possible rating a gasoline station operating within current regulations could receive.

**High Risk Site** - After a review of all available information, there is a definite potential for the site to have contamination problems. Further assessment will be required to determine the actual presence and/or levels of contamination, the presence of abandoned underground fuel storage tanks, and the need for remedial action. Properties that were previously used as gasoline stations but have not been evaluated or assessed would receive this rating.

The following sites with a contamination risk potential rating of No, Low, Medium, or High Risk have been listed in sequential order from southwest to northeast along SR 524 and in the vicinity of the detached proposed pond locations with regard to their locations along the study area. Please note that risk rankings were determined based on information provided to PSI indicating dewatering may be necessary for the proposed roadway expansion. Sites have been included which were identified during the site reconnaissance and were included in the regulatory database report. Based upon review of the regulatory database report, additional non-adjointing facilities not listed below were noted to be located within the AMSD. However, given their actual separation distances, current regulatory status, and/or regional topographic location in relation to the subject property, the additional non-adjointing facilities have been assigned a contamination risk assessment score of No Risk Site.

**1. Days Inn, 5600 SR 524, Cocoa, Florida 32926 (Facility ID: 8841080).** This facility was listed in the ERIS Radius Map Report as a UST and STCS facility. It is located approximately 230 feet southwest of the study corridor intersection ROW on the northwest side of State Road 524 and in an apparent down-gradient topographic position. According to the ERIS report and the information obtained from the FDEP Oculus/Map Direct database, three 10,000-gallon USTs of unknown contents were installed at this facility on unreported dates and were all removed in July 1988. PSI searched the FDEP database for UST closure assessment records pertaining to soil and groundwater sampling and none were found. No petroleum product releases were identified for this facility. Based on the separation distance of this facility to the study corridor, inferred down-gradient position, and the lack of reported releases, this facility has been assigned a contamination risk assessment score of **Low Risk Site**. The COCs for this facility are diesel fuel and unleaded gasoline.

**2. Brevard Ohio Corp, 5580 SR 524, Cocoa, Florida 32926 (Facility ID: 8841317).** This facility was listed in the ERIS Radius Map Report as an LST, DWM CONTAM, STCS, UST, and WELL SURVEILLANCE facility. It is located on the edge of the southwestern section of the study corridor on the northwest side of State Road 524. In June 1995, Universal Engineering Sciences (UES) completed a Contamination Assessment Report which resulted in this facility receiving a priority ranking of 5. Remediation activities for this site included the removal of approximately 214 cubic yards of contaminated soil. In August 2004, Lumbert Environmental Group, Inc. (LEI) completed a Site Assessment Report which included the installation and sampling of two monitoring wells. Minor residual contamination was found and LEI recommended that the site receive an NFA status. In November 2004, the BCNRMD, as an agent for the FDEP, requested additional soil and groundwater sampling be completed.

PSI reviewed the November 2006 Supplemental Site Assessment for this facility that was conducted by Point Four Engineering and Technological Services (PFE). The 2006 report states that this facility previously operated as a filling station that experienced release(s) of petroleum product prior to 1995. PFE obtained

several soil and groundwater samples from this site and analytical results indicated that the analyzed constituents were well below the cleanup target levels for both soil and groundwater criteria. The UST tank bed was reported as closed in place. PFE requested an NFA status without conditions for the site.

In March 2007, this site received an SRCO from the FDEP. Based on the most recent soil and groundwater analytical data and the completed cleanup status, this facility has been assigned a contamination risk assessment score of **No Risk Site**.

**3. Mobil Oil Corp. #02-CN8, 5555 SR 524, Cocoa, Florida 32926 (Facility ID: 8518347).** This facility was listed in the ERIS Radius Map Report on the LST, UST, DWM CONTAM, STCS, WELL SURVEILLANCE, RCRA NonGen, FINDS/FRS, and ECHO databases. It is located on the southwestern section of the study corridor on the southeast side of State Road 524. Twelve USTs and replacement USTs between 550 and 10,000 gallons in size that contained waste oil, leaded gasoline, and unleaded gasoline were installed at this facility between September 1966 and January 1988. Eight of the USTs were removed from this facility in January 1988 and replaced with three 10,000-gallon fiberglass USTs containing leaded and unleaded gasoline, and a 550-gallon used oil UST. The fiberglass gasoline USTs were installed in a new location, on the southwest corner of the site. The original location of the 550-gallon steel used oil UST could not be verified. The second 550-gallon used oil UST was located behind the station building on the east side of the site. The remaining four USTs were removed in July 1992. According to the ERIS report, the discharge cleanup status for this facility is ongoing and the cleanup work status is currently inactive. A discharge was reported at this facility to the FDEP in May 1986 and the facility was eligible for the EDI program. PSI reviewed the Template Site Assessment Report (TSAR) conducted by Florida Geotechnical Engineering, Inc. (FGE), dated July 2018. During this assessment period, FGE performed seven soil borings and collected soil samples to be analyzed by various test methods that are used to detect petroleum contamination. FGE reported that no parameters exceeded their respective SCTLs.

The 2018 TSAR also stated that groundwater samples were collected from six monitoring wells and were analyzed by various test methods associated with petroleum contamination. Groundwater flow was documented to be to the southwest. The groundwater analytical results indicated that BTEX, MTBE, naphthalene, 1-methylnaphthalene, 2-methylnaphthalene, and TPH all exceeded their respective GCTLs and/or NADCs in each well sampled. FGE recommended a RAP be prepared to address the petroleum-impacted smear zone and groundwater contamination.

Based on the most recent groundwater analytical data, the lack of regulatory closure documentation, and the documented impacted groundwater remaining on the property, this facility has been assigned a contamination risk assessment score of **High Risk Site**.

**4. Sunrise Food Mart #118 (a.k.a. Sunshine Food Mart #27, Crown Central Petroleum Corp. and Zippy Mart), 5550 SR 524, Cocoa, Florida 32926 (Facility ID: 8501147).** This facility was listed in the ERIS Radius Map Report on the LST, UST, STCS, ICIS, FINDS/FRS, WELL SURVEILLANCE, and ECHO databases. It is located on the southwestern section of the study corridor on the northwest side of State Road 524. Eight USTs of between 500 and 6,000 gallons in size with various contents (diesel, unleaded gasoline, kerosene) were installed at this facility in February 1980 or on unreported dates and were all removed on unreported dates. Currently, three 10,000-gallon USTs containing unleaded gasoline and one 10,000-gallon UST containing

vehicular diesel are in service at this property and were installed in September 1992. A discharge was reported at this facility to the FDEP in November 1987 and the facility was eligible for the EDI program. The discharge was addressed, remediated, and received an SRCO from the FDEP in March 1995. A spill bucket closure report was completed in July 2023 that identified impact and recommended a DRF be completed. A DRF was completed in November 2023. The facility was last inspected in March 2024 and was found to be in major out of compliance for shear valves not properly installed and component or piping that caused a discharge or release.

Based on the most recent discharge, the lack of regulatory closure documentation, and the documented impact remaining on the property, this facility has been assigned a contamination risk assessment score of **High Risk Site**.

**5. Atlantic Truck Lines 04-11-3266, I-95 & SR 524, Cocoa, Florida 32926 (Facility ID: 9807344).** This facility was listed in the ERIS Radius Map Report as being on the LST, DWM CONTAM, STCS, WELL SURVEILLANCE, and DEL CONTAM SITE databases as an Emergency Response Spill Site. It is located on the southwest section of the study corridor on the southeast side of State Road 524 and on the northeast side of I-95. According to the ERIS report, a discharge was reported for this facility to the FDEP in October 2004. The discharge cleanup status of this facility is "cleanup not required" and the cleanup work status is "completed". Source removal activities consisting of the removal and transportation of approximately 16 cubic yards of soil occurred at this property in July 2006. Confirmatory soil samples were collected from the sidewalls and base of the excavation. Based on the laboratory analytical results and the documentation of excavation activities, the FDEP issued a response letter in July 2006 and stated that no additional action was required at that time.

Based on the soil analytical data and FDEP's conclusion that no additional action was required, this facility has been assigned a contamination risk assessment score of **No Risk Site**.

**6. Flying J #1096. 1101 Friday Road, Cocoa, Florida 32916 (Facility ID: 9815467).** This facility was listed in the ERIS Radius Map Report as being on the UST, STCS, and TIER 2 databases. It is located on the southwest section of the study corridor on the southeast side of State Road 524. According to the ERIS report, five 20,000-gallon USTs containing vehicular diesel and one 25,000-gallon UST containing unleaded gasoline were installed at this facility in March 2017 and are currently in service. The FDEP conducted an inspection in May 2018 and the inspection results indicate that this facility was in compliance with FDEP regulations.

Based on the lack of reported discharges, the compliance status, and the current use as a gasoline station, this facility has been assigned a contamination risk assessment score of **Medium Risk Site**.

**7. Sunshine Food Mart #45, 4900 SR 524, Cocoa, FL 32926 (Facility ID: 8501392).** This facility was listed in the ERIS Radius Map Report on the LST, UST, STCS, DWM CONTAM, FINDS/FRS, ECHO, RCRA NONGEN, and NPDES, databases. It is located on the southwest section of the study corridor on the northwest side of State Road 524. According to the ERIS report, three 10,000-gallon USTs containing unleaded gasoline and vehicular diesel were installed at this facility in July 1980 and were removed in October 1999. Two 12,000-gallon USTs containing unleaded gasoline and vehicular diesel were installed at this facility in October 1999 and are currently in service. A discharge was reported for this facility in August 1990. The discharge cleanup status is ongoing and the cleanup work status is currently inactive.

GHD Services (GHD) submitted an Interim Assessment Report and a TSAR to the FDEP in December 2017 and March 2018, respectively. According to these reports, impacted soil and groundwater remains within this facility's property boundaries. In the TSAR, GHD recommended the preparation of a RAP to evaluate the use of a variety of remedial strategies to address the soil and groundwater impacts.

Based on data collected as part of closure (replacement) activities in January 2020 for the regular and premium unleaded gasoline and diesel fuel spill buckets recommended remediation of the impacts surrounding the spill buckets and a DRF was submitted in March 2020. The groundwater analytical results showed no exceedances of applicable GCTLs or NADCs from the samples collected in July 2021 and impacted soils were removed. One additional quarter of groundwater sampling was recommended. NAM activities from January 2022 to May 2024 have identified impact in groundwater in one monitoring well MW-18 located approximately 150 feet from the ROW.

Based on the information obtained from the GHD reports, soil and groundwater impacts remain at this facility and no remediation activities have been conducted to date for the 1990 discharge; therefore, this facility has been assigned a contamination risk assessment score of **High Risk Site**.

**8. Chevron #47061, 4880 SR 524, Cocoa, FL 32926 (Facility ID: 8519312).** This facility was listed in the ERIS Radius Map Report on the LST, DWM CONTAM, STCS, WELL SURVEILLANCE, and UST databases. It is located on the southwest section of the study corridor on the northwest side of State Road 524. According to the ERIS report, one 1,000-gallon UST containing waste oil, two 10,000-gallon USTs containing unleaded gasoline, and one 10,000-gallon UST containing leaded gasoline were installed at this facility in July 1982 and removed at an unreported date. A discharge was reported at this facility in June 1992.

PSI reviewed the Arcadis U.S., Inc. (Arcadis) TSAR, dated May 2017. Arcadis concluded that there are no identified soil impacts and that the groundwater analytical results indicated concentrations below GCTLs for two consecutive quarters (December 9, 2016 and March 16, 2017 sampling events). In September 2017, the FDEP issued an SRCO for the facility.

Based on the completed cleanup status and the lack of current USTs, this facility has been assigned a contamination risk assignment score of **No Risk Site**.

**9. Sunrise Food Mart No. 62 (a.k.a. Tiger Mart Exxon), 4301 SR 524, Cocoa, FL 32926 (Facility ID: 9805290).** This facility was listed in the ERIS Radius Map Report as being on the UST and STCS databases. It is located on the central section of the study corridor on the southeast side of State Road 524. According to the ERIS report, one 12,000-gallon unleaded gasoline UST and one 15,000-gallon unleaded gasoline UST were installed at this facility in October 2002 and are reportedly in service. Based on the most recent FDEP Compliance Inspection Report, this facility is in compliance with regulatory standards. No discharges have been reported for this facility.

Based on the lack of reported discharges, the compliance status, and current property use as a gasoline station, this facility has been assigned a contamination risk assessment score of **Medium Risk Site**.

**10. 7-Eleven Store No. 40328 (a.k.a. Speedway No. 8352), 3500 SR 524, Cocoa, FL 32926 (Facility ID: 8732759).** This facility is listed in the ERIS Radius Map Report on the LST, UST, STCS, DEL CONTAM SITE, DWM CONTAM, WELL SURVEILLANCE, FINDS/FRS, and ECHO databases. It is located on the northeast section of the study corridor on the northwest side of State Road 524. According to the ERIS report, two 10,000-gallon unleaded gasoline USTs and one 10,000-gallon diesel UST were installed at this facility in March 1987 and were removed in November 2008. Two 20,000-gallon USTs containing unleaded gasoline and diesel were installed at this facility in December 2008 and are reportedly in service. A discharge was reported for this facility in February 1993. The discharge was addressed, remediated, and was issued an SRCO by the FDEP in October 2010. A submersible pump was repaired in 2021 and no soil or groundwater impact was identified.

According to the most recent FDEP Compliance Inspection Report, this facility is in compliance with regulatory standards. Based on the discharge cleanup status, the lack of current violations, and the current use as a gasoline station, this facility has been assigned a contamination risk assessment score of **Medium Risk Site**.

**11. CVS Pharmacy No. 4280, 2324 SR 524, Cocoa, FL 32926 (EPA ID: FLR000189241).** This facility is listed in the ERIS Radius Map Report as being on the RCRA VSQG, FINDS/FRS, and ECHO databases. It is located on the northeast section of the study corridor on the northwest side of State Road 524. According to the ERIS report, this facility is associated with the following hazardous wastes: ignitable wastes, wastes with a pH of less than 2 or greater than 12.5, cadmium, chromium, mercury, selenium, silver, nicotine, salts, nitroglycerine, and several other organic compounds. The ERIS report and the EPA ECHO database indicated that no spills or violations have been reported for this facility.

Based on the hazardous waste codes associated with this facility and the lack of reported spills and violations, the facility has been assigned a contamination risk assessment score of **Low Risk Site**.

**12. Pinch A Penny No. 199, 2311 SR 524 Suite No. C-114, Cocoa, FL 32926 (Facility ID: N/A).** This facility is listed in the ERIS Radius Map Report as being on the FINDS/FRS and SSTS databases. It is located on the northeast section of the study corridor on the southeast side of State Road 524. SSTS tracks the registration of all pesticide-producing establishments and tracks annually the types and amounts of pesticides, active ingredients, and related devices that are produced, sold, or distributed each year. According to the ERIS report, in 2008, zero product was reported at this facility. No records of violations or spills have been found on the FDEP Oculus database.

Based on the lack of violations and spills reported and the current use as a swimming pool supply store, this facility has been assigned a contamination risk assessment score of **Low Risk Site**.

**13. Publix Super Market No. 760, 2301 SR 524 #150, Cocoa, FL 32926 (Facility ID: 9808282).** This facility is listed in the ERIS Radius Map Report on the AST, STCS, FINDS/FRS, and RCRA VSGQ databases. According to the ERIS Radius Map Report, one 1,000-gallon diesel AST was installed at this facility in June 2006 and is reportedly in service. The AST is associated with an on-site emergency generator. PSI reviewed the most recent FDEP's Storage Tank Facility Routine Compliance Site Inspection Report, dated August 29, 2022, which indicated that the facility is in compliance with regulatory standards. No discharges have been reported for this facility.

Based on the lack of reported discharges and the on-site storage of diesel fuel, this facility has been assigned a contamination risk assessment score of **Low Risk Site**.

**14. Value Cleaners/The Home Depot, a.k.a. 60 Minute Cleaners, 2300 SR 524, Cocoa, FL 32926 (Facility ID: N/A).** This facility is listed in the ERIS Radius Map Report on the STCS and FINDS/FRS databases. According to the ERIS report, Value Cleaners operated at this address in 1997 and had a site type description as "garment pressing and cleaners agents". PSI searched the FDEP's Oculus and Map Direct databases for regulatory records associated with this address and no dry-cleaning records were available. The facility would have been located approximately 460-feet north of the nearest SR 524 ROW and at an inferred cross-gradient position. Based on the lack of reported discharges, lack of regulatory listings, inferred cross-gradient position, and separation distance, this facility has been assigned a contamination risk assessment score of **Low Risk Site**.

**15. 7-Eleven Store No. 37235 (f.k.a. Cocoa Mobil LLC), 2201 SR 524, Cocoa, FL 32926 (Facility ID: 9804418).** This facility is listed in the ERIS Radius Map Report on the UST and STCS databases. According to the ERIS Radius Map Report, this facility operated as a Cocoa Mobil LLC (gas station) from 2010 to 2014. One 20,000-gallon diesel UST and two 15,000-gallon unleaded gasoline USTs were installed at this facility in December 2001 and are reportedly in service.

In April 2015, Wilson's Petroleum Equipment, Inc. (Wilson) was performing an equipment upgrade for the three USTs. CB&I Environmental & Infrastructure, Inc. (CB&I) conducted a petroleum system closure assessment during replacement of the overspill and vapor buckets. A total of 67 soil samples were collected from the overspill bucket excavations at 1-foot depth intervals around each bucket to the top of each tank at approximately 4 feet below surface. CB&I utilized an organic vapor analyzer (OVA) prior to collecting soil samples and the total organic vapors detected ranged from <1 to 1,191 ppm.

Thirteen of the soil samples were submitted to a laboratory for analysis for BTEX, PAHs, and TPH. The analytical results indicated that no exceedances of the applicable Chapter 62-777, FAC, SCTLs were detected in the soil samples analyzed. Based on the results, CB&I recommended no further action.

PSI also reviewed the most recent FDEP Inspection Report for this facility, dated January 2024, which identified compliance issues. A June 2024 letter indicated that this facility returned to compliance with regulatory standards. Based on the most recent inspection reports, CB&I's 2015 Closure Assessment Report, and the current operation as a gasoline station, this facility has been assigned a contamination risk assessment score of **Medium Risk Site**.

Based on PSI's review of the ERIS Radius Map Report, site reconnaissance, aerial photograph review, city directory review, interviews, and file review conducted on the FDEP's on-line database, three High Risk sites, four Medium Risk sites, five Low Risk sites, and three No Risk sites have been identified within the study corridor.

## 7.3 OTHER REGULATORY INFORMATION

PSI submitted information requests to the agencies tabulated below.

## Information Request Response

Affiliation	Yes	No
FDEP	✓	
CFRD	✓	
FDOH-Brevard County		✓
BCNRMD		✓

PSI identified no evidence of potential adverse conditions in connection with the other regulatory information.

Additionally, PSI supplemented the regulatory database with review of the following on-line database websites maintained by the EPA and FDEP regarding regulatory listings in the vicinity of the subject property:

- EPA's EnviroMapper for Envirofacts Database
- FDEP's Map Direct On-line Mapping Database (includes institutional controls such as deed restrictions and engineering controls). No institutional controls were identified for the subject property.
- FDEP's OCULUS Document Management Database

The websites confirmed information in the ERIS database report.

## 8.0 SITE RECONNAISSANCE

PSI conducted site reconnaissance activities of the study corridor to evaluate the existing condition and the potential for current development that could pose hazardous materials or petroleum impact to the soil and/or groundwater that could impact the study corridor.

### 8.1 OBSERVATIONS

A summary of uses and conditions is tabulated below. Detailed information is discussed following the summary for any "yes" answers, along with an opinion about the significance of the listing.

Identified? (check if Yes)	Item Description
<b>Equipment/Activities/Uses</b>	
✓	Wastewater Treatment Systems
	Septic or Sewage Tanks
✓	Transformers or Other Mech./Elec. Equipment That Could Contain PCBs
✓	Quarries, Pits, Ponds, Lakes, or Lagoons
	Use, Storage, or Disposal of Hazardous Substances
✓	Use, Storage, or Disposal of Petroleum Products
✓	ASTs/USTs
✓	Drums or Other Bulk Chemical Containers
	Suspect Containers/Unidentified Contents
✓	Drains and Sumps
✓	Drinking Water, Irrigation or Monitoring Wells
<b>Potential Evidence of Releases</b>	
	Interior Stains or Corrosion
✓	Stained Soil or Pavement
	Stressed Vegetation
	Odors
	Pools of Liquid or Standing Water
	Solid Waste Dumping/Landfilling/Suspect Fill Material

Identified? (check if Yes)	Item Description
	Other Uses or Conditions of Concern

### 8.1.1 WASTEWATER TREATMENT SYSTEMS

PSI observed eight wastewater lift stations in the vicinity of the study corridor. The lift stations pump domestic wastewater generated in the surrounding vicinity. PSI did not observe adverse conditions or evidence of releases. Based on this information, the presence of the wastewater lift stations are not considered to be a concern in connection with the study corridor at this time.

### 8.1.2 TRANSFORMERS OR OTHER ELECTRICAL OR MECHANICAL EQUIPMENT THAT COULD CONTAIN PCBS

Pole- and pad-mounted electrical transformers were observed throughout the study corridor. PSI did not observe PCB labeling on all of the transformers at the time of the site reconnaissance. PSI believes the electrical equipment is the property and responsibility of FPL, the local electrical utility company, who would be responsible for any cleanup related to the equipment that could not be attributed to tenant negligence. The identified electrical equipment appeared to be in good condition, with no apparent evidence of staining, leakage or corrosion noted. Based on their observed condition and the local utility ownership, the observed transformers are not considered to be a concern in connection with the study corridor at this time.

### 8.1.3 QUARRIES, PITS, PONDS, LAKES, OR LAGOONS

PSI identified 18 ponds located throughout the study corridor. No obvious staining, stressed vegetation, or oily sheens were noted in connection with the water observed at the time of the site reconnaissance. As such, the presence of the identified ponds does not appear to be a concern in connection with the study corridor at this time.

### 8.1.4 USE, STORAGE, OR DISPOSAL OF PETROLEUM PRODUCTS

PSI observed multiple propane tanks within the study corridor. These tanks are sold for grilling and other consumer purposes. The tanks were stored in cage-type storage units at the following locations:

- Site 4: Sunrise Food Mart #118, Sunshine Food Mart #27 (currently occupied by a BP gasoline station)
- Site 6: Flying J #1096
- Site 7: Sunshine Food Mart #45, Zippy Mart FI522 (currently occupied by a Shell gasoline station)
- Site 8: Chevron #47061 (currently vacant land)
- Site 9: Sunrise Food Mart #62, Tiger Mart (currently Amoco gasoline station)
- Site 10: 7-Eleven Store #40328 (currently occupied by a Sunoco gasoline station and 7-Eleven C-store)

- [Site 15: 7-Eleven Store #37235](#) (currently occupied by a Chevron gasoline station and 7-Eleven C-store)

The tanks were in good condition and no leaks or damaged tanks were observed at the time of the site reconnaissance. Based on this information, these propane tanks are not considered to be a concern in connection with the study corridor at this time.

#### 8.1.5 ASTS/USTS

PSI observed various diesel fuel belly ASTs at the following locations throughout the study corridor:

- [Site 6: Flying J #1096](#)
- The property located between [Site 10: 7-Eleven Store #40328](#) (currently occupied by a Sunoco gasoline station and 7-Eleven C-store) and London Boulevard
- The property north of [Site 12: Pinch-a-Penny](#)
- [Site 13: Publix Super Market No. 760](#)

The ASTs are utilized to fuel the on-site emergency generators. No evidence of leakage, spillage, or corrosion was observed in connection with the ASTs. Given PSI's observations, the ASTs are not considered to be a REC in connection with the subject property at this time.

Additionally, PSI observed three (3) 1,000-lb size propane ASTs at [Site 6: Flying J #1096](#). The cylinders were situated on concrete and appeared to be in good condition. Due to the extremely low boiling point of propane, leaks or spills from these cylinders are not expected to result in contamination of soil or groundwater. Based on the condition of the cylinders at the time of site reconnaissance, these propane ASTs are not considered to be a concern in connection with the study corridor at this time.

PSI also observed one (1) approximately 2,000-gallon chlorine AST at [Site 12: Pinch-a-Penny](#) pool supplies store. PSI did not observe evidence of leaking or staining in connection with the tank contents at the time of site reconnaissance. Based on this information, the presence of the chlorine AST is not considered to be a concern in connection with the study corridor at this time.

PSI observed evidence of USTs throughout the subject corridor. These USTs are discussed in detail in Section 7.1 of this report. Please refer to that section for those additional details and conclusions regarding the observed USTs. Please note, however, given the nature of USTs, the potential of an undetected release associated with the USTs cannot be completely eliminated.

#### 8.1.6 DRUMS OR OTHER BULK CHEMICAL CONTAINERS

PSI observed one (1) grease trap and one (1) aboveground grease receptacle located northeast of the building at Site 14. Two (2) aboveground grease vats were observed south of the buildings located at Sites 12 and 13. An additional aboveground grease receptacle was observed on the west side of Site 1. All of the receptacles are used to store waste kitchen grade cooking oil. The receptacles, and the area in the immediate vicinity,

were stained, which is likely from the transfer of the cooking oil into the receptacles. Based on the contents, the drums and aboveground receptacles of waste kitchen grade cooking oil are not considered to be a concern in connection with the study corridor at this time.

### 8.1.7 DRAINS OR SUMPS

PSI observed stormwater drains in the paved parking areas of the study corridor. PSI did not observe evidence of unusual staining or improper disposal in connection with the observed storm drains, and the storm drains appeared to be in a generally good condition. Based on this information, the observed storm drains are not considered to be a concern in connection with the study corridor at this time.

### 8.1.8 DRINKING WATER/IRRIGATION/MONITORING WELLS

PSI observed monitoring wells on the study corridor. The monitoring wells were located in the following locations:

- Site 1: Days Inn
- Site 3: Mobil Oil Corp SS #CN8 (currently vacant structure)
- Site 4: Sunshine Food Mart #118, Sunshine Food Mart #27 (currently occupied by a BP gasoline station)
- Site 6: Flying J #1096
- Site 7: Sunshine Food Mart #45, Zippy Mart FI522 (currently occupied by a Shell gasoline station)
- Site 8: Chevron #47061 (currently vacant land)
- Site 9: Sunrise Food Mart #62, Tiger Mart (currently Amoco gasoline station)
- Site 10: 7-Eleven Store #40328 (currently occupied by a Sunoco gasoline station and 7-Eleven C-store)
- Site 15: 7-Eleven Store #37235 (currently occupied by a Chevron gasoline station and 7-Eleven C-store)

The monitoring wells appeared to be associated with investigations on the above listed properties. These investigations and facilities are further discussed in Section 7.2 of this report. Please refer to that discussion for additional details.

### 8.1.9 STAINED SOIL OR PAVEMENT

De minimis staining associated with general automotive leaks was apparent in various paved portions of the study corridor. Due to the nature of the staining, they do not appear to be a concern in connection with the study corridor at this time.

Site reconnaissance photographs are included in Appendix B.

## 9.0 CONCLUSIONS AND RECOMMENDATIONS

PSI has conducted a CSER of the study corridor, SR 524 commencing at Friday Road in the southwest section and terminating at Industry Road in the northeast section in Cocoa, Brevard County, Florida. The CSER was performed in accordance with the contract between Consor Engineers LLC and PSI received on June 18, 2024. The purpose of this CSER was to evaluate the risk of encountering petroleum or hazardous substance impacted facilities along the study corridor.

### 9.1 FINDINGS AND CONCLUSIONS

Based on PSI's review of the ERIS Radius Map Report, site reconnaissance, aerial photograph review, city directory review, interviews, and file review conducted on the FDEP's on-line database, three High Risk sites, four Medium Risk sites, five Low Risk sites, and three No Risk sites have been identified within the study corridor. (Please refer to Section 7.2 of this report for risk rating definitions).

### 9.2 RECOMMENDATIONS

Based on investigation of the property for evidence of potential contamination issues and other environmental issues, PSI offers the following recommendations.

- Further assessment may be required to determine the absence or presence and/or levels of soil and/or groundwater impact within the roadway expansion area at the following locations.
  - **Site No. 3: Mobil Oil Corp SS #CN8**
  - **Site No. 4: Sunrise Food Mart #118 (Sunshine Food Mart #27)**
  - **Site No. 6: Flying J #1096**
  - **Site No. 7: Sunshine Food Mart #45**
  - **Site No. 9: Sunrise Food Mart #62**
  - **Site No. 10: 7-Eleven Store #40328**
  - **Site No. 15: 7-Eleven Store #37235**
- Depending on the time frame in which construction activities commence, an updated Public Records review may be warranted prior to construction activities to determine current conditions. Sites having a High Risk of contamination potential should have a Public Records review update prior to construction activities.
- Should dewatering activities be anticipated along the study corridor, then additional assessment activities may be warranted at the above-mentioned sites to obtain information as to the current quality of groundwater prior to the dewatering activities.

## **10.0 CONTRACT INFORMATION**

### **10.1 STANDARD OF CARE AND WARRANTIES**

Our services were not intended to be technically exhaustive. There is a possibility that with the proper application of methodologies, conditions may exist in the study corridor that could not be identified within the scope of the assessment(s) or that were not reasonably identifiable from the available information.

No CSER can wholly eliminate uncertainty regarding the potential for environmental risks in connection with the study corridor. The CSER was intended to reduce, but not eliminate uncertainty regarding the potential for environmental risks in connection with a study corridor.

Our report is based on commonly known and reasonably ascertainable information, including limited, ground-level visual inspection of the study corridor except where otherwise explicitly indicated, in general conformance with the methodology described in Chapter 20 of the FDOT PD&E Manual - 2023 Version and ASTM E 1527-21, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process..

PSI has assumed that factual information provided to us by the Client, or obtained from governmental and historical research firm, the public domain, interviews, and other sources is accurate and unbiased. PSI assumes no liability for the accuracy of data provided to us by others.

PSI did not perform exploratory probing or discovery, perform tests, operate specific equipment, or take measurements or samples to perform the CSER scope. The CSER was not a building code, safety, regulatory or environmental compliance inspection.

The methodologies include reviewing information provided by other sources. PSI treats information obtained from the record reviews and interviews concerning the study corridor as reliable and the ASTM protocol does not require PSI to independently verify the information. Therefore, PSI cannot and does not warrant or guarantee that the information provided by these other sources is accurate or complete.

PSI has performed the services in a manner consistent with that level of care and skill ordinarily exercised by other members of our profession currently practicing in the same locality and under similar conditions, within the limitations of ASTM E1527-21 standard, and the FDOT PD&E Manual guidelines (Chapter 20, 2023 revision) were followed to assess potential contamination.. No other warranties are implied or expressed.

The observations and recommendations presented in this report are time dependent, and conditions will change. This report speaks only as of its date.

### **10.2 RELIANCE**

Consor Engineers LLC, PSI's client, may rely on this report.

### 10.3 USE BY OTHER PARTIES

This report was prepared pursuant to a contract between PSI and its client. That contractual relationship included an exchange of information about the property that was unique and serves as the basis upon which this report was prepared. Because of the importance of these understandings, our assessment may not be sufficient for the intended purposes of another party.

Reliance or any use of this report by anyone other than those parties identified above for which it was prepared, except with express written permission, is prohibited and therefore not foreseeable to PSI. Any unauthorized reliance on or use of this report, including any of the information or conclusions contained herein, will be at the third party's risk. No warranties or representations expressed or implied in this report are made to any such third party.

Third party reliance letters may be issued:

- upon timely request;
- subject to the permission of our original client; and
- payment of the then-current fee for such letters.

All third parties relying on our report, by such reliance, agree that such reliance is limited by our proposal and/or General Conditions, as applicable.

## **Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY**

**Reliance on information in Report:** This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as database review of environmental records.

**License for use of information in Report:** No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

**Your Liability for misuse:** Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

**No warranty of Accuracy or Liability for ERIS:** The information contained in this report has been produced by ERIS Information Inc. ("ERIS") using various sources of information, including information provided by Federal and State government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. # Executive Summary

## Property Information:

**Project Property:** PD&E-CSER SR 524 (Friday Rd-Industry Rd)  
SR524 Cocoa FL 32926

**Project No:** 06636784

### **Coordinates:**

**Latitude:** 28.38547447  
**Longitude:** -80.78539022  
**UTM Northing:** 3,139,923.27  
**UTM Easting:** 521,025.44  
**UTM Zone:** 17R

**Elevation:** 26 FT

## Order Information:

**Order No:** 24062801203  
**Date Requested:** August 28, 2024  
**Requested by:** Intertek PSI  
**Report Type:** Database Report

## Historicals/Products:

**ERIS Xplorer** [ERIS Xplorer](#)  
**Excel Add-On** Excel Add-On

#### Discharge Cleanup Summary

**Discharge Date:** 06/28/1995  
**Cleanup Required:** R - CLEANUP REQUIRED  
**Discharge Cleanup Status:** NFA - NFA COMPLETE  
**Discharge Cleanup Stat Date:** 03/19/2007  
**Eligibility Indicator:** I - INELIGIBLE  
**Site Manager:** CIVIL\_MT  
**Site Manager End Date:** 02/09/2007  
**Tank Office:** PCLP5 - BREVARD COUNTY NATURAL RESOURCES MGMT OFFICE

#### Contaminated Media

**Contaminated Drinking Wells:** 0  
**Contaminated Mntring Wells:** NO  
**Contaminated Soil:** YES  
**Contaminated Surface Water:** NO  
**Contaminated Ground Water:** NO

#### Discharge Cleanup Summary

**Discharge Date:** 03/16/2007  
**Cleanup Required:** N - NO CLEANUP REQUIRED  
**Discharge Cleanup Status:** NREQ - CLEANUP NOT REQUIRED  
**Discharge Cleanup Stat Date:** 09/28/2009  
**Eligibility Indicator:** I - INELIGIBLE  
**Site Manager:** SWANSON\_T  
**Site Manager End Date:** 08/26/2011  
**Tank Office:** PCLP5 - BREVARD COUNTY NATURAL RESOURCES MGMT OFFICE

#### Contaminated Media

**Contaminated Drinking Wells:**  
**Contaminated Mntring Wells:**  
**Contaminated Soil:** YES  
**Contaminated Surface Water:** NO  
**Contaminated Ground Water:**  
**Pollutant:** D - Vehicular Diesel  
**Other Description:**  
**Gallons Discharged:** 115

**On Scene Response:**

## Appendix: Database Descriptions

*Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. ERIS updates databases as set out in ASTM Standard E1527-13 and E1527-21, Section 8.1.8 Sources of Standard Source Information:*

*"Government information from nongovernmental sources may be considered current if the source updates the information at least every 90 days, or, for information that is updated less frequently than quarterly by the government agency, within 90 days of the date the government agency makes the information available to the public."*

### Standard Environmental Record Sources

#### Federal

##### National Priority List:

NPL

Sites on the United States Environmental Protection Agency (EPA)'s National Priorities List of the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Superfund program. The NPL, which EPA is required to update at least once a year, is based primarily on the score a site receives from EPA's Hazard Ranking System. A site must be on the NPL to receive money from the Superfund Trust Fund for remedial action. Sites are represented by boundaries where available in the EPA Superfund Site Boundaries maintained by the Shared Enterprise Geodata and Services (SEGS). Site boundaries represent the footprint of a whole site, the sum of all of the Operable Units and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. Where there is no polygon boundary data available for a given site, the site is represented as a point.

**Government Publication Date: Apr 22, 2024**

##### National Priority List - Proposed:

PROPOSED NPL

Sites proposed by the United States Environmental Protection Agency (EPA), the state agency, or concerned citizens for addition to the National Priorities List (NPL) due to contamination by hazardous waste and identified by the EPA as a candidate for cleanup because it poses a risk to human health and/or the environment. Sites are represented by boundaries where available in the EPA Superfund Site Boundaries maintained by the Shared Enterprise Geodata and Services (SEGS). Site boundaries represent the footprint of a whole site, the sum of all of the Operable Units and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. Where there is no polygon boundary data available for a given site, the site is represented as a point.

**Government Publication Date: Apr 22, 2024**

##### Deleted NPL:

DELETED NPL

Sites deleted from the United States Environmental Protection Agency (EPA)'s National Priorities List. The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425(e), sites may be deleted from the NPL where no further response is appropriate. Sites are represented by boundaries where available in the EPA Superfund Site Boundaries maintained by the Shared Enterprise Geodata and Services (SEGS). Site boundaries represent the footprint of a whole site, the sum of all of the Operable Units and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. Where there is no polygon boundary data available for a given site, the site is represented as a point.

**Government Publication Date: Apr 22, 2024**

##### SEMS List 8R Active Site Inventory:

SEMS

The U.S. Environmental Protection Agency's (EPA) Superfund Program has deployed the Superfund Enterprise Management System (SEMS), which integrates multiple legacy systems into a comprehensive tracking and reporting tool. This inventory contains active sites evaluated by the Superfund program that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The Active Site Inventory Report displays site and location information at active SEMS sites. An active site is one at which site assessment, removal, remedial, enforcement, cost recovery, or oversight activities are being planned or conducted. This data includes SEMS sites from the List 8R Active file as well as applicable sites from the EPA's Facility Registry Service map tool.

**Government Publication Date: Mar 27, 2024**

**Inventory of Open Dumps, June 1985:**

ODI

The Resource Conservation and Recovery Act (RCRA) provides for publication of an inventory of open dumps. The Act defines "open dumps" as facilities which do not comply with EPA's "Criteria for Classification of Solid Waste Disposal Facilities and Practices" (40 CFR 257).

**Government Publication Date: Jun 1985**

**SEMS List 8R Archive Sites:**

SEMS ARCHIVE

The U.S. Environmental Protection Agency's (EPA) Superfund Enterprise Management System (SEMS) Archived Site Inventory displays site and location information at sites archived from SEMS. An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time. This data includes sites from the List 8R Archived site file.

**Government Publication Date: Mar 27, 2024**

**Comprehensive Environmental Response, Compensation and Liability Information System - CERCLIS:**

CERCLIS

Superfund is a program administered by the United States Environmental Protection Agency (EPA) to locate, investigate, and clean up the worst hazardous waste sites throughout the United States. CERCLIS is a database of potential and confirmed hazardous waste sites at which the EPA Superfund program has some involvement. It contains sites that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The EPA administers the Superfund program in cooperation with individual states and tribal governments; this database is made available by the EPA.

**Government Publication Date: Oct 25, 2013**

**EPA Report on the Status of Open Dumps on Indian Lands:**

IODI

Public Law 103-399, The Indian Lands Open Dump Cleanup Act of 1994, enacted October 22, 1994, identified congressional concerns that solid waste open dump sites located on American Indian or Alaska Native (AI/AN) lands threaten the health and safety of residents of those lands and contiguous areas. The purpose of the Act is to identify the location of open dumps on Indian lands, assess the relative health and environment hazards posed by those sites, and provide financial and technical assistance to Indian tribal governments to close such dumps in compliance with Federal standards and regulations or standards promulgated by Indian Tribal governments or Alaska Native entities.

**Government Publication Date: Dec 31, 1998**

**CERCLIS - No Further Remedial Action Planned:**

CERCLIS NFRAP

An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time. The Archive designation means that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL). This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

**Government Publication Date: Oct 25, 2013**

**CERCLIS Liens:**

CERCLIS LIENS

A Federal Superfund lien exists at any property where EPA has incurred Superfund costs to address contamination ("Superfund site") and has provided notice of liability to the property owner. A Federal CERCLA ("Superfund") lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. This database is made available by the United States Environmental Protection Agency (EPA). This database was provided by the United States Environmental Protection Agency (EPA). Refer to SEMS LIEN as the current data source for Superfund Liens.

**Government Publication Date: Jan 30, 2014**

**RCRA CORRACTS-Corrective Action:**

RCRA CORRACTS

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. At these sites, the Corrective Action Program ensures that cleanups occur. EPA and state regulators work with facilities and communities to design remedies based on the contamination, geology, and anticipated use unique to each site.

**Government Publication Date: Apr 8, 2024**

**RCRA non-CORRACTS TSD Facilities:**

RCRA TSD

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. This database includes Non-Corrective Action sites that have indicated engagement in the treatment, storage, or disposal of hazardous waste which requires a RCRA hazardous waste permit.

**Government Publication Date: Apr 8, 2024**

**RCRA Generator List:**[RCRA LQG](#)

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Large Quantity Generators (LQGs) generate 1,000 kilograms per month or more of hazardous waste or more than one kilogram per month of acutely hazardous waste.

**Government Publication Date: Apr 8, 2024**

**RCRA Small Quantity Generators List:**[RCRA SQG](#)

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Small Quantity Generators (SQGs) generate more than 100 kilograms, but less than 1,000 kilograms, of hazardous waste per month.

**Government Publication Date: Apr 8, 2024**

**RCRA Very Small Quantity Generators List:**[RCRA VSQG](#)

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Very Small Quantity Generators (VSQG) generate 100 kilograms or less per month of hazardous waste, or one kilogram or less per month of acutely hazardous waste. Additionally, VSQG may not accumulate more than 1,000 kilograms of hazardous waste at any time.

**Government Publication Date: Apr 8, 2024**

**RCRA Non-Generators:**[RCRA NON GEN](#)

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Non-Generators do not presently generate hazardous waste.

**Government Publication Date: Apr 8, 2024**

**RCRA Sites with Controls:**[RCRA CONTROLS](#)

List of Resource Conservation and Recovery Act (RCRA) facilities with institutional controls in place. RCRA gives the U.S. Environmental Protection Agency (EPA) the authority to control hazardous waste from the "cradle-to-grave." This includes the generation, transportation, treatment, storage, and disposal of hazardous waste. RCRA also set forth a framework for the management of non-hazardous solid wastes. The 1986 amendments to RCRA enabled EPA to address environmental problems that could result from underground tanks storing petroleum and other hazardous substances.

**Government Publication Date: Apr 8, 2024**

**Federal Engineering Controls-ECs:**[FED ENG](#)

List of Engineering controls (ECs) made available by the United States Environmental Protection Agency (EPA). ECs encompass a variety of engineered and constructed physical barriers (e.g., soil capping, sub-surface venting systems, mitigation barriers, fences) to contain and/or prevent exposure to contamination on a property. The EC listing includes remedy component data from Superfund decision documents for applicable sites on the final or deleted on the National Priorities List (NPL); and sites with a Superfund Alternative Approach (SAA) Agreement in place. The only sites included that are not on the NPL; proposed for NPL; or removed from proposed NPL, are those with an SAA Agreement in place.

**Government Publication Date: Apr 22, 2024**

**Federal Institutional Controls-ICs:**[FED INST](#)

List of Institutional controls (ICs) made available by the United States Environmental Protection Agency (EPA). ICs are non-engineered instruments, such as administrative and legal controls, that help minimize the potential for human exposure to contamination and/or protect the integrity of the remedy. Although it is EPA's expectation that treatment or engineering controls will be used to address principal threat wastes and that groundwater will be returned to its beneficial use whenever practicable, ICs play an important role in site remedies because they reduce exposure to contamination by limiting land or resource use and guide human behavior at a site. The IC listing includes remedy component data from Superfund decision documents for applicable sites on the final or deleted on the National Priorities List (NPL); and sites with a Superfund Alternative Approach (SAA) Agreement in place. The only sites included that are not on the NPL; proposed for NPL; or removed from proposed NPL, are those with an SAA Agreement in place.

**Government Publication Date: Apr 22, 2024**

**Land Use Control Information System:**

LUCIS

The LUCIS database is maintained by the U.S. Department of the Navy and contains information for former Base Realignment and Closure (BRAC) properties across the United States.

**Government Publication Date:** Sep 1, 2006

**Institutional Control Boundaries at NPL sites:**

NPL IC

Boundaries of Institutional Control areas at sites on the United States Environmental Protection Agency (EPA)'s National Priorities List, or Proposed or Deleted, made available by the EPA's Shared Enterprise Geodata and Services (SEGS). United States Environmental Protection Agency (EPA)'s National Priorities List of the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Superfund program. Institutional controls are non-engineered instruments such as administrative and legal controls that help minimize the potential for human exposure to contamination and/or protect the integrity of the remedy.

**Government Publication Date:** Apr 22, 2024

**Emergency Response Notification System:**

ERNS 1982 TO 1986

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

**Government Publication Date:** 1982-1986

**Emergency Response Notification System:**

ERNS 1987 TO 1989

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

**Government Publication Date:** 1987-1989

**Emergency Response Notification System:**

ERNS

Database of oil and hazardous substances spill reports made available by the United States Coast Guard National Response Center (NRC). The NRC fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. These data contain initial incident data that has not been validated or investigated by a federal/state response agency.

**Government Publication Date:** Apr 28, 2024

**The Assessment, Cleanup and Redevelopment Exchange System (ACRES) Brownfield Database:**

FED BROWNFIELDS

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties protects the environment, reduces blight, and takes development pressures off greenspaces and working lands. This data is provided by the United States Environmental Protection Agency (EPA) and includes Brownfield sites from the Cleanups in My Community (CIMC) web application.

**Government Publication Date:** Feb 7, 2024

**FEMA Underground Storage Tank Listing:**

FEMA UST

The Federal Emergency Management Agency (FEMA) of the Department of Homeland Security maintains a list of FEMA owned underground storage tanks.

**Government Publication Date:** Dec 31, 2017

**Facility Response Plan:**

FRP

This listing contains facilities that have submitted Facility Response Plans (FRPs) to the U.S. Environmental Protection Agency (EPA). Facilities that could reasonably be expected to cause "substantial harm" to the environment by discharging oil into or on navigable waters are required to prepare and submit FRPs. Harm is determined based on total oil storage capacity, secondary containment and age of tanks, oil transfer activities, history of discharges, proximity to a public drinking water intake or sensitive environments. This listing includes FRP facilities from an applicable EPA FOIA file and Homeland Infrastructure Foundation-Level Data (HIFLD) data file.

**Government Publication Date:** Jan 9, 2024

**Delisted Facility Response Plans:**

DELISTED FRP

Facilities that once appeared in - and have since been removed from - the list of facilities that have submitted Facility Response Plans (FRP) to EPA. Facilities that could reasonably be expected to cause "substantial harm" to the environment by discharging oil into or on navigable waters are required to prepare and submit Facility Response Plans (FRPs). Harm is determined based on total oil storage capacity, secondary containment and age of tanks, oil transfer activities, history of discharges, proximity to a public drinking water intake or sensitive environments.

**Government Publication Date:** Jan 9, 2024

**Historical Gas Stations:****HIST GAS STATIONS**

This historic directory of service stations is provided by the Cities Service Company. The directory includes Cities Service filling stations that were located throughout the United States in 1930.

**Government Publication Date:** Jul 1, 1930

**Petroleum Refineries:****REFN**

List of petroleum refineries from the U.S. Energy Information Administration (EIA) Refinery Capacity Report. Includes operating and idle petroleum refineries (including new refineries under construction) and refineries shut down during the previous year located in the 50 States, the District of Columbia, Puerto Rico, the Virgin Islands, Guam, and other U.S. possessions. Survey locations adjusted using public data.

**Government Publication Date:** Feb 28, 2024

**Petroleum Product and Crude Oil Rail Terminals:****BULK TERMINAL**

A list of petroleum product and crude oil rail terminals from the U.S. Energy Information Administration (EIA), as well as petroleum terminals sourced from the Federal Communications Commission Data hosted by the Homeland Infrastructure Foundation-Level Database. Data includes operable bulk petroleum product terminals with a total bulk shell storage capacity of 50,000 barrels or more, and/or the ability to receive volumes from tanker, barge, or pipeline; also rail terminals handling the loading and unloading of crude oil with activity between 2017 and 2018. EIA petroleum product terminal data comes from the EIA-815 Bulk Terminal and Blender Report, which includes working, shell in operation, and shell idle for several major product groupings.

**Government Publication Date:** Jun 6, 2024

**LIEN on Property:****SEMS LIEN**

The U.S. Environmental Protection Agency's (EPA) Superfund Enterprise Management System (SEMS) provides Lien details on applicable properties, such as the Superfund lien on property activity, the lien property information, and the parties associated with the lien.

**Government Publication Date:** Mar 27, 2024

**Superfund Decision Documents:****SUPERFUND ROD**

This database contains a list of decision documents for Superfund sites. Decision documents serve to provide the reasoning for the choice of (or) changes to a Superfund Site cleanup plan. The decision documents include completed Records of Decision (ROD), ROD Amendments, Explanations of Significant Differences (ESD) for active and archived sites stored in the Superfund Enterprise Management System (SEMS), along with other associated memos and files. This information is maintained and made available by the U.S. Environmental Protection Agency.

**Government Publication Date:** Mar 27, 2024

**Formerly Utilized Sites Remedial Action Program:****DOE FUSRAP**

The U.S. Department of Energy (DOE) established the Formerly Utilized Sites Remedial Action Program (FUSRAP) in 1974 to remediate sites where radioactive contamination remained from the Manhattan Project and early U.S. Atomic Energy Commission (AEC) operations. The DOE Office of Legacy Management (LM) established long-term surveillance and maintenance (LTS&M) requirements for remediated FUSRAP sites. DOE evaluates the final site conditions of a remediated site on the basis of risk for different future uses. DOE then confirms that LTS&M requirements will maintain protectiveness.

**Government Publication Date:** Mar 4, 2017

**State****Superfund Waste Cleanup & State-Funded Action Sites:****SHWS**

List of hazardous waste cleanup sites participating in various federal and state funded cleanup programs. Florida's State-Funded Action Sites and Superfund Waste Cleanup Sites lists are maintained and made available by the Florida Department of Environmental Protection (FDEP). This database is state equivalent CERCLIS.

**Government Publication Date:** Apr 3, 2024

**Delisted State-Funded Action Sites:****DELISTED SHWS**

This database contains a list of closed hazardous waste sites of various federal and state funded cleanup programs that were removed from the Florida Department of Environmental Protection (FDEP).

**Government Publication Date:** Apr 3, 2024

**ERIC Waste Cleanup:****ERIC**

Environmental Restoration Integrated Cleanup (ERIC) is a single database for tracking contaminated site cleanup activities in the Florida Department of Environmental Protection (DEP)'s Division of Waste Management (DWM). Includes records from 11 different DEP data systems, allowing tracking of a contaminated site throughout the course of cleanup regardless of which program area took the lead.

**Florida Department of Environmental Protection Cleanup Sites:**

[CLEANUP DEP](#)

The Cleanup Sites layer feeds the FDEP's Contamination Locator Map (CLM). It provides locations and document links for sites currently in the cleanup process and sites awaiting cleanup funding. Cleanup programs include: Brownfields, Petroleum, EPA Superfund (CERCLA), Drycleaning, Responsible Party Cleanup, State Funded Cleanup, State Owned Lands Cleanup and Hazardous Waste Cleanup.

Government Publication Date: May 29, 2024

**Waste Cleanup Responsible Party Sites:**

[WCRPS](#)

List of Open, Closed, and Inactive Waste Cleanup Responsible Party sites made available by the Florida Department of Environmental Protection.

Government Publication Date: Apr 11, 2021

**Delisted Waste Cleanup Sites:**

[DELISTED WCP](#)

List of sites which once appeared on - and have since been removed from - the list of Waste Cleanup Sites made available by the Florida Department of Environmental Protection.

Government Publication Date: May 28, 2024

**Solid Waste Facilities and Landfills:**

[SWF/LF](#)

The Solid Waste Facility Inventory Report made available by the Florida Department of Environmental Protection (FDEP) includes all types of authorized and unauthorized facilities: municipal solid waste, landfills, dumps, construction and demolition disposal, recycling facilities, and more.

Government Publication Date: Jun 12, 2024

**Leaking Tanks:**

[LST](#)

The Storage Tank Regulation Section is part of the Petroleum Restoration Program in the Florida Department of Environmental Protection (FDEP)'s Division of Waste Management. In 1983, Florida was one of the first states in the union to pass legislation and adopt rules for underground and aboveground storage tank systems. Since then, over 28,000 facilities have reported discharges of petroleum products from storage tank systems. Florida relies on groundwater for about 92 percent of its drinking water needs, and has some of the most stringent rules in the country.

Government Publication Date: Apr 22, 2024

**Delisted Leaking Tanks:**

[DELISTED LST](#)

Whereas Leaking Tanks (LST) includes only facilities which currently have contamination as recorded by the Florida Department of Environmental Protection, this list contains facilities which were once included in LST data but no longer appear on the list made available by FDEP. Facilities may be removed from the current LST list because the discharge has been cleaned up, or the discharge is not required for 62-770.

Government Publication Date: Jun 4, 2024

**Underground Storage Tanks:**

[UST](#)

List of Underground Storage Tank facilities made available by the Florida Department of Environmental Protection (FL DEP). Includes facilities tracked for active storage tanks, storage tank history, or petroleum cleanup activity. In an effort to minimize the occurrence and environmental risks of releases and discharges, FDEP administers standards pertaining to the construction, installation, operation, maintenance, repair, closure, and disposal of underground storage tank systems that store regulated substances.

Government Publication Date: May 30, 2024

**Aboveground Storage Tanks:**

[AST](#)

List of Aboveground Storage Tank facilities made available by the Florida Department of Environmental Protection (FL DEP). Includes facilities tracked for active storage tanks, storage tank history, or petroleum cleanup activity. The Florida Department of Environmental Protection (FDEP) provides standards for aboveground storage tanks (ASTs) that have individual storage tank capacities greater than 550 gallons. The state also regulates the registration, construction, installation, operation, maintenance, repair, closure, and disposal of storage tank systems that store regulated substances.

Government Publication Date: May 30, 2024

**Storage Tank Facilities:**

[TANK](#)

List of storage tank facilities made available by the Florida Department of Environmental Protection (FL DEP) for which tank information is not available. In the case of closed facilities - where all tanks have been removed or closed, and there is also no petroleum discharge or on-going cleanup activity - the owner data may not be current, but rather would represent the most recent information made available to FL DEP.

Government Publication Date: May 30, 2024

**Delisted AST UST Storage Tanks:**

[DEL UST AST TANK](#)

This database contains a list of closed UST and AST storage tank sites that were removed from the Florida Department of Environmental Protection (FDEP) storage tank database.

**Delisted Storage Tanks:**

[DEL STORAGE TANK](#)

List of sites that once appeared on - and have since been removed from - the list of UST and AST storage tank facilities made available by the Florida Department of Environmental Protection.

Government Publication Date: Jun 20, 2024

**Federal Facilities Listing:**

[FF TANKS](#)

The Florida Department of Environmental Protection (FDEP) Storage Tank Program registers facilities and storage tanks where aboveground or underground storage tanks store pollutants, hazardous substances, and/or mineral acid substances regulated by Chapter 62-761, Florida Administrative Code, or when aboveground storage tanks or compression vessels store a hazardous substance which requires registration according to Chapter 376, Florida Statutes.

Government Publication Date: Mar 25, 2024

**Storage Tank/Contaminated Facility Search:**

[STCS](#)

List of facilities and tanks in the Florida Department of Environmental Protection (FDEP) Bureau of Petroleum Storage Systems Storage Tank/Contaminated Facility Search. Note that tank details do not appear for facilities for which all tanks have been removed.

Government Publication Date: Apr 24, 2024

**Institutional Controls Registry:**

[INST](#)

The Institutional Controls registry is maintained by the Florida Department of Environmental Protection (FDEP). The registry aims to help preserve adequate protection of contaminated soil regions and help to minimize any chances of exposure.

Government Publication Date: Jun 19, 2024

**Engineering Controls:**

[ENG](#)

A listing of all engineering controls that are in place to eliminate or reduce the potential for contaminant migration and exposure to contaminants. These controls may include caps, barriers, guards or fences. The list is maintained by the Florida Department of Environmental Protection (FDEP).

Government Publication Date: Jun 19, 2024

**Voluntary Cleanup Sites:**

[VCP](#)

A listing of active and closed voluntary cleanup sites registered by the Florida Department of Environmental Protection (FDEP).

Government Publication Date: Jul 1, 2022

**Brownfield Sites:**

[BROWNFIELDS](#)

Brownfields are defined by the Florida Department of Environmental Protection (FDEP) as abandoned, idled, or underused industrial and commercial facilities where expansion or redevelopment is complicated by real or perceived environmental contamination. This is a list of sites within designated Brownfield Areas within Florida where Brownfield Site Rehabilitation Agreement (BSRA)s have been executed between FDEP and a responsible party.

Government Publication Date: Jan 16, 2024

**Brownfield Areas:**

[BROWNFIELD AREA](#)

Brownfields are defined by the Florida Department of Environmental Protection (FDEP) as abandoned, idled, or underused industrial and commercial facilities where expansion or redevelopment is complicated by real or perceived environmental contamination. This is a list of Brownfield Areas, defined by the FDEP as contiguous areas of one or more brownfield sites, some of which may not be contaminated, that have been designated as such by a local government resolution. Such areas may include all or portions of community redevelopment areas, enterprise zones, empowerment zones, other such designated economically deprived communities and areas, and Environmental Protection Agency (EPA) designated brownfield pilot projects. Because a variety of sources and methods were used to derive information for this data, locations are approximate.

Government Publication Date: Apr 2, 2024

**Hazardous Waste Facility List:**

[HAZ WASTE FAC](#)

List of Hazardous Waste Financial Assurance Facilities made available by the Division of Waste Management of the Florida Department of Environmental Protection (FDEP). The FDEP's Hazardous waste financial responsibility requirements exist to ensure that certain hazardous waste facilities and transporters have the financial resources available to provide for closure, postclosure and corrective action requirements and/or pay for bodily injury or property damage that might result from accidents, spills or other unexpected events, known as liabilities. These closure, postclosure, corrective action and liability requirements are called financial assurance.

Government Publication Date: Apr 3, 2024

## **Tribal**

### **Leaking Underground Storage Tanks on Tribal/Indian Lands:**

INDIAN LUST

This list of leaking underground storage tanks (LUSTs) on Tribal/Indian Lands in Region 4, which includes Florida, is made available by the United States Environmental Protection Agency (EPA).

**Government Publication Date: May 14, 2024**

### **Underground Storage Tanks on Tribal/Indian Lands:**

INDIAN UST

This list of underground storage tanks (USTs) on Tribal/Indian Lands in Region 4, which includes Florida, is made available by the United States Environmental Protection Agency (EPA).

**Government Publication Date: May 14, 2024**

### **Delisted Tribal Leaking Storage Tanks:**

DELISTED INDIAN LST

Leaking Underground Storage Tank (LUST) facilities which once appeared on - and have since been removed from - the Regional Tribal/Indian LUST lists made available by the United States Environmental Protection Agency (EPA).

**Government Publication Date: May 7, 2024**

### **Delisted Tribal Underground Storage Tanks:**

DELISTED INDIAN UST

Underground Storage Tank (UST) facilities which once appeared on - and have since been removed from - the Regional Tribal/Indian UST lists made available by the United States Environmental Protection Agency (EPA).

**Government Publication Date: May 7, 2024**

## **County**

**No County databases were selected to be included in the search.**

## **Additional Environmental Record Sources**

### **Federal**

#### **PFAS Greenhouse Gas Emissions Data:**

PFAS GHG

The U.S. Environmental Protection Agency's Greenhouse Gas Reporting Program (GHGRP) collects Greenhouse Gas (GHG) data from large emitting facilities (25,000 metric tons of carbon dioxide equivalent (CO<sub>2</sub>e) per year), and suppliers of fossil fuels and industrial gases that results in GHG emissions when used. Includes GHG emissions data for facilities that emit or have emitted since 2010 chemicals identified in EPA's CompTox Chemicals Dashboard list of PFAS without explicit structures and list of PFAS structures by DSSTox. PFAS emissions data has been identified for facilities engaged in the following industrial processes: Aluminum Production (GHGRP Subpart F), HCFC-22 Production and HFC-23 Destruction (Subpart O), Electronics Manufacturing (Subpart I), Fluorinated Gas Production (Subpart L), Magnesium Production (Subpart T), Electrical Transmission and Distribution Equipment Use (Subpart DD), and Manufacture of Electric Transmission and Distribution Equipment (Subpart SS). Over time, other industrial processes with required GHGRP reporting may include PFAS emissions data and the list of reportable gases may change over time.

**Government Publication Date: May 9, 2024**

#### **On-Scene Coordinator Response Sites:**

OSC RESPONSE

This list of On-Scene Coordinator (OSC) Response Sites is provided by the U.S. Environmental Protection Agency (EPA). OSCs are the federal officials responsible for monitoring or directing responses to all oil spills and hazardous substance releases reported to the federal government. OSCs coordinate all federal efforts with, and provide support and information to local, state, and regional response communities. An OSC is an agent of either EPA or the U.S. Coast Guard (USCG), depending on where the incident occurs. EPA's OSCs have primary responsibility for spills and releases to inland areas and waters. USCG OSCs have responsibility for coastal waters and the Great Lakes. In general, an OSC has the following key responsibilities during and after a response: Assessment, Monitoring, Response Assistance, and Evaluation.

**Government Publication Date: Apr 4, 2024**

#### **Facility Registry Service/Facility Index:**

FINDS/FRS

The Facility Registry Service (FRS) is a centrally managed database that identifies facilities, sites, or places subject to environmental regulations or of environmental interest. FRS creates high-quality, accurate, and authoritative facility identification records through rigorous verification and management procedures that incorporate information from program national systems, state master facility records, and data collected from EPA's Central Data Exchange registrations and data management personnel. This list is made available by the U.S. Environmental Protection Agency (EPA).

**Government Publication Date: Feb 9, 2024**

**Toxics Release Inventory (TRI) Program:**

TRIS

The U.S. Environmental Protection Agency's Toxics Release Inventory (TRI) is a database containing data on disposal or other releases of toxic chemicals from U.S. facilities and information about how facilities manage those chemicals through recycling, energy recovery, and treatment. There are currently 770 individually listed chemicals and 33 chemical categories covered by the TRI Program. Facilities that manufacture, process or otherwise use these chemicals in amounts above established levels must submit annual reporting forms for each chemical. Note that the TRI chemical list does not include all toxic chemicals used in the U.S. One of TRI's primary purposes is to inform communities about toxic chemical releases to the environment. This database includes TRI Reporting Data for calendar years 1987 through 2021 and Preliminary Data for 2022.

**Government Publication Date: Sep 20, 2023**

**PFOA/PFOS Contaminated Sites:**

PFAS NPL

This list of Superfund Sites with Per- and Polyfluoroalkyl Substances (PFAS) detections is made available by the U.S. Environmental Protection Agency (EPA) in their PFAS Analytic Tools data, previously the list was obtained by EPA FOIA requests. EPA's Office of Land and Emergency Management and EPA Regional Offices maintain what is known about site investigations, contamination, and remedial actions under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) where PFAS is present in the environment. Limitations: Detections of PFAS at National Priorities List (NPL) sites do not mean that people are at risk from PFAS, are exposed to PFAS, or that the site is the source of the PFAS. The information in the Superfund NPL and Superfund Alternative Agreement (SAA) PFAS detection site list is years old and may not be accurate today. Site information such as site name, site ID, and location has been confirmed for accuracy; however, PFAS-related information such as media sampled, drinking water being above the health advisory, or mitigation efforts has not been verified. For Federal Facilities data, the other Federal agencies (OFA) are the lead agency for their data and provided them to EPA.

**Government Publication Date: Jun 20, 2024**

**Federal Agency Locations with Known or Suspected PFAS Detections:**

PFAS FED SITES

List of Federal agency locations with known or suspected detections of Per- and Polyfluoroalkyl Substances (PFAS), made available by the U.S. Environmental Protection Agency (EPA) in their PFAS Analytic Tools data. EPA outlines that these data are gathered from several federal entities, such as the Federal Superfund program, Department of Defense (DOD), National Aeronautics and Space Administration, Department of Transportation, and Department of Energy. The dates this data was extracted for the PFAS Analytic Tools range from 2022 to 2024. Sites on this list do not necessarily reflect the source/s of PFAS contamination and detections do not indicate level of risk or human exposure at the site. Agricultural notifications in this data are limited to DOD sites only. At this time, the EPA is aware that this list is not comprehensive of all Federal agencies.

**Government Publication Date: Apr 1, 2024**

**SSEHRI PFAS Contamination Sites:**

PFAS SSEHRI

This PFAS Contamination Site Tracker database is compiled by the Social Science Environmental Health Research Institute (SSEHRI) at Northeastern University. According to the SSEHRI, the database records qualitative and quantitative data from each known site of PFAS contamination, including timeline of discovery, sources, levels, health impacts, community response, and government response. The goal of this database is to compile information and support public understanding of the rapidly unfolding issue of PFAS contamination. All data presented was extracted from government websites, news articles, or publicly available documents, and this is cited in the tracker. Locations for the Known PFAS Contamination Sites are sourced from the PFAS Sites and Community Resources Map, credited to the Northeastern University's PFAS Project Lab, Silent Spring Institute, and the PFAS-REACH team. Disclaimer: The source conveys the data undergoes regular updates as new information becomes available, some sites may be missing and/or contain information that is incorrect or outdated, as well as their information represents all contamination sites SSEHRI is aware of, not all possible contamination sites. This data is not intended to be used for legal purposes. Access the following source link for the most current information: <https://pfasproject.com/pfas-sites-and-community-resources/>

**Government Publication Date: May 19, 2023**

**National Response Center PFAS Spills:**

ERNS PFAS

This Per- and Poly-Fluoroalkyl Substances (PFAS) Spills dataset is made available via the U.S. Environmental Protection Agency's (EPA) PFAS Analytic Tools. The National Response Center (NRC), operated by the U.S. Coast Guard, is the designated federal point of contact for reporting all oil, chemical, and other discharges into the environment, for the United States and its territories. This dataset contains NRC spill information from 1990 to the present that is restricted to records associated with PFAS and PFAS-containing materials. Incidents are filtered to include only records with a "Material Involved" or "Incident Description" related to Aqueous Film Forming Foam (AFFF). The keywords used to filter the data included "AFFF," "Fire Fighting Foam," "Aqueous Film Forming Foam," "Fire Suppressant Foam," "PFAS," "PERFL," "PFOA," "PFOS," and "Genx." Limitations: The data from the NRC website contains initial incident data that has not been validated or investigated by a federal/state response agency. Keyword searches may misidentify some incident reports that do not contain PFAS. This dataset should also not be considered to be exhaustive of all PFAS spills/release incidents.

**Government Publication Date: Apr 17, 2024**

**PFAS NPDES Discharge Monitoring:**

PFAS NPDES

This list of National Pollutant Discharge Elimination System (NPDES) permitted facilities with required monitoring for Per- and Polyfluoroalkyl (PFAS) Substances is made available via the U.S. Environmental Protection Agency (EPA)'s PFAS Analytic Tools. Any point-source wastewater discharger to waters of the United States must have a NPDES permit, which defines a set of parameters for pollutants and monitoring to ensure that the discharge does not degrade water quality or impair human health. This list includes NPDES permitted facilities associated with permits that monitor for Per- and Polyfluoroalkyl Substances (PFAS), limited to the years 2007 - present. EPA further advises the following regarding these data: currently, fewer than half of states have required PFAS monitoring for at least one of their permittees, and fewer states have established PFAS effluent limits for permittees. For states that may have required monitoring, some reporting and data transfer issues may exist on a state-by-state basis.

**Government Publication Date: May 6, 2024**

**Perfluorinated Alkyl Substances (PFAS) from Toxic Release Inventory:**

**PFAS TRI**

List of Toxics Release Inventory (TRI) facilities at which the reported chemical is a per- or polyfluoroalkyl (PFAS) substance included in the U.S. Environmental Protection Agency's (EPA) consolidated PFAS Master List of PFAS Substances. Encompasses Toxics Release Inventory records included in the EPA PFAS Analytic Tools. The EPA's TRI database currently tracks information on disposal or releases of 770 individually listed toxic chemicals and 33 chemical categories from thousands of U.S. facilities and details about how facilities manage those chemicals through recycling, energy recovery, and treatment. This listing includes TRI Reporting Data for calendar years 1987 through 2021 and Preliminary Data for 2022.

**Government Publication Date: Sep 20, 2023**

**Perfluorinated Alkyl Substances (PFAS) Water Quality:**

**PFAS WATER**

The Water Quality Portal (WQP) is a cooperative service sponsored by the United States Geological Survey (USGS), the Environmental Protection Agency (EPA), and the National Water Quality Monitoring Council (NWQMC). This listing includes records from the Water Quality Portal where the characteristic (environmental measurement) is in the Environmental Protection Agency (EPA)'s consolidated Master List of PFAS Substances.

**Government Publication Date: Jul 20, 2020**

**PFAS TSCA Manufacture and Import Facilities:**

**PFAS TSCA**

The U.S. Environmental Protection Agency (EPA) issued the Chemical Data Reporting (CDR) Rule under the Toxic Substances Control Act (TSCA) and requires chemical manufacturers and facilities that manufacture or import chemical substances to report data to EPA. This list is specific only to TSCA Manufacture and Import Facilities with reported per- and poly-fluoroalkyl (PFAS) substances. Data file is sourced from EPA's PFAS Analytic Tools TSCA dataset which includes CDR/Inventory Update Reporting data from 1998 up to 2020. Disclaimer: This data file includes production and importation data for chemicals identified in EPA's CompTox Chemicals Dashboard list of PFAS without explicit structures and list of PFAS structures in DSSTox. Note that some regulations have specific chemical structure requirements that define PFAS differently than the lists in EPA's CompTox Chemicals Dashboard. Reporting information on manufactured or imported chemical substance amounts should not be compared between facilities, as some companies claim Chemical Data Reporting Rule data fields for PFAS information as Confidential Business Information.

**Government Publication Date: Jan 5, 2023**

**PFAS Waste Transfers from RCRA e-Manifest :**

**PFAS E-MANIFEST**

This Per- and Poly-Fluoroalkyl Substances (PFAS) Waste Transfers dataset is made available via the U.S. Environmental Protection Agency's (EPA) PFAS Analytic Tools. Every shipment of hazardous waste in the U.S. must be accompanied by a shipment manifest, which is a critical component of the cradle-to-grave tracking of wastes mandated by the Resource Conservation and Recovery Act (RCRA). According to the EPA, currently no Federal Waste Code exists for any PFAS compounds. To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: • PFAS • PFOA • PFOS • PERFL • AFFF • GENX • GEN-X (plus the Vermont state-specific waste codes). Limitations: Amount or concentration of PFAS being transferred cannot be determined from the manifest information. Keyword searches may misidentify some manifest records that do not contain PFAS. This dataset should also not be considered to be exhaustive of all PFAS waste transfers.

**Government Publication Date: Apr 29, 2024**

**PFAS Industry Sectors:**

**PFAS IND**

This Per- and Poly-Fluoroalkyl Substances (PFAS) Industry Sectors dataset is made available via the U.S. Environmental Protection Agency's (EPA) PFAS Analytic Tools. The EPA developed the dataset from various sources that show which industries may be handling PFAS including: EPA's Enforcement and Compliance History Online (ECHO) records restricted to potential PFAS-handling industry sectors; ECHO records for Fire Training Sites identified where fire-fighting foam may have been used in training exercises; and 14 CFR Part 139 Airports compiled from historic and current records from the FAA Airport Data and Information Portal. Since July 2006, all certificated Part 139 Airports are required to have fire-fighting foam onsite that meet certain military specifications, which to date have been fluorinated (Aqueous Film Forming Foam). Limitations: Inclusion in this dataset does not indicate that PFAS are being manufactured, processed, used, or released by the facility. Listed facilities potentially handle PFAS based on their industrial profile, but are unconfirmed by the EPA. Keyword searches in ECHO for Fire Training sites may misidentify some facilities and should not be considered to be an exhaustive list of fire training facilities in the U.S.

**Government Publication Date: Apr 15, 2024**

**Hazardous Materials Information Reporting System:**

**HMIRS**

The Hazardous Materials Incident Reporting System (HMIRS) database contains unintentional hazardous materials release information reported to the U.S. Department of Transportation, Pipeline and Hazardous Materials Safety Administration.

**Government Publication Date: Nov 26, 2023**

**National Clandestine Drug Labs:**

**NCDL**

The U.S. Department of Justice ("the Department"), Drug Enforcement Administration (DEA), provides this data as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy.

**Government Publication Date: Nov 30, 2023**

**Toxic Substances Control Act:**

**TSCA**

The U.S. Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule. The CDR enables EPA to collect and publish information on the manufacturing, processing, and use of commercial chemical substances and mixtures (referred to hereafter as chemical substances) on the TSCA Chemical Substance Inventory (TSCA Inventory). This includes current information on chemical substance production volumes, manufacturing sites, and how the chemical substances are used. This information helps the Agency determine whether people or the environment are potentially exposed to reported chemical substances. EPA publishes submitted CDR data that is not Confidential Business Information (CBI). EPA CDR collections occur approximately every four years and reporting requirements change per collection.

**Government Publication Date: May 12, 2022**

**Hist TSCA:**

**HIST TSCA**

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.

The 2006 IUR data summary report includes information about chemicals manufactured or imported in quantities of 25,000 pounds or more at a single site during calendar year 2005. In addition to the basic manufacturing information collected in previous reporting cycles, the 2006 cycle is the first time EPA collected information to characterize exposure during manufacturing, processing and use of organic chemicals. The 2006 cycle also is the first time manufacturers of inorganic chemicals were required to report basic manufacturing information.

**Government Publication Date: Dec 31, 2006**

**FTTS Administrative Case Listing:**

**FTTS ADMIN**

An administrative case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

**Government Publication Date: Jan 19, 2007**

**FTTS Inspection Case Listing:**

**FTTS INSP**

An inspection case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

**Government Publication Date: Jan 19, 2007**

**Potentially Responsible Parties List:**

**PRP**

Early in the site cleanup process, the U.S. Environmental Protection Agency (EPA) conducts a search to find the Potentially Responsible Parties (PRPs). The EPA looks for evidence to determine liability by matching wastes found at the site with parties that may have contributed wastes to the site. This listing contains PRPs, Noticed Parties, at sites in the EPA's Superfund Enterprise Management System (SEMS).

**Government Publication Date: Apr 22, 2024**

**State Coalition for Remediation of Drycleaners Listing:**

**SCRD DRYCLEANER**

The State Coalition for Remediation of Drycleaners (SCRD) was established in 1998, with support from the U.S. Environmental Protection Agency (EPA) Office of Superfund Remediation and Technology Innovation. Coalition members are states with mandated programs and funding for drycleaner site remediation. Current members are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin. Since 2017, the SCRd no longer maintains this data, refer to applicable state source data where available.

**Government Publication Date: Nov 08, 2017**

**Integrated Compliance Information System (ICIS):**

**ICIS**

The Integrated Compliance Information System (ICIS) database contains integrated enforcement and compliance information across most of U.S. Environmental Protection Agency's (EPA) programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained by the EPA Headquarters and at the Regional offices. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.

**Government Publication Date:** Apr 13, 2024

**Drycleaner Facilities:**

**FED DRYCLEANERS**

A list of drycleaner facilities from Enforcement and Compliance History Online (ECHO) data as made available by the U.S. Environmental Protection Agency (EPA), sourced from the ECHO Exporter file. The EPA tracks facilities that possess NAIC and SIC codes that classify businesses as drycleaner establishments.

**Government Publication Date:** May 5, 2024

**Delisted Drycleaner Facilities:**

**DELISTED FED DRY**

List of sites removed from the list of Drycleaner Facilities (sites in the EPA's Integrated Compliance Information System (ICIS) with NAIC or SIC codes identifying the business as a drycleaner establishment).

**Government Publication Date:** May 5, 2024

**Formerly Used Defense Sites:**

**FUDS**

Formerly Used Defense Sites (FUDS) are properties that were formerly owned by, leased to, or otherwise possessed by and under the jurisdiction of the Secretary of Defense prior to October 1986, where the Department of Defense (DOD) is responsible for an environmental restoration. The FUDS Annual Report to Congress (ARC) is published by the U.S. Army Corps of Engineers (USACE). This data is compiled from the USACE's Geospatial FUDS data layers and Homeland Infrastructure Foundation-Level Data (HIFLD) FUDS dataset which applies to the Fiscal Year 2021 FUDS Inventory.

**Government Publication Date:** May 15, 2023

**FUDS Munitions Response Sites:**

**FUDS MRS**

Boundaries of Munitions Response Sites (MRS), published with the Formerly Used Defense Sites (FUDS) Annual Report to Congress (ARC) by the U.S. Army Corps of Engineers (USACE). An MRS is a discrete location within a Munitions response area (MRA) that is known to require a munitions response. An MRA means any area on a defense site that is known or suspected to contain unexploded ordnance (UXO), discarded military munitions (DMM), or munitions constituents (MC). This data is compiled from the USACE's Geospatial MRS data layers and Homeland Infrastructure Foundation-Level Data (HIFLD) MRS dataset.

**Government Publication Date:** May 15, 2023

**Former Military Nike Missile Sites:**

**FORMER NIKE**

This information was taken from report DRXTH-AS-IA-83A016 (Historical Overview of the Nike Missile System, 12/1984) which was performed by Environmental Science and Engineering, Inc. for the U.S. Army Toxic and Hazardous Materials Agency Assessment Division. The Nike system was deployed between 1954 and the mid-1970's. Among the substances used or stored on Nike sites were liquid missile fuel (JP-4); starter fluids (UDKH, aniline, and furfuryl alcohol); oxidizer (IRFNA); hydrocarbons (motor oil, hydraulic fluid, diesel fuel, gasoline, heating oil); solvents (carbon tetrachloride, trichloroethylene, trichloroethane, stoddard solvent); and battery electrolyte. The quantities of material a disposed of and procedures for disposal are not documented in published reports. Virtually all information concerning the potential for contamination at Nike sites is confined to personnel who were assigned to Nike sites. During deactivation most hardware was shipped to depot-level supply points. There were reportedly instances where excess materials were disposed of on or near the site itself at closure. There was reportedly no routine site decontamination.

**Government Publication Date:** Dec 2, 1984

**PHMSA Pipeline Safety Flagged Incidents:**

**PIPELINE INCIDENT**

This list of flagged pipeline incidents is made available by the U.S. Department of Transportation (US DOT) Pipeline and Hazardous Materials Safety Administration (PHMSA). PHMSA regulations require incident and accident reports for five different pipeline system types. Accidents reported on hazardous liquid gravity lines (§195.13) and reporting-regulated-only hazardous liquid gathering lines (§195.15) and incidents reported on Type R gas gathering (§192.8(c)) are not included in the flagged incident file data.

**Government Publication Date:** May 6, 2024

**Material Licensing Tracking System (MLTS):**

**MLTS**

A list of sites that store radioactive material subject to the Nuclear Regulatory Commission (NRC) licensing requirements. This list is maintained by the NRC. As of September 2016, the NRC no longer releases location information for sites. Site locations were last received in July 2016.

**Government Publication Date:** May 11, 2021

#### **Historic Material Licensing Tracking System (MLTS) sites:**

HIST MLTS

A historic list of sites that have inactive licenses and/or removed from the Material Licensing Tracking System (MLTS). In some cases, a site is removed from the MLTS when the state becomes an "Agreement State". An Agreement State is a State that has signed an agreement with the Nuclear Regulatory Commission (NRC) authorizing the State to regulate certain uses of radioactive materials within the State.

**Government Publication Date: Jan 31, 2010**

#### **Mines Master Index File:**

MINES

The Master Index File (MIF) is provided by the United States Department of Labor, Mine Safety and Health Administration (MSHA). This file, which was originally created in the 1970's, contained many Mine-IDs that were invalid. MSHA removes invalid IDs from the MIF upon discovery. MSHA applicable data includes the following: all Coal and Metal/Non-Metal mines under MSHA's jurisdiction since 1/1/1970; mine addresses for all mines in the database except for Abandoned mines prior to 1998 from MSHA's legacy system (addresses may or may not correspond with the physical location of the mine itself); violations that have been assessed penalties as a result of MSHA inspections beginning on 1/1/2000; and violations issued as a result of MSHA inspections conducted beginning on 1/1/2000.

**Government Publication Date: Feb 5, 2024**

#### **Surface Mining Control and Reclamation Act Sites:**

SMCRA

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by the Office of Surface Mining Reclamation and Enforcement (OSMRE) to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). This inventory contains information on the type and extent of Abandoned Mine Land (AML) impacts, as well as information on the cost associated with the reclamation of those problems. The data is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed. Disclaimer: Per the OSMRE, States and tribes who enter their data into eAMLIS (AML Inventory System) may truncate their latitude and longitude so the precise location of usually dangerous AMLs is not revealed in an effort to protect the public from searching for these AMLs, most of which are on private property. If more precise location information is needed, please contact the applicable state/tribe of interest.

**Government Publication Date: Jun 13, 2023**

#### **Mineral Resource Data System:**

MRDS

The Mineral Resource Data System (MRDS) is a collection of reports describing metallic and nonmetallic mineral resources throughout the world. Included are deposit name, location, commodity, deposit description, geologic characteristics, production, reserves, resources, and references. This database contains the records previously provided in the Mineral Resource Data System (MRDS) of USGS and the Mineral Availability System/Mineral Industry Locator System (MAS/MILS) originated in the U.S. Bureau of Mines, which is now part of USGS. The USGS has ceased systematic updates of the MRDS database with their focus more recently on deposits of critical minerals while providing a well-documented baseline of historical mine locations from USGS topographic maps.

**Government Publication Date: Mar 15, 2016**

#### **DOE Legacy Management Sites:**

LM SITES

The U.S. Department of Energy (DOE) Office of Legacy Management (LM) currently manages radioactive and chemical waste, environmental contamination, and hazardous material at over 100 sites across the U.S. The LM manages sites with diverse regulatory drivers (statutes or programs that direct cleanup and management requirements at DOE sites) or as part of internal DOE or congressionally-recognized programs, such as but not limited to: Formerly Utilized Sites Remedial Action Program (FUSRAP), Uranium Mill Tailings Radiation Control Act (UMTRCA Title I, Title II), Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), Resource Conservation and Recovery Act (RCRA), Decontamination and Decommissioning (D&D), Nuclear Waste Policy Act (NWPA). This site listing includes data exported from the DOE Office of LM's Geospatial Environmental Mapping System (GEMS). GEMS Data disclaimer: The DOE Office of LM makes no representation or warranty, expressed or implied, regarding the use, accuracy, availability, or completeness of the data presented herein.

**Government Publication Date: Dec 12, 2023**

#### **Alternative Fueling Stations:**

ALT FUELS

This list of alternative fueling stations is sourced from the Alternative Fuels Data Center (AFDC). The U.S. Department of Energy's Office of Energy Efficiency & Renewable Energy launched the AFDC in 1991 as a repository for alternative fuel vehicle performance data, which provides a wealth of information and data on alternative and renewable fuels, advanced vehicles, fuel-saving strategies, and emerging transportation technologies. The data includes Biodiesel (B20 and above), Compressed Natural Gas (CNG), Electric, Ethanol (E85), Hydrogen, Liquefied Natural Gas (LNG), Propane (LPG), and Renewable Diesel (R20 and above) fuel type locations.

**Government Publication Date: Apr 30, 2024**

#### **Superfunds Consent Decrees:**

CONSENT DECREES

This list of Superfund consent decrees is provided by the Department of Justice, Environment & Natural Resources Division (ENRD) through a Freedom of Information Act (FOIA) applicable file. This listing includes Cases filed since 2010 limited to the following: Consent Decrees for CERCLA or Superfund Sites filed and/or as proposed within the ENRD's Case Management System (CMS); and applicable ENRD's Environmental Defense Section (EDS) CERCLA Cases with "Consent" in History Note. CMS may not reflect the latest developments in a case, nor can the agency guarantee the accuracy of the data. ENRD Disclaimer: Congress excluded three discrete categories of law enforcement and national security records from the requirements of the FOIA; response is limited to those records that are subject to the requirements of the FOIA; however, this should not be taken as an indication that excluded records do, or do not, exist.

**Government Publication Date: Sep 15, 2023**

#### **Air Facility System:**

AFS

This EPA retired Air Facility System (AFS) dataset contains emissions, compliance, and enforcement data on stationary sources of air pollution. Regulated sources cover a wide spectrum; from large industrial facilities to relatively small operations such as dry cleaners. AFS does not contain data on facilities that are solely asbestos demolition and/or renovation contractors, or landfills. ECHO Clean Air Act data from AFS are frozen and reflect data as of October 17, 2014; the EPA retired this system for Clean Air Act stationary sources and transitioned to ICIS-Air.

**Government Publication Date: Oct 17, 2014**

#### **Registered Pesticide Establishments:**

SSTS

This national list of active EPA-registered foreign and domestic pesticide and/or device-producing establishments is based on data from the Section Seven Tracking System (SSTS). The Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) Section 7 requires that each producing establishment must place its EPA establishment number on the label or immediate container of each pesticide, active ingredient or device produced. An EPA establishment number on a pesticide product label identifies the EPA registered location where the product was produced. The list of establishments is made available by the U.S. Environmental Protection Agency (EPA).

**Government Publication Date: Feb 29, 2024**

#### **Polychlorinated Biphenyl (PCB) Transformers:**

PCBT

Locations of Transformers Containing Polychlorinated Biphenyls (PCBs) registered with the United States Environmental Protection Agency. PCB transformer owners must register their transformer(s) with EPA. Although not required, PCB transformer owners who have removed and properly disposed of a registered PCB transformer may notify EPA to have their PCB transformer de-registered. Data made available by EPA.

**Government Publication Date: Oct 15, 2019**

#### **Polychlorinated Biphenyl (PCB) Notifiers:**

PCB

Facilities included in the national list of facilities that have notified the United States Environmental Protection Agency (EPA) of Polychlorinated Biphenyl (PCB) activities. Any company or person storing, transporting or disposing of PCBs or conducting PCB research and development must notify the EPA and receive an identification number.

**Government Publication Date: May 23, 2024**

### **State**

#### **Priority Ranking List:**

PRIORITYCLEAN

The Florida Legislature has established a state-funded program to cleanup properties that are contaminated as a result of the operations of a drycleaning facility or wholesale supply facility (Chapter 376, Florida Statutes). The program is administered by the Florida Department of Environmental Protection (FDEP). The statute was sponsored by the drycleaning industry to address environmental, economic, and liability issues resulting from drycleaning solvent contamination. The program provides limited liability protection to the owner, operator and real property owner of drycleaning or wholesale supply facilities for cleanup of drycleaning solvent contamination if the parties meet the eligibility conditions stated in the law.

**Government Publication Date: Mar 8, 2024**

#### **Dry Cleaning Facilities:**

DRYCLEANERS

A listing of dry cleaning facilities registered with the Florida Department of Environmental Protection (FDEP). The information contains facility identification number, site location information, related party (owner) information, and facility type and status. Data is taken from the Storage Tank & Contamination Monitoring database, the registration repository of dry cleaner facility data.

**Government Publication Date: Apr 29, 2024**

#### **Delisted Dry Cleaning Facilities:**

DELISTED DRYCLEANERS

List of sites removed from the drycleaners database made available by the Florida Department of Environmental Conservation (DEC).

**Government Publication Date: Apr 29, 2024**

#### **Historical Dry Cleaners:**

HISTORICAL DRYC

The Florida Department of Environmental Protection (FDEP) provided this historical database of regulated and non-regulated dry cleaning facilities. These facilities were at one time tracked and registered by the FDEP OCULUS Electronic Document Management System as "drums" in the underground storage tank database.

**Government Publication Date: Aug 2, 2013**

**Oil and Hazardous Materials Incidents:**

**SPILLS**

Statewide listing of oil and hazardous materials spills and incidents recorded by the Florida Department of Environmental Protection (FDEP).

**Government Publication Date: May 30, 2024**

**Contaminated Sites:**

**DWM CONTAM**

Florida Department of Environmental Protection (FDEP) Division of Waste Management (DWM) listing of active or known sites that include sites requiring cleanup but are not actively being worked on due to the agency's lack of funding (primarily petroleum and drycleaning).

**Government Publication Date: Jul 14, 2023**

**Delisted Contaminated Sites:**

**DEL CONTAM SITE**

List of sites which were once included on the Florida Department of Environmental Protection (FDEP) Division of Waste Management (DWM)'s Contaminated Sites list. As sites on the Contaminated Sites (CS) list are cleaned up or closed under risk based corrective action, they are removed from the CS list.

**Government Publication Date: Sep 30, 2015**

**Aqueous Film Forming Foam (AFFF):**

**PFAS AFFF**

A list of fire fighter training facilities that use or possibly used Aqueous Film Forming Foam (AFFF). This list is made available by the Florida Department of Environmental Protection (DEP).

**Government Publication Date: Jan 30, 2024**

**PFAS Investigation at Federal Facilities:**

**PFAS**

List of sites - including Federal Facilities - in Florida at which either a) there has been confirmed or suspected usage of Aqueous Film Forming Foam (AFFF), or b) the Division of Waste Management has identified as a potential source or environmental impact related to per- and polyfluoroalkyl substances (PFAS). The Florida Department of Environmental Protection (DEP) is committed to the protection of the groundwater resources of the state and the public health and safety of residents. The DEP will continue its efforts to investigate and understand PFAS in the environment and the ecological and human health risks associated with PFAS contamination. Listings made available by the Florida Department of Environmental Protection (DEP).

**Government Publication Date: Mar 11, 2024**

**Ground Water Contamination Areas:**

**GW CONTAM**

List of areas of known groundwater contamination made available by the Florida Department of Environmental Protection (DEP). 38 counties have been delineated primarily for the agricultural pesticide ethylene dibromide (EDB), and to a much lesser extent, volatile organic and petroleum contaminants. Permitted water wells in these areas must meet specific well construction criteria and water testing prior to well use. This dataset only indicates the presence or absence of specific groundwater contaminants and does not represent all known sources of groundwater contamination in the state of Florida.

**Government Publication Date: Jul 12, 2023**

**Underground Injection Control Wells:**

**UIC**

Class I Underground Injection Control (UIC) wells that are currently or were previously active, as well as proposed sites, regulated by the Florida Department of Environmental Protection (FDEP). Class I UIC wells are used to inject nonhazardous waste, hazardous waste (new hazardous waste wells were banned in 1983), or municipal waste below the lowermost underground source of drinking water.

**Government Publication Date: Feb 29, 2024**

**Well Surveillance Program Facilities:**

**WELL SURVEILLANCE**

List of facilities made available by the Florida Health Well Surveillance group. The Well Surveillance group manages several programs to identify and monitor areas in Florida where contaminated drinking water is suspected and may pose a threat to public health. The section coordinates with the County Health Departments (CHDs) to locate potable wells and conduct water sampling for contaminants of concern. The Well Surveillance Section is composed of the State Underground Petroleum Environmental Response Act (SUPER Act), Drinking Water Toxics Program (Toxics), Drycleaner Solvent Cleanup Program (DSCP). Includes locations of known cattle dipping vats.

**Government Publication Date: May 31, 2024**

**Cattle Dip Vats:**

**CDV SOUTHEAST**

A list of Cattle Dip Vats in Southeast Florida made available by the Florida Department of Environmental Protection.

**Government Publication Date: Jan 19, 2017**

**Tier 2 Report:**

TIER 2

A list of Tier 2 facilities in the state of Florida. The list tracks the inventory of chemicals within a particular facility. This list is provided by the Florida Division of Emergency Management.

**Government Publication Date:** Apr 2, 2024

**Delisted County Records:**

DELISTED COUNTY

Records removed from county databases. Records may be removed from the county lists made available by the respective county departments because they are inactive, or because they have been deemed to be below reportable thresholds.

**Government Publication Date:** May 15, 2024

**Tribal**

**No Tribal additional environmental record sources available for this State.**

**County**

**No County additional environmental databases were selected to be included in the search.**

# Definitions

**Database Descriptions:** This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

**Detail Report:** This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

**Distance:** The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

**Direction:** The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

**Elevation:** The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

**Executive Summary:** This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

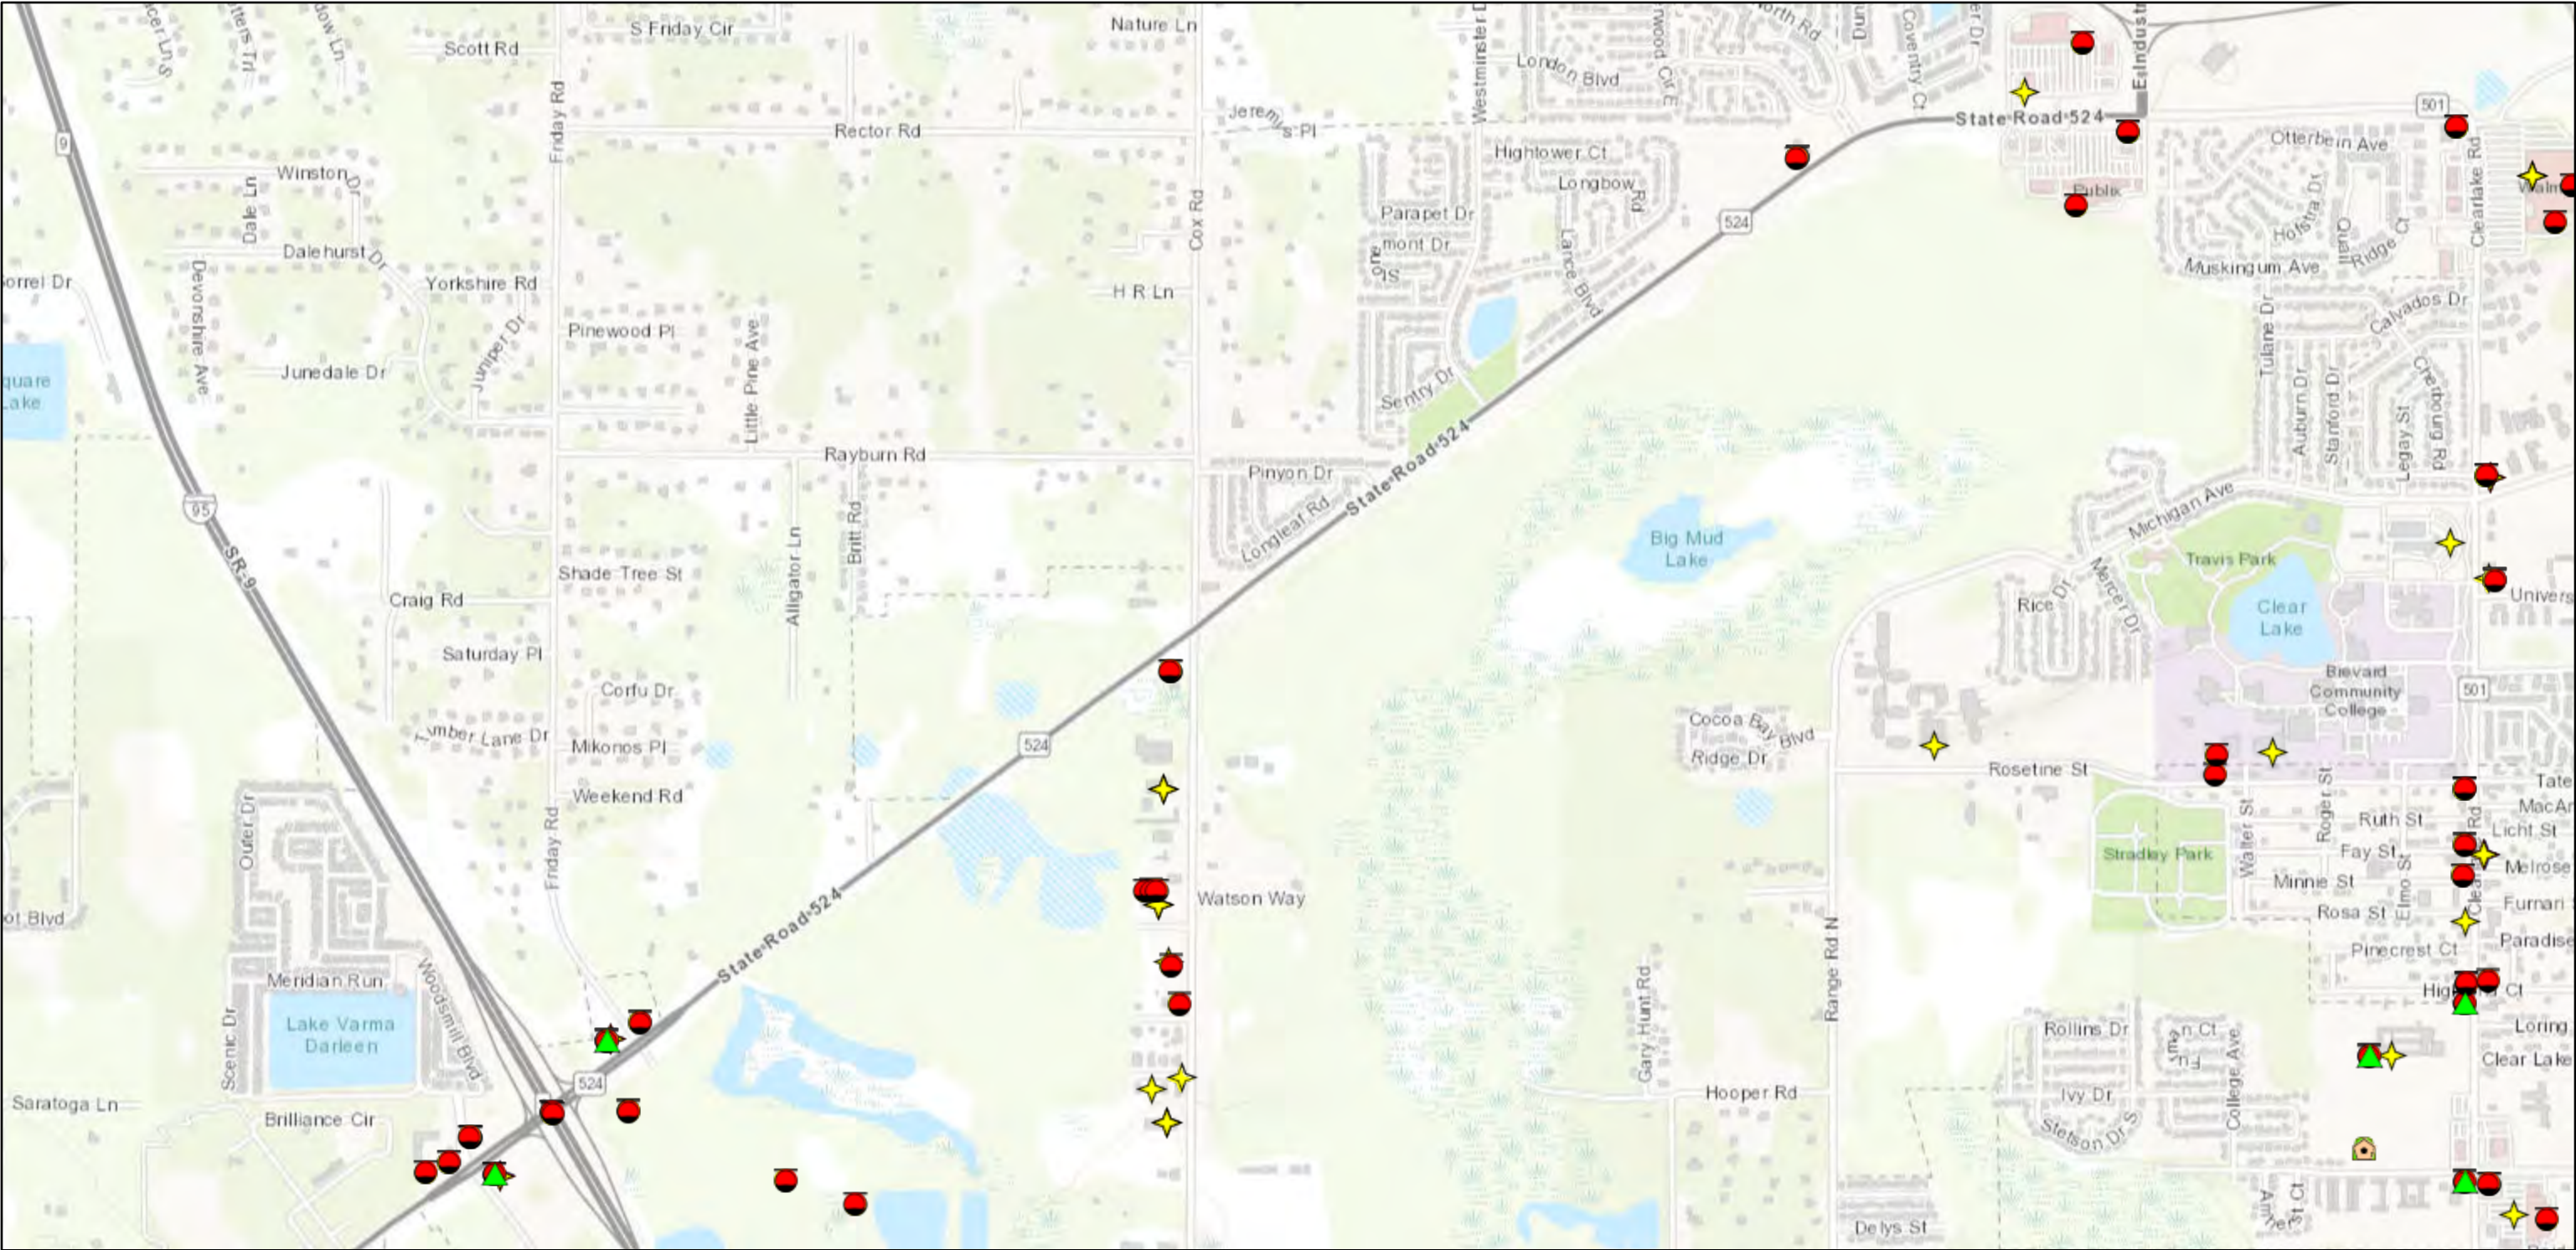

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

**Map Key:** The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

**Unplottables:** These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

**JEFFERY P. TOWNSEND, LEP, REPA**  
**SENIOR SPECIALIST/PRINCIPAL CONSULTANT**  
ORLANDO, FLORIDA

TOTAL YEARS OF EXPERIENCE: 32 / YEARS WITH INTERTEK-PSI: 32

### Education

- Associate in Science, Valencia College, Orlando, Florida, 1994
- Aerospace Engineering Studies, Kansas University 1985-87

### Certifications/Registrations/Technical Training

- Licensed Environmental Professional #144
- Registered Environmental Property Assessor #5999
- Environmental Professional-Phase I ESA, PSI
- Phase I & II Environmental Site Assessment Field Methods, PSI
- EPA AHERA Asbestos Inspector
- Lead Inspector
- RMD LPA-1 Certified
- OSHA 40-Hour HAZWOPER
- U.S. Housing of Urban Development (HUD) Environmental Review Procedures Training

### Professional Experience

Mr. Townsend has over 32 years of experience in the environmental engineering field. He is responsible for senior technical review of Phase I ESAs, employee development and quality control for those performing Phase I ESAs, and has been assigned as one of PSI's Principal Consultants for the Phase I ESA Program. Mr. Townsend is an EPA-certified asbestos and lead inspector and a Licensed Environmental Professional. His current responsibilities include conducting Phase I ESAs, CSERs, asbestos, lead-based paint, and indoor air quality projects. The ESAs have included both developed and undeveloped properties to include agricultural, commercial, industrial, and residential properties, and large acre tracts of land.

### Representative Roadway Project Experience

- Infrastructure Engineers, LLC - Conducted a CSER on an approximately 3.2-mile State Road 524 corridor and proposed pond locations in Brevard County, Florida that included commercial, residential, and undeveloped land. The study was conducted in general accordance with the methodology described in Chapter 20 of the FDOT PD&E Manual - 2019 Version and ASTM E 1527-13, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process. The area assessed included approximately 500 feet from the Right-of-Way (ROW) of the corridor for petroleum, drycleaners, and non-petroleum sites; 1,000 feet from the ROW line for non-landfill solid waste sites; and 1/2 mile from the ROW line for CERCLA, NPL Superfund sites, or Landfill sites. Sites with potential for hazardous material or petroleum impact to the soil and/or groundwater were identified and assigned risk ratings.

- Pegasus Engineering, LLC - Conducted a CSER on an intersection corridor and proposed pond locations in Orange County, Florida that included commercial, residential, and undeveloped land. The study was conducted in general accordance with the methodology described in Chapter 20 of the FDOT PD&E Manual - 2019 Version and ASTM E 1527-13, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process. The area assessed included approximately 500 feet from the ROW of the corridor for petroleum, drycleaners, and non-petroleum sites; 1,000 feet from the ROW line for non-landfill solid waste sites; and 1/2 mile from the ROW line for CERCLA, NPL Superfund sites, or Landfill sites.
- Tavistock East Services, LLC and WBQ Design & Engineering, Inc. - Conducted a CSER and updated CSER on an approximately 6.3-mile proposed roadway corridor and pond locations in Orange County, Florida that included commercial, residential, and undeveloped land. The study was conducted in general accordance with the methodology described in Chapter 20 of the FDOT PD&E Manual - 2016 Version and ASTM E 1527-13, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process. The area assessed included approximately 250 feet from the Right-of-Way (ROW) of the corridor for petroleum, drycleaners, non-petroleum sites, non-landfill solid waste sites, CERCLA, NPL Superfund sites, and Landfill sites. Sites with potential for hazardous material or petroleum impact to the soil and/or groundwater were identified and assigned risk ratings.
- Inwood Consulting Engineers - Involved in project coordination and management for PD&E Study for State Road 46 that included approximately five miles and included assessing sites along the corridor to determine the risk potential for roadway expansion and selected pond sites. All work was conducted in accordance with the FDOT PD&E manual.
- Inwood Consulting Engineers – Performed a CSER project for PD&E Study for Phase I of the State Road 426/CR 419 Widening Project in Oviedo, Florida. The CSER project consisted of approximately 5 miles of roadway located in Downtown Oviedo. A subsequent CSER was prepared for three Proposed Pond locations also situated in Downtown Oviedo, Florida.
- Inwood Consulting Engineers - Performed a CSER project for PD&E Study for Phase II of the State Road 426/CR 419 Widening Project in Oviedo, Florida. The CSER project consisted of approximately 2 miles of roadway extending from Pine Avenue east to Avenue B along the SR 426/CR 419 corridor. Four proposed pond locations were included in this CSER.

### Representative Large-Acre Tract Project Experience

- South Florida Water Management District - Phase I ESA Project Manager and Team Leader for 187,000± acre transaction that included cultivated lands and industrial assets (citrus plant, railroad maintenance yards, and sugar mills). The Project Team included personnel from select consulting firms. Mr. Townsend was responsible for ensuring that the Project Team assigned to the project completed daily tasks, implemented quality control, discussed findings with PSI's Chief Engineer and the client. The Phase I ESA team was responsible for identifying point source locations to conduct Phase II ESA.
- Confidential Clients - Conducted Phase I ESAs on tracts of land located in surrounding Central Florida counties that included agriculturally developed land. The properties ranged in size from 5± to 30,000± acres. The site reconnaissance included traversing the property on the ground and aerial fly-overs.

## **WILLIAM E. HOGG, JD, PG**

### **PRINCIPAL CONSULTANT**

KENNESAW, GEORGIA

STARTED WITH INTERTEK-PSI: 1993 /YEARS IN INDUSTRY: 41

#### **Education**

- Juris Doctor, Samford University, Cumberland School of Law, 1988
- Bachelor of Arts in Geology, College of William & Mary, Virginia, 1975

#### **Certifications/Registrations/Technical Training**

- OSHA 29 CFR 1910.120 HAZWOPER, Worker
- Professional Geologist, #782, Georgia
- Member of Georgia State Bar, # 360010
- AHERA Accredited Asbestos Building Inspector
- Principal Environmental Consultant, Intertek-PSI

#### **Professional Experience**

Mr. Hogg is a Principal Consultant within Intertek-PSI's National Client Group. In this capacity, he is responsible for the review and technical oversight of environmental assessments and consulting services provided to commercial real estate owners, developers, investors and lenders. He has nearly forty years of engineering and environmental consulting experience and joined PSI in 1993.

Mr. Hogg's technical areas of practice and experience include Phase I and II environmental site assessments (ESAs), comprehensive contamination assessment, remedial action planning, underground storage tank (UST) closure and upgrade services, asbestos, and lead-based paint consulting, along with various other environmental consulting services. He has also developed environmental assessment guidelines and provides third-party review and consultation for several national commercial real investors and lenders.

A significant portion of Mr. Hogg's practice has focused on the management of environmental due diligence for large, multiple-property real estate transactions. He has also provided consulting services for various conduit programs in the commercial mortgage-backed securitization (CMBS) market.

As a lawyer, Mr. Hogg is familiar and experienced with the legal consequences of environmental contamination for property owners and lenders. His legal perspective and experience also assist him in understanding the complexity of commercial real estate transactions and how environmental information impacts the transactions.

## WILLIAM E. HOGG, JD, PG (CONTINUED)

### Representative Environmental Technical and Project Management Project Experience

- Link Logistics Real Estate (formerly Gramercy Property Trust); Since 2012 has served as overall national coordinator of Intertek-PSI's services for the environmental and physical condition assessment of Link's acquisitions.
- Voya Investment Management, LLC –Serves as the primary environmental consultant to Voya's commercial loan program.
- Sysco Corporation – Senior Consultant and National Coordinator for Sysco Corporation's environmental due diligence and development programs for new food distribution facilities and regional redistribution centers.
- Constellation Insurance (formerly Ohio National Life Insurance Company) – Since 2005 serves as Senior Consultant and National Coordinator for Constellation's commercial real estate lending program.
- AT&T Nationwide Asbestos Consulting Services – Principal in charge of coordinating asbestos survey, design and abatement monitoring services under the National Asbestos Services Agreement.
- Prudential Life Insurance Company – Under Prudential's Environmental Program, served as Prudential Coordinator for PSI and before that Law Engineering and Environmental Services.
- American Red Cross; National Contract - National Coordinator and Senior Technical Professional under PSI's National Environmental Services Agreement.
- City of Charlotte; North Carolina - Project Manager and Senior Technical Consultant for the City's UST program. Responsible for assisting in bringing 190+ USTs into compliance with state and federal regulations.
- Center Square Complex; Philadelphia, Pennsylvania - Project Manager for the fast-track environmental assessment of the landmark two million square foot office/retail complex in center city Philadelphia on behalf of Metropolitan Life Insurance Company.
- Office/Retail Site - Consultant to the executor for a contested estate settlement. Included assessment of existing and former UST facilities, automotive repair facilities, and dry-cleaning operations. Included delineation and evaluation of halogenated solvent contamination in accordance with the Georgia Hazardous Site Response Act regulations.

### Select Additional Representative Clientele for Environmental Services
